# James Carter & Co

Seedsmen by Royal Warrants to
H.M. THE QUEEN AND H.R.H. THE PRINCE OF WALES
237, 238, & 97, High Holborn, London, England.

TESTED SEEDS for the GARDEN, 1900.

### PRIZES.

The system we originated last season, of establishing public trials with the produce of our Vegetable and Flower Seeds at Horticultural Exhibitions in various parts of the Country against all comers, has been a great success. Space will not permit an extended report, but we give below sufficient particulars to convince the most exacting cultivator that CARTERS' TESTED SEEDS maintain their reputation as Prize-winners all over the United Kingdom.

# 3259 PRIZES WON BY CUSTOMERS IN 1898-9.

Southern Counties	680	PRIZES	IN	OPEN	COMPETITION	AGAINST	ALL	COMERS.
Eastern Counties	391	PRIZES	IN	OPEN	COMPETITION	AGAINST	ALL	COMERS.
Western Counties	512	PRIZES	IN	OPEN	COMPETITION	AGAINST	ALL	COMERS.
Midland Counties	811	PRIZES	IN	OPEN	COMPETITION	AGAINST	ALL	COMERS.
Northern Counties	530	PRIZES	IN	OPEN	COMPETITION	AGAINST	ALL	COMERS.
Wales, Ireland, Scotland, &c.,	335	PRIZES	IN	OPEN	COMPETITION	AGAINST	ALL	COMERS.

We have included some of these Prizes in our descriptions of the various vegetables to which they refer. See pages 18 to 62.

CONDITIONS OF

#### MESSRS. CARTERS' CASH PRIZES FOR 1900.

JAMES CARTER & CO., The Queen's Seedsmen, 237, 238, & 97, High Holborn, London, undertake, upon being furnished with certified evidence from the Secretary of any Horticultural Society in the United Kingdom, to duplicate First, Second, or Third Money Awards made to the exhibitors who show the products of Seeds and Potatoes, from purchases made by the exhibitor from this Catalogue above 10s. in value, and obtained direct from Messrs. Carters' Establishment during the twelve months ending June 30th, 1900. The said duplication will be limited to the value of the purchase, but exhibits of exceptional merit will be treated with liberality at the option of Messrs. Carter.

The products to be of the exhibitor's own growth, and in case of any dispute as to purchase, &c., an invoice of the seeds purchased must be produced if required, and the specimens are to be staged in accordance with the regulations of the Society. This offer does not apply to special prizes offered by Firms and other Patrons.

EXAMPLE.—If 10s. or 20s. are offered by the Society as Prizes for, say, the best dish of Peas, James Carter & Co. will award an equal amount if their customer gains one or other of them, providing his purchase extends to 10s. or 20s., and that he has carried out the above conditions.

Customers intending to claim the advantages of these Special Prizes must notify the fact to us a fortnight before the day of the Show, stating the names of the Vegetables, Potatoes, or Flowers they intend to stage, when we will send neatly-printed cards, which must be exposed to view on the exhibit during the whole time of the Show. We shall also send a voucher showing the applicant how far the value of our Cash Prizes will apply to him, and also a sheet on which to record his prizes to save the Secretary unnecessary work.

IMPORTANT.—If this offer does not appear in the Prize Schedule of the Horticultural Show in the intending Competitor's district, it must be considered cancelled; but we are always pleased to hear from our Customers of their intention to compete, and in the event of their winning prizes, we may decide to give them an honorarium for their trouble. We invite our Customers to bring this novel form of Prizes to the notice of their local Horticultural Society.

These Prizes are open to all Messrs. Carters' Customers, but not available to Market Growers, Seedsmen,
Nurserymen, or Horticultural Traders.

In order that intending purchasers of CARTERS' TESTED SEEDS may be assured of the genuineness of what they are buying, we have decided to adopt the Trade Mark (of which the illustration herewith is a reproduction), stamped with the year the

Trade Mark→
TWO CARTERS.

Trade Mark—
TWO CARTERS.

ALL PACKETS SENT OUT BY US BEAR OUR REGISTERED TRADE MARK OF TWO CARTERS AS AROYE.

seed is distributed by us; and we hereby give notice that this Mark, which has been duly registered according to Act of Parliament, will for the future be found attached to every package of seed offered in this catalogue in the form of a print or label, and we would earnestly entreat intending purchasers of CARTERS' TESTED SEEDS to see that the packets with which they are supplied bear this distinguishing mark. It is not sufficient to be told that "these seeds came from Carters';" our name and Trade Mark must be there, and we can only guarantee garden seeds as grown under our supervision when they are sold and delivered in packets bearing our new Trade Mark, as represented above, stamped with the year the seed should be sown.

We raise no objection to seeds sold by others, but in justice to ourselves we are most anxious that intending purchasers of Carters' Tested Seeds, whose esteemed orders and recommendations we greatly value, should be quite certain they are buying Carters' Tested Seeds, and of the newest harvest.

This particular Trade Mark has been adopted after very careful investigation, to avoid clashing with other trade marks. As bona-fide farmers and seed growers, the device of two agricultural carters seems to us a very appropriate one, and sufficiently distinct to prevent confusion or deception.

. 237, 238, & 97, HIGH HOLBORN, LONDON. James Carter 16

January 1st, 1900.

### CARTERS' POPULAR BOXES OF SEEDS.

The Seeds offered in our Collections are of the best re-selected stocks only, taken from the same sacks as general orders given from this Catalogue. We can supply more Seeds for the money when purchased in this form, because we put up these Collections by the hundred, and by such means effect a great saving in labour. They can be despatched immediately, packed in wooden boxes, and sent carriage free to any Railway Station in England and Wales, or Ports in Ireland and Scotland in direct steam communication with London, on receipt of remittance. It is inconvenient to make alterations in these Collections.

# 21/- CARTERS' CUINEA BOX OF KITCHEN CARDEN SEEDS 21/-

CONTAINS-

Lady PAKENHAM wishes 24 boxes of seeds for Cottagers. It shows how they appreciated the result last year.—Pakenham Hall.

FOR COLLECTIONS OF FLOWER SEEDS, SEE PAGE 69.

# GREEN PEAS—THE BEST FOR SUCCESSIONAL USE. JUNE TO NOVEMBER.

In many large establishments a constant succession of Peas is grown out in the open from June to November, and there is no reason why the custom should not extend to all private gardens where vegetables are cultivated for home consumption. Last year we offered the following selection with so much success that we again offer the group as representing the best collection calculated to produce Peas for five months, under fair conditions, if sown at varying periods during the Spring and Summer. It would be difficult for us to give precise dates for putting the seed into the ground, as so much depends upon soil and situation. Suffice it to say that the last sowings should not be made later than the second week in June.

NAME.	DESCRIPTION.	неіGHT.	WHEN TO SOW.	EXPECT READY TO PICK.	PRICE, Carriage Free.

The Collection, 1 quart each of 7 varieties, price 22s. 6d. Carriage Free.

# GREEN PEAS—THE BEST FOR SUCCESSIONAL USE. JUNE TO NOVEMBER.

In all establishments the very best modern types of vegetables should be grown. The additional cost of a few shillings in the seed bill is trifling when compared with the great satisfaction that is to be obtained from a highly-selected strain as against a common breed.

In peas the point is a most important one, and a choicer selection than that named above is unobtainable, as they represent the highest grade of quality, and are improvements in every way upon the older varieties, which have all done good service in their particular time.

# FIRST EARLY MARROWFAT PEAS.

CARTERS' EARLY MORN.

Sold in sealed packets only, price 2/- per pint, 3/6 per quart.

# CARTERS' EARLY MORN PEA.

(SEE ILLUSTRATION OPPOSITE.)

This remarkable marrowfat Pea is a real advance in the first early section—indeed, it is quickly misplacing many of the small round-seeded kinds hitherto sown for this purpose. A rigid selection each season of the most approved plants has enabled us to bring the character of its growth into a convenient compass, so that it is now classed in the 3-feet division. The pods, whilst being produced out of doors early in June, are as fine in size as our well-known "Daisy." It was frequently to be seen on the exhibition board during the season, taking First Prize at the early shows, and many of our customers sent us specimens to look at in June, being so satisfied with the produce.

Price, in sealed packets, 2s. per pint; 3s. 6d. per quart.

STOCK VERY LIMITED.

This fine Pea has been the subject of a good deal of comment in the Horticultural Journals during the past seasons, as the following extracts show:—

FORCING PEAS.—"There are several forcing peas now to select from, and these are a distinct advance on the older kinds, as being very dwarf they are invaluable for pots, and those who can grow them in frames or cool houses from the start will find them most reliable. Early Morn must be included in this list, as though over 2 feet in height, it is one of the best I have tried, as being a distinct marrow it is much liked on account of its quality."

G. WYTHES in The Garden.

"CARTERS' EARLY MORN was sown at the same time as SPRINGTIDE, and is truly a fine variety. Unstaked, the haulm was scarcely 2 feet in length, but the crop was remarkably heavy, the pods nearly the size of those of Duchess of Albany, and closely filled with peas equal in quality to anything I had on my table all through the season."—Report of a Pea trial made in Somersetshire.

NEW EARLY PEAS.—"Among the numerous varieties of early peas, I think Carters' Early Morn is entitled to first place as the largest early pea yet sent out. With us it is a marvellous cropper, and produces pods equal to the largest Duke of Albany, and withal of a most excellent marrow flavour. In point of earliness is very little behind its dwarf companions. From a row sown on February 8th, 1897, we gathered on June 15th; and in nine seasons out of ten it would be much earlier, as this season has been one of too many wet and cold nights for early vegetables."—The Gardeners' Magazine.

NEW PEA, CARTERS' EARLY MORN.—"In your issue of July 17th, page 436, in speaking of new early peas, your correspondent, Mr. W. A. Cook, refers to this pea in very glowing terms. Having grown it side by side with several new kinds, I can fully bear out all he writes about it, either as an exhibition variety or for general use. I believe it is destined to take a foremost place, and it is most prolific, and remains a long time in good condition; the pods are very handsome, well filled, and the peas of excellent flavour. Another good point in its favour is that it continues to bear for a long season. I exhibited a dish on June 29th at the R.H.S. meeting, and from the same row this day, August 7th, we have picked a fine lot. Considering the long spell of dry weather, and that the variety was grown without any special treatment, this is a good record. I do not hesitate to say that it is the finest marrowfat pea I have ever grown."—From the Gardeners' Magazine.

The Head Gardener at a Royal Establishment writes:—"A very fine pea, combining size and flavour with earliness, from the latter standpoint a contemporary of the first earlies."

"Carters' Early Morn is the largest early pea that has ever come under my notice. Many of the pods contain ten and eleven peas. This pea is A1."—J. A.

"Carters' Early Morn is certainly a first-class early pea, one of the best of the long-podded type."—H. C. P.

"Carters' Early Morn Pea, sown February 15th, came on earlier than three other sorts, one of which was American Wonder."

H. H. Sandridge.

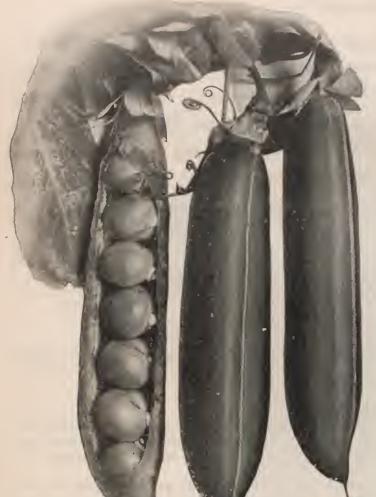

PEA, CARTERS' EARLY MORN.—"A small packet was sent to me for trial last spring by Messrs. J. Carter & Co., which I sowed with several other well-known varieties, and it proved a great surprise to me. It is not only very early and prolific, continuing to bear for a much longer period than any other large-podded variety that I am acquainted with, but it is by far the finest pea for either exhibition or home use I have yet seen; and if I am not mistaken it will, when better known, become a great favourite for market use; and the flavour is excellent. I would strongly advise exhibitors that are on the look out for a good pea to give this a trial, feeling sure they will not be disappointed."—The Gardening World.

PEA, EARLY MORN.—"For pot or frame culture I have found no variety equal to Early Morn. Plants from seeds sown in the middle of January fruited at the end of April. The seed was given more warmth till through the soil, and then grown in a cool pit. Out of several varieties on trial, it was the earliest by ten days. In the open I was much pleased with it last year, as it was fit for table the third week in May. This year it promises well, though a little later. It is podding freely, but the severe weather in April retarded the bloom."—Grower in The Field.

### CARTERS' EARLY MORN PEA IS A GRAND FORCER.

Award of Merit, Royal Horticultural Society, April, 1899.

# CARTERS' HAND-PICKED PEAS.

EARLIEST VARIETIES.

# Grand New Introductions for 1900.

# CARTERS' DAYLIGHT.

A NEW FIRST EARLY MARROWFAT PEA.

This fine Pea can be best described when we state it is very similar in type to our Early Morn. It is another of the splendid results of cross fertilization between the earliest round Pea in existence, namely, Carters' Lightning, and the finest flavoured and most distinct dwarf Marrowfat known, which is Carters' Daisy. It possesses a happy combination of best points of its two parents—

The earliness of Carters' Lightning and

The handsome pods of Carters' Daisy.

As the photograph shows, it bears large well-developed pods well filled with enormous Peas, which, when cooked, are of the most delicious sweet marrowfat flavour.

Height, 2½ feet.

In sealed packets, price 2/6 per pint.

AN EXTRA EARLY WHITE GEM.

We have tried many selections at our experimental grounds, and this Extra Early White Gem exhibits to a larger degree than any other all the best points which are looked for in early dwarfs.

For earliness it comes in before our extra early Premium Gem, which has held the field for so many years. Its haulm is compact and bushy, from 12 to 15 inches in height, remarkable for strength of bearing, the long handsome pods literally crowding together to the very top.

For flavour and quality this pea cannot be surpassed.

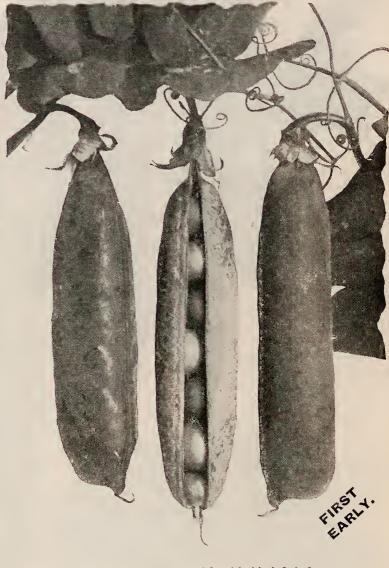

Photographed from Nature and Copyrighted by J. C. & Co. CARTERS' DIAMOND.

# CARTERS' HAND-PICKED PEAS.—Earliest Varieties.

#### FIRST EARLY PEAS.

The Cultivation of Peas.—Early round Peas may be sown out of doors any time from November onwards, but the Spring is generally the season when the largest quantities of Second Early and Main Crop Marrow Peas are put in, extending to June for the latest crops. They thrive best in ground that has been deeply trenched and manured for a previous crop; the seeds should be planted from 1½ to 3 inches deep, in either single or double rows, and the taller varieties must be staked when they are from 4 to 6 inches high; the tallest kinds should not be less than 6 feet apart in rows, and the dwarfest varieties half this distance. Peas will stand a good deal of drought if the roots find their way into some nice rich soil. (For full particulars see Carters' Practical Gardener, price 15., enclosed with goods, or 15. 3d. post free.)

Photographed from Nature and Copyrighted by J. C. & Co. CARTERS' SPRINGTIDE.

## Carters' "Re-selected Lightning."

Carters' Lightning is the Earliest White Round Pea.—This opinion is confirmed by the testimony sent us from time to time by some of the best growers in the country. It is particularly level and neat in habit of growth; it is also more robust in the haulm than any other Early Round Pea, and a prodigious cropper, the pods being long for Peas of this character, usually hanging in pairs, and well filled—distinct both in outline and seed—height about 2½ feet. A great favourite with market gardeners in the Southern Counties, who plant it before Christmas to give their first pickings in the Spring. It is also very useful in gardens where the soil is cold and heavy. With a view of obtaining a stock from the earliest and most robust plants, we have for several years gathered seed from such selected plants only in our annual crops as have given evidence of their forwardness in reaching maturity. Our stock is very limited. is very limited.

In sealed packets  $\cdots$   $\cdots$   $\cdots$  per pint, 2s.  $2\frac{1}{2}$  feet  $\frac{1}{2}$  feet  $\frac{1}{2}$  feet  $\frac{1}{2}$  feet  $\frac{1}{2}$ 

### Carters' Springtide.

A first early Marrow Pea.—We were certain this fine Pea would please all who grew it. It combines the hardiness and forward character of the round early sorts with the habit and best points of the marrowfat class.

"This Pea I consider quite in the front rank. It is very early—we gathered on June 15th. The pods are well filled, and the Peas are of most excellent flavour. Very prolific bearer, about 2 ft. 6 in. high. One of the very best Peas for early work I have ever grown."—W. A. C.

"I sowed Carters' Springtide Pea at the end of February, and gathered the third week in June. I consider this quick work in this district after an unfavourable Spring."—J. C. in *The Garden*.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

Carters' Forcing Pea will be found one of the most valuable Peas for under-glass culture. Its stocky growth is rarely more than one foot in height. The fine pods are numerously borne, and contain from six to eight large peas, possessing the true marrowfat flavour when cooked. This Pea will commend itself not only to professional gardeners who are required to produce Peas nearly the year round, but also to amateurs having a greenhouse or vinery doing practically nothing through the winter months, and who can, with this sturdy Pea, raise supplies for their table very early wint for a first pear greent.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

"The best forcing Pea I know; dwarf habit, immense cropper, the flavour of the best marrowfats."—H. W.

"It forces well, and turns in quickly; good cropper, excellent flavour."—Mr. J. H. McII.

# CARTERS' HAND-PICKED PEAS—Earliest Varieties.

Photographed from Nature and Copyrighted by J. C. & Co.

# Carters' Blue "Re-selected

Express."—This fine First Early Pca is a counterpart of Carters' Lightning, only that the seed is blue. It is a neat grower and a very productive bearer, the pods well filled with fine-flavoured Pcas of a distinct colour when boiled. One of the largest Essex growers tells us that he gets his first pickings into Covent Garden nearly a week in front of his neighbours, and he purchases several quarters from us every season. (In some localities these blue Peas suit the soil better than white kinds.) 2½ feet.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

Carters' St. Osyth Gem.—Raised upon our Seed Farm from a cross between Chelsea Gem and Stratagem, and combining the best qualities of these two fine Peas. Height, 1½ feet.

"One of the earliest in the section is St. Osyth Gem, which closely follows Chelsea Gem, but is quite distinct from that popular variety, and runs about 3 feet high. The haulm and pods are of a very dark green colour, as are the Peas themselves, and the flavour is excellent and well in advance of that of most early Peas."—J. C. T., in The Garden.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

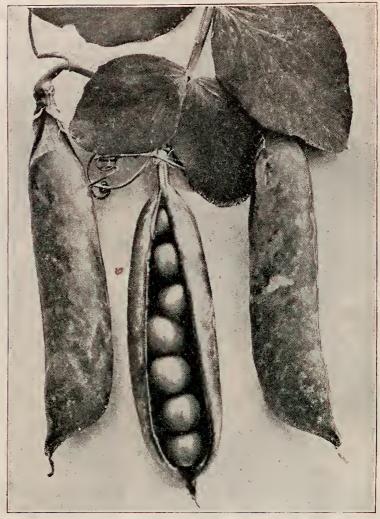

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

Carters' Dwarf Favourite.—A useful miniature wrinkled Pca, scleeted from a batch in our Trial Grounds. For gardens where space is an object, and for situations requiring a variety that can be quickly cleared, this is the Pea to grow. We have also proved its adaptability for culture under glass. Height, I foot.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

Carters' Superior.—A highly selected early bluc-seeded pea; large pods, heavily produced; hardy and robust. Height, 4 feet. In sealed packets, price 2s. 6d. per quart.

#### HAND-PICKED PEAS.—Second Early Varieties. CARTERS'

Photographed from Nature and Copyrighted by J. C. & Co. The following Extract is taken from a Report made in the "Gardeners' Chronicle" by Dr. Masters, F.R.S., who inspected our crop:-

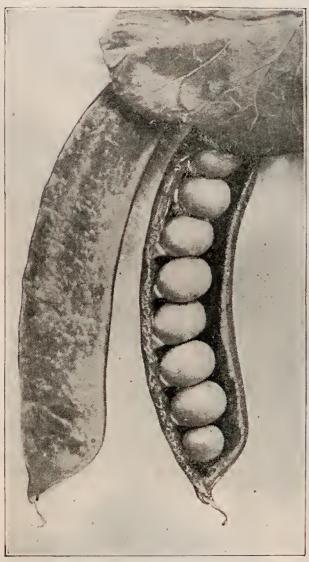

"The history of the 'Daisy' Pea is as follows:—With the object of filling the somewhat bladder-formed pod of Culverwell's Giant Marrow, Messrs. Carter crossed that variety with 'Stratagem,' the result giving them a distinct-looking Pea. In the following year they again crossed the produce with the first-cross with 'Stratagem,' the result, after another year or two of careful selection, being the present 'Daisy' Pea."

The haulin in an average season grows to a length of 12 to 18 inches, and is practically covered with handsome pods 5 inches in length, containing 8 to 10 deep, coloured Peas, whilst it possesses the most exquisite marrowfat flavour we have ever met with.

"Carters' Daisy Peas were a sight, and counted several points towards gaining the First Garden Prize." - J. O. "Carters' Daisy' Pcas were splendid; for size, flavour, and productiveness we never had their equal."--H. H. S.

### CARTERS' HAND-PICKED PEAS.

#### VARIETIES. AND MID-SEASON SECOND EARLY

Photographed from Nature by J. C. & Co.

Carters' Early Favourite (See Illustration).

—A selection from Dickson's Favourite, but very superior to that well-known variety in length of pod, extra earliness, productiveness, and quality for table. The pods are quite distinct in shape from any other Pea in cultivation ... per pint, 1s. 6d. per pint, 1s. 6d. 4 fect 2 6

Carters' Little Wonder (RE-SELECTED). — We introduced this valuable early wrinkled Pea some years since, and offer now a choice selected stock. It is a wrinkled Marrow as early as Advancer, and very superior in length and breadth of pods, productiveness, and flavour ......

Carters' Pride of the Market.—A fine main crop blue marrowfat Pea, belonging to the same family from which our Stratagem was selected. Its merits were recognised by the Royal Horticultural Society, who awarded it the highest honours. It is a very heavy cropper, yielding fine long pods, well filled with large green peas. Being a strong grower it requires to be thinly sown. Height, 2½ feet.

In sealed packets, price 1s. 3d. per pint, 2s. per quart.

Carters' Seedling.—A superior main crop Marrow Pea, the result of two distinct crossings, its parents being the well-known and valuable Peas, Stratagem, Queen, and Autocrat. It somewhat resembles our peerless Stratagem in height and general character. The pods are of a rich green colour and well filled with large Peas. Carters' Seedling is likely to become a popular exhibition Pea. Height, 3 feet.

"I exhibited Carters' Seedling Pea six times, and obtained five First Prizes and one second. Some of the pods were seven inches long."-J. H. BARTON.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

Majestic.—A splendid Mid-season Marrowfat Pea, Carters' valuable alike for the table and exhibition. It is exceedingly productive, the extra large highly-coloured pods containing from eight to eleven fine peas possessing a sweet and dainty flavour. Height, 3 feet.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

## FRENCH PEAS.

Per quart-s. d.

CARTERS' DELICATESSE (Petit Pois).—This Pea has gained a great renown among the continental connoisseurs who regard it as a delicacy for conserving as Petit Pois, and the choicest brand is grown exclusively by some houses from this stock. It is a second early wrinkled, with haulm about 3 feet. An enormous cropper.

Price 1s. 3d. per pint, 2s. per quart.

CARTERS' GIANT EDIBLE PODDED PEA.—Whilst such a large share of popularity has been accorded the ordinary shelling Peas in this country, our friends on the Continent have assiduously developed the Edible Podded Pea section, and have thus obtained a delicious vegetable but little known here. The pods will snap readily but are generally cooked whole, and served to table usually with some plain sauce.

The variety we now offer grows about 5 feet high.

Price 1s. 6d. per pint, 2s. 6d. per quart.

# CARTERS' HAND-PICKED PEAS-Main-crop Varieties.

Carters' "Danby Stratagem" and Carters' "Model Telephone" Peas.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters "Danby Stratagem."—The Danby Stratagem is a distinct improvement on the original Stratagem, having longer, straighter, and broader pods, very freely produced. We originally had the honour to introduce Stratagem Pea in 1880, which has from the day of its birth maintained the very highest position amongst all that is good in Peas, and when well grown its position even now stands unrivalled on the exhibition board. Its merits its position even now stands unrivalled on the exhibition board. Its merits have also been recognised in the highest degree by the Vegetable Committee of the Royal Horticultural Society on no less than three occasions. The haulm of our improved type is very robust, and extends to a height of  $2\frac{1}{2}$  feet, bearing a profusion of immense pods, many six inches in length, and frequently containing ten large full-flavoured Marrow Peas.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

Carters' New "Dwarf Telephone."—This is the result of several years' work in the effort to get a Pca with all the excellent qualities of Carters' Telephone, yet without the long vines of this well-known and highly-valued variety. Its height is 1½ to 2 feet; habit dwarf, stocky, healthy, and vigorous, remarkably uniform in height, without the tendency to sport which is so noticeable in many recent introductions. Its pods are Telephone pods, that is to some of the same because introductions. is to say, of the same large size and handsome appearance, remarkably well-filled and developed. The Peas are of the same tender and delicious flavour as the original *Telephone*, which, as is well-known, has educated connoisseurs in Peas to demand a grade of quality and flavour which was not dreamed of a few years ago. Stock limited.

In sealed packets, from 2s. per pint, 3s. 6d. per quart.

CARTERS' HAND-PICKED PEAS.

MAIN CROP VARIETIES.

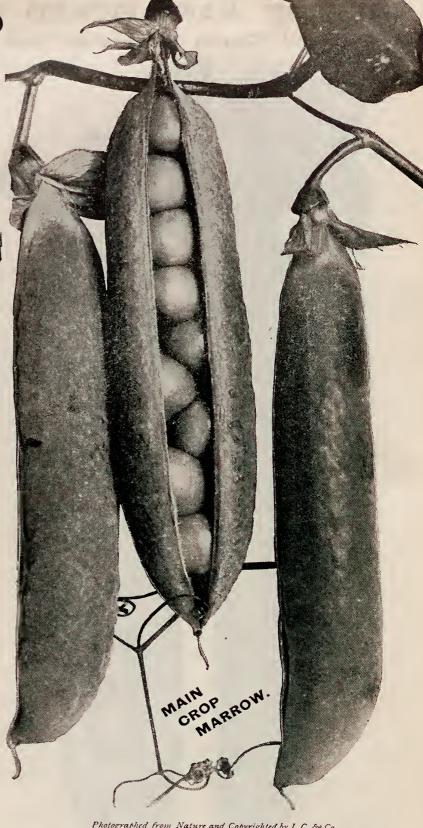

Carters' Anticipation. \_\_A Main-crop Wrinkled Marrow, introduced by us in 1887, and now exceedingly popular. We claim for "Anticipation" (which is the result of a cross between Ne Plus Ultra and an Early Wrinkled Dwarf Pea) complete and distinct individuality. In habit and size, and shape of pod, for its enormous productiveness, and for its delicious flavour, it remains unique. "Anticipation" grows to a height of about 2½ feet, and sown at the usual season it comes into bearing early in July. The foliage is of a medium shade of colour, the habit of the plant being very robust, with immense straight pods, and the seed is very distinct; they are also of an exquisite flavour when cooked.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' "Model Telegraph" is a re-sclection for size, the seed being saved from the largest pods only. The selection is from the original Telegraph, which is well-known. It was our privilege to introduce this famous Main-erop Mairrow Pea in the year 1877, and we held the opinion at the time, and which was clearly expressed in our announcement, that it would prove the forerunner of a new race, and this is exactly what has happened. Indeed, the Gardeners' Chronicle in an article on Peas recently, says:—"Telegraph may be fairly called the forcrunner of nearly all the giant-podded section now so popular," and not only does it hold a leading place in gardens but we also find that to-day it is probably grown to a much larger extent than any other Pea by the market gardeners, who are the first to find out the merits of a new vegetable, as their very livelihood depends upon their crops. It is also valuable as an exhibition Pea, on account of the size and fine colour of the pods. The seed is round and of a deep green colour, which they retain when cooked; the flavour is also of the sweetest. Height, 5 fect.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

#### PEAS FOR PODDERS AND MARKET GARDENERS.

Being one of the largest Producers of Seed Peas in the country, we are in a position to give very low quotations per Bushel and Quarter for the best varieties for Field Crops and Market Gardens.

# CARTERS' HAND-PICKED PEAS—Latest Variety.

CARTERS' MICHAELMAS PEA.

The only late Pea awarded honours in the Royal Horticultural Society trials, 1896.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS', 237, 238, & 97, HIGH HOLBORN. LONDON.—1900

Carters' Michaelmas Pea.—For many years past we have conducted experiments in our Pea trials, with the object of establishing a stock which shall provide the table with "Green Peas" beyond the period hitherto furnished by the varieties in cultivation, and we have now succeeded in fixing the character of a Pea which quite oversteps the boundary hitherto set by the times and seasons, and offer to the public our Michaelmas Pea as an absolutely distinct Pea. Late varieties of Peas of past fame have been late mainly by reason of their strawy character, and consequent tardy development to maturity, but in Carters' Michaelmas Pea the constitution of the Pea is not run through in straw, but we have fixed a dwarf bushy growth of 21/2 feet, which holds back its natural force and throws it into the pods; consequently, while being very prolific, its colour in pod is of the deepest green, and its pods are large and well filled. We have proved this Pea to possess a reserve of strength which will enable it to resist the drought and the mildew to a degree hitherto unknown in a Pea, and to preserve the sweetest flavour in the Peas for table, after other varieties have become hardened, dry, and mealy.

This Pea naturally matures very late in the season, and we always find great difficulty in harvesting the seed, consequently our stock is extremely limited.

In sealed packets, price 2s. per pint; 3s. 6d. per quart.

#### AN IMPORTANT TESTIMONIAL.

"LATE PEAS.—This season Carters' Michaelmas Pca has again asserted its superiority as a late pea, and on October 11th we gathered a nice dish. I have had several other late varieties on trial, and treated precisely the same, but these have gone, having given their last supply about the middle of September. On the Michaelmas Pea there were plenty of blooms and pods, until the frost of the 6th and 7th inst. crippled them. Sturdy and Autocrat are very fine examples of late peas, and are of excellent flavour, and for peas to supply the table from the middle of August to the middle of September are not to be beaten. Late Queen is another admirable pea for a late supply, being of excellent quality, both as regards productiveness and table quality. The older varieties, such as Ne Plus Ultra and British Queen, are good, but have not the stamina of the newer varieties. This season, in the month of August, we had a splendid lot of high quality; but with the advent of wet weather, these latter varieties were soon in a state of collapse. The peas of more modern production are not so tall-growing as the old varieties, and are therefore better able to withstand the variations of weather, and are not soprone to mildew."—W. A. C., in the Gardeners' Magazine, Oct. 23.

Report upon Carters' Michaelmas Pea, Royal Horticultural Society.

"CARTERS' MICHAELMAS.—Though the crop was by no means ready a few pods were sufficiently advanced for testing the quality, and the luxuriant green of the plants and their freedom in bearing lead the Committee to regard this Pea as a late variety of much promise; it was certainly distinct from all others, and had withstood the drought well."—Journal of Horticulture.

An eminent cultivator in Co. Durham writes:—"Carters' Michaelmas Pca stood the dry weather well. This is a most useful variety, and I am now gathering a second crop, September 14th. It stood the dry weather better than any other Pca in the trial of 20 sorts."

"Last year I grew the 'Michaelmas' Pea, a variety I saw in splendid condition in the Royal Horticultural Society's Gardens at Chiswick a few scasons ago. In growth this is not unlike 'Stratagem,' but the pods are blunter and the Peas remarkable for their green colour and excellent table quality. The 'Michaelmas' grows 2 feet to 3 feet in height, and is well worth room in all gardens where late Peas are valued."—G. W., on "Autumn Peas," in *The Garden*-

# CARTERS' HAND-PICKED DWARF OR FRENCH BEANS.

A BEAN ABSOLUTELY WITHOUT STRINGS.

# CARTERS' HAND-PICKED BEANS. DWARF, OR FRENCH BEANS.

The Cultivation of French Beans.—Sow in pots under glass for foreing from December to April, and about May 1st in the open borders, followed by two or three successional sowings at intervals of a fortnight. The rows ought to be from 2 feet to 2 feet 6 inches apart; the plants thinned to about 1 foot apart.

CLIMBING FRENCH BEAN.—(See Illustration below.)

In sealed packets, price 2s. per quart.

Photographed from Nature and Copyrighted by J. C. & Co.

#### CLIMBING FRENCH BEAN.

This novel type was first introduced to public notice by Mr. II. W. Ward, the late well-known gardener at Longford Castle. It has all the characteristics of the *Dwarf Canadian Wonder*, from which it was probably obtained, and the fact of its elimbing habit is considered by some to induce greater productiveness; at any rate the Royal Horticultural Society granted it their leading honour chiefly on account of this feature.

In sealed packets, price 2s. per quart.

# Carters' Stringless.—(See page 17.)

Carters' Canadian Wonder. - We were one of the first to make the merits of this fine dwarf Flageolet Bean known, and its popularity to-day is probably unequalled by any other variety. It is a robust and healthy Bean, and seems to withstand the vieissitudes of our uncertain climate better than others. The pods are of great length and good for exhibition. This is a re-selected stock, of which we have only a limited quantity

18 First Prizes reported to us in 1899.

"Carters' 'Canadian Wonder' Beans are the best I have ever grown. Some of the pods measured 12 inches."—D.

CANADIAN WONDER (ordinary variety) ... ...

Carters' Longsword.—One of the best and most distinct dwarf Beans for foreing; likewise a useful garden variety.

#### RUNNER BEANS.

The Cultivation of Runner Beans.—Runner Beans should be planted out of doors about the 1st of May, followed by successional sowings at intervals of a fortnight; by this means an abundant supply is provided until the plants are destroyed by the autumn frosts. Care should be taken when planting that sufficient space is allowed between the rows (say, 3 feet), and 12 inches from plant to plant in the rows. If slugs are troublesome during the young stage of growth, dust over with soot and lime.

# Carters' Jubilee Kunner. (See Illustration, page 19.)

This extraordinary Bean was first brought to the notice of our eustomers in 1888, and it still remains the longest-podded variety in eultivation, and its records on the exhibition table stand inrivalled. It was also the best Runner Bean in the Royal Horticultural Society's Gardens at a recent trial. Carters' Jubilee Runner produces an enormous erop of immense pods, which are thick, of marvellous length, and unusually fleshy, the flavour being all that is desired.

In sealed packets, 2s. 6d. per pint.

"No other Runner Bean had any chance against your 'Jubilee' at our local Show. I had some which measured 13 inches long and over an inch in width."— LE.

"Carters' Jubilee Runner Bean gave great satisfaction. It was a mass of white flowers. We cut bundles of flowers for decoration, and then had an enormous erop of Beans."—P.

"This Bean I grew in large pots forced, and it produced enormous crops. Equally prolific in the open, and of splendid quality."—G. W.

#### Carters' Holborn Masterpiece.—One of the earliest and finest-flavoured Beans we have met with.

In sealed packets, price 2s. per pint.

# Carters' Champion Scarlet Runner.

—A great improvement upon the old Searlet Runner, and very popular in many well-regulated gardens... per pint, 1/6; per quart 2 6

The true variety should be obtained direct from us.

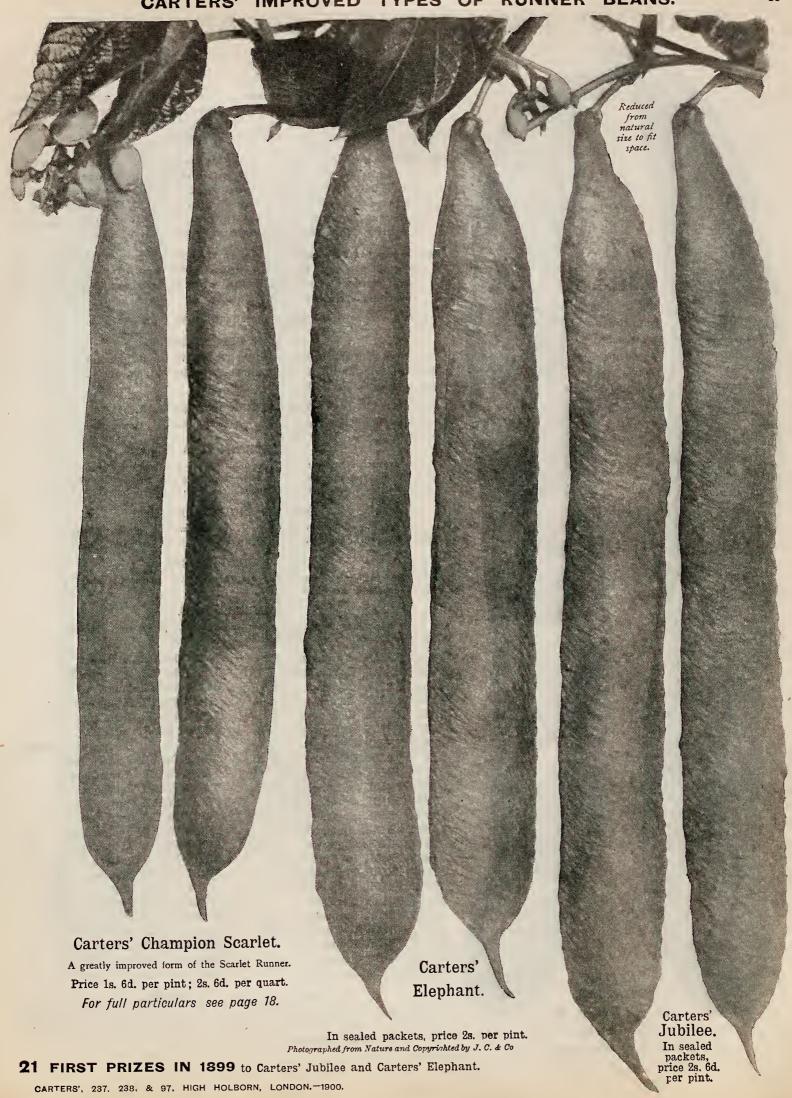

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900.

### Carters' Elephant Runner. (See Illustration, page 19.)

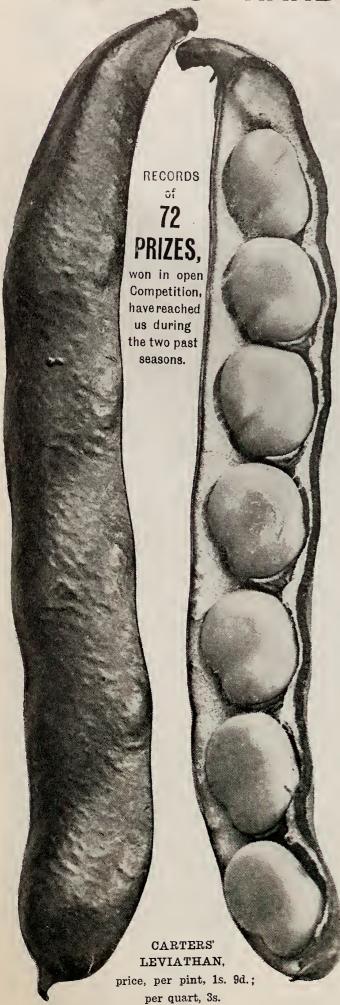

In sealed packets, 2s. per pint packet.

"Many of the runner Beans are too large and eoarse, and find little favour in the kitchen, but though the above variety is long in the pod, it is neither thick, stringy, nor ill-shaped. As an exhibition sort it should take high rank."—The Garden.

# CARTERS' HAND-PICKED BROAD BEANS.

Carters' Leviathan.

We offer a carefully re-selected stock of this the longest podded and finest Broad Bean in cultivation, producing enormous pods, measuring 13 to 21 inches in length; most prolific, and specially recommended for exhibition.

Carters' Leviathan has been awarded the most Important Prizes in all the Great Competitions, and is almost invariably the variety of Broad Beans staged in Prize Collections of Vegetables, notably at the Exhibitions of the Royal Horticultural Society, and at Manchester, Edinburgh, Glasgow, Reading, and other Important Provincial Shows.

Since the introduction by us of this fine Bean, many so-called longer podded varieties have been brought forward, but none have proved superior, and it stands to-day as the greatest acquisition in its class.

In sealed packets, per pint, 1s. 9d.; per quart, 3s.

#### BEST IN SIX PARISHES.

"I was very successful at our District Show, which includes six parishes. Carters' Leviathan Bean was a surprise to the Judges, who had never seen such Beans,"-J. A. LONGTON.

#### PODS SIXTEEN INCHES LONG.

"Carters' Leviathan Broad Bean is the finest I ever saw grown. I had some myself 16 inches long."-E. H.

#### EIGHT BEANS IN A POD.

"I have grown Carters' Leviathan Bean two seasons and think it is a grand Bean. I have had a splendid crop this year, plenty of pods containing eight Beans, which were pronounced at table to be of delicious flavour, and admired by all who have seen them."-W. E.

#### BEST IN EIGHT PARISHES.

"It may interest you to know that at the Bawdsey and District Show (open to eight Parishes, and held at Hollesley) I took First Prize with Carters' Leviathan Beans."-J. C.

#### TWO FIRST PRIZES.

"I have taken two or three First Prizes with your well-known 'Leviathan' Broad Bean at the Cannington Flower Show."-H. C.

#### IMMENSE PODS.

"We did well with your Leviathan Broad Beans. They were wonderfully prolific, producing immense pods which were admired by many people."-F. H. H.

IMPORTANT NOTICE.

The unparalleled success of this Bean upon the Exhibition Table has led to inferior sorts being offered as Carters' Leviathan. None are genuine, as sent out by us, unless in our sealed packages.

# CARTERS' HAND-PICKED BROAD BEANS.

The Cultivation of Broad Beans.—Early Mazagan and Dwarf Fan Beans should be planted in November, and a second sowing made in February, the rows being about 15 inches apart; to be followed by the Long-podded and Windsor varieties to secure a succession. The later sorts should be about 6 inches from plant to plant, and 3 feet from row to row. This crop succeeds best on rich soil in an exposed position. On light and dry soils it generally gets attacked by the black blight and spoils. When the points suffer from this pest it becomes imperative to cut them off and burn them. (See Carters' Practical Gardener, price 15.; post

CARTERS' HOLBORN EXHIBITION.

In sealed packets, price 1s. each; 1s. 9d. per ounce.

# Carters' Holborn Exhibition.—(See Illustration.)

A very fine strain, the result of many years careful selection. Its points for size, colour, and productiveness are good all round, and it is a special favourite with many of our best-known market growers. In the Gold Medal Collection of Vegetables, Potatoes, &c., Carters' Holborn Exhibition Brussels Sprouts were prominently staged and generally admired for their close texture and colour.

In sealed packets, price 1s. each; 1s. 9d. per ounce.

#### ADVANTAGE OF GROWING THE BEST.

Important Testimonial from one of the largest Market Growers in Essex.

"December 30th.

"I enclose cheque for £50. The few pounds of Holborn Exhibition Brussels Sprouts have proved every word you have said about them, they are large, solid, and a splendid colour. I have seven acres, and have been picking this last ten weeks and shall keep on right up to March next; the Sprouts average about 800 pecks per acre. I am well pleased with them, for they are the best I ever grew."— E. J. S.

"I am pleased to tell you that I have grown your Exhibition Brussels Sprouts this last two years, and they are the best grown in the neighbourhood for miles around."—S. V.

"Please send another ounce of your fine Sprouts; I think they are called *Exhibition*. They were certainly the best I have ever grown."—D. McD.

"Carters' Holborn Exhibition Brussels Sprouts stand 2 ft. 6 in. high, and are covered with buttons from top to bottom. I have never seen any to equal them."—J. C.

Special Prices given to Hotels, Public Institutions, and other buyers in large quantities.

#### FROM A CUSTOMER IN WALES.

"I was awarded in the open classes at our Show, available for six miles around, 14 first prizes, seven seconds, and one third. I have been accused of having a strong man at my back supplying mc with produce, so this year I opened my garden for public inspection. Several came, and I convinced them that it was not a strong man but a strong firm, namely, James Carter & Co., who supplied me with good seeds."—B. P.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900.

#### FROM A CUSTOMER IN HAMPSHIRE.

"My exhibit at the National Amateur Gardeners' Association was awarded the maximum number of points, for which I got a Diploma of Merit. I also staged six Parsnips, 2 feet 9 inches in length, for which I obtained another certificate. My Record Onions (spring-sown) weighed 17 lbs.  $1\frac{1}{2}$  ozs. Your Red Elephant Carrots measured 2 feet  $3\frac{1}{2}$  inches. I think I have reason to feel proud of my exhibit, although your seeds being of such splendid quality were the chief factor of my success."—H. V. V.

# BORECOLE, OR KALE.

The Cultivation of Kale—Sow the seed in March for early Winter crop, and again in April for main Winter crop. Transplant as soon as ready into good soil, made firm and highly manured.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' WELSH KALE.

In sealed packets, price 1s. 6d. and 1s. each.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' DWARF EXTRA CURLED KALE.

In sealed packets, price 1s. 6d. and 1s. each.

# Carters' Welsh Kale. (See Illustration.)

Very Distinct and Superior, the leaves exquisitely fringed and curled to a degree hitherto unknown in this useful Winter Vegetable. The general appearance of the plant is most striking and pleasing. The rich glaucous green colour, the delicate fringe of the leaves, and the dainty flavour when cooked, place this novelty in the front rank.

"Carters' Welsh Kale is delicious, and it looks so well when cooked."-G. B.

In sealed packets, 1s. 6d. and 1s.

# Carters' Purple Plume Kale.

Leaves of a rich purple, very handsome; a useful vegetable as a winter dish or for garnishing.

In sealed packets, 1s. 6d. and 1s.

### Carters' Dwarf Extra Curled Kale.

(See Illustration.)

This is a Re-selected form of the Curly Kale so popular in the North. It will resist the most intense frost, and makes a delicious winter dish.

In sealed packets, 1s. 6d. and 1s.

### Carters' Phœnix Kale.

Introduced to general notice by us for an important firm in the North. It is a valuable addition to the mid-winter group of garden vegetables, being most prolific, and the colder the weather the more delicate and tender are its sprouts.

PHENIX KALE.—"G. W. R." writes from Stockport: "I have some plants of Phenix Kale which have been supplying us with greens since April. The plants are hig bushes now, although they have been cut down several times. It is a good, useful vegetable, and should be grown by all who have a garden."—Amateur Gardening.

In sealed packets, 1s. 6d. and 1s.

# Carters' Improved Garnishing.

This is not only a valuable Winter vegetable, but also produces a variety of distinct and beautiful shades of colour in its various tinted leaves that are useful for many decorative purposes.

"The Variegated Garnishing Kale I had of you last season has turned out truly beautiful. I have grown it well in good loamy soil, and the different colours are very handsome. Many people have enquired where I obtained it, and its use. Its eating quality also is splendid."—Mr. W. Knight, Isleworth.

In sealed packets, 1s. 6d. and 1s.

### Carters' Thousand-headed (Re-selected).

This garden selection withstands the most severe frost. It is remarkably tender when cooked after a hard frost.

Per ounce, 4d.

# ROUND OR GLOBE BEETROOT.

Carters' Crimson Ball Beet.

Round Beets are of the greatest value on account of earliness. The roots can be lifted during the height of the summer season, when salads are in great demand; and the fresh taste

imparted by the highlycoloured slices are far preferable to the stored roots of the autumn-lifted varieties. The old-fashioned flat types

were never in favour with cooks because of their weak colour and stringy texture. In Carters' Crimson Ball these defects have been remedied, and this acquisition will bear out the

Notes from "The Garden" in favour of our CRIMSON BALL BEET.

FORCING BEETROOT.—Many growers know the demand for salads in the spring is greater than at any other period of the year, and in May old Beetroots are growing out badly and have lost colour, often flavour also. Beet, when required early, is best sown in heat in pans of light soil, and when the rough or third leaf appears, it may be pricked off into pots or boxes, and when growth is active, transferred to a cold frame and planted out in April on a warm border and protected for a short time. Of course, earlier roots

may be obtained under glass. The seedlings, if pricked out into frames and given plenty of air in fine weather, soon turn in. For early May roots it is best to sow the first week in February. The turnip-rooted varieties are the most suitable. I have found Crimson Ball

turnip-rooted varieties are the most suitable. I have found Crimson Ball the best forcer, as it has a small top and is of a splendid colour.—G. W.

BEET CRIMSON BALL IN SUMMER.—The turnip-rooted Beets are useful for early supplies for summer salads, and so far I have found none superior to the Crimson Ball. This root is far superior to the Eclipse and Egyptian, as these latter are not always true to name. Few vegetables need more care in selection than Beetroot, and Crimson Ball with me comes very true, and, what is so important, it is a remarkably early sort. This year, owing to the weather, the roots are three weeks

later, but the plants are now making up for lost time and will be ready in a few days. I find this variety excellent for a light soil. The roots, though small, are perfect in shape and of a bright rich red colour, flesh firm, and of a fine flavour. Sown in the open early in April, the roots will be ready in twelve weeks from time of sowing, and in poor land anyone may with advantage use this variety for autumn supplies by making two or three sowings from April to September.—W.

new features of its class, as noted by a correspondent in the columns of "The Garden" recently, when he says:—

"A market grower in a large way of business took exception to the placing first of a collection that included some handsome globe-shaped Beets, as against collections that included tapering-rooted Beets, on the ground that the round-rooted ones would not even be looked at in the market. Just to test the matter from a table point of view, for the market custom had no reference to this

case, I, being one of the judges, cut roots of all the Beets shown, with the result that the one dish of round roots had by far the best colour and texture of flesh."

"Your Crimson Ball Beet is the best I have ever grown, both in colour and flavour."—E. E. W., Beech House.

"I should like to direct attention to Carters' Crimson Ball as an early Beet of great value. It turns in quickly, and the roots are bright in colour and delicate in flavour. Sown in April, the roots are fit for use at the end of June, and enable the cultivator to bridge over a season of scarcity."—W. C., in the Gardeners' Magazine.

In sealed packets, price 1s. per packet, 1s. 6d. per ounce.

WE WERE AWARDED A MEDAL BY THE ROYAL HORTICULTURAL SOCIETY FOR A

SUPERB COLLECTION OF BEETS FROM OUR TRIAL GROUNDS.

# BEET.—continued.

The Cultivation of Beet.—The round varieties required for early use should be sown under cover in February. The main crop should be sown the last week in April, on ground that has been well trenched and manured. Let the rows be about 18 inches apart, thin them to allow about 9 inches between the plants, and keep the soil well-stirred with the hoe during summer.

### Carters' Perfection.

The best long Beet in cultivation; medium size, rich crimson lake colour, and splendid flavour; foliage shining and dark. Pronounced by the Royal Horticultural Society to be "perfection."

In sealed packets, price 1s.; 1s. 6d. per ounce.

A Customer writes:—"Please send another packet of 'Carters' Perfection' Beet, which has won me nine first and three second prizes."

CARTERS' ORNAMENTAL FOLIAGED BEET.

# Ornamental Foliaged Beet.

A very interesting species for decoration of borders in the flower garden. The thick fleshy ribs are beautifully coloured either yellow, crimson, cream, or white, and the contrast with the metallic leafage is very effective.

Price 1s. 6d. and 1s. per packet.

### Croton-leaved.

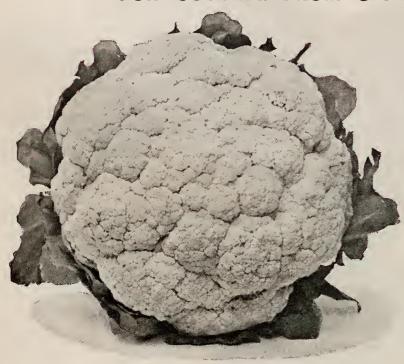

This is a decided acquisition to the group of decorative Beets, the long, narrow, crimson-bronze leaves having an elegant appearance. For the ribbon border, or as a pot plant for table decoration, it is effective. The roots are edible.

In sealed packets, 1s. 6d. per packet.

### BROCCOLI.

The Cultivation of Broccoli-For the carliest crop a sowing is requisite the beginning of March, and a little protection may be necessary for the seed-beds. Successional sowings should follow from March to June. Prick out into a prepared bed when strong enough, and when thoroughly established in summer transplan to permanent quarters, the earliest kinds first, to produce a constant supply of heads, according to the variety, until Cauliflowers are ready in July the following season. The soil should be well manured, and in good tilth and firm before transplanting. (See Carters' Practical Gardener, post free is. 3d.)

#### FOR CUTTING FROM SEPTEMBER TO DECEMBER.

Photographed from Nature and Copyrighted by J. C. & Co. CARTERS' SANDRINGHAM WINTER WHITE. In sealed packets, price 2s. 6d. each.

Carters' Autumn.—This is the earliest white close-headed variety we know of. Its fine heads will come into use after the Early Cauliflower and before the winter Broccoli is ready—will succeed where late Cauliflower fails.

In sealed packets, price 1s. 6d. each.

# Carters' Universal Protecting. (See Illustration.)

This is between a Broccoli and a Cauliflower, coming in after the latest Broccoli and before the earliest Autumn Cauliflower. It produces large heads, compact and pure white. Its leaves envelop the head very closely, similar to an Autumn Protecting Cauliflower, and keep it in a tender state until July. Even in the hottest summer it has withstood the natural tendency to throw out its seed-stalks, and we have found difficulty in harvesting the seed. It has also resisted the late cold winters when placed in the most exposed situation on our farms. No matter what the winter or what the summer is, this Broccoli will prove itself as the surest-heading late Broccoli yet offered, and a decided acquisition to growers.

In sealed packets, 2s. per packet.

Carters' Universal Protecting Broccoli.-" Late Broccoli being an important crop here, I give most of the reputed late varieties a thorough trial. Hitherto, Model, Late May, and Late Queen have proved amongst the latest up to the advent of the above, and after two years' experience of it I find it later than either, coming in when the others are getting old. It is of splendid quality and of good appearance, for the ample leafage envelops and protects the curd from the sun, so that in consequence it turns out beautifully white. It is a valuable acquisition."-J. R., in The Garden.

"I have sent a Broccoli, your Universal Late, which I trust you will receive safely, thinking you would like to see how they can be grown. It weighed just 18 lbs. when cut."-R. C., May 14th, 1898.

"Carters' Universal is the best looking out of ten varieties, including Late Queen. They will also be the latest."-W. R., Tiverton, May 6th.

The following miscellaneous varieties can also be supplied:—

# CARTERS' SELECTED CABBAGE.

### AWARDED SILVER MEDAL, ROYAL HORTICULTURAL SOCIETY.

The Cultivation of Cabbage, Colewort, etc.—By a little careful arrangement Cabbages can be had almost all the year round. An early variety sown in the Spring will come into use in the Summer; a main crop variety sown in the Spring will come in during late Summer or Autumn. Sowings made during July of an early kind will come into use during October and November, whilst sowings made towards the end of August will be fit for cutting in the Spring. Cabbages require a rich deeply dug and well-drained soil; when planted out from the seed-bed they should stand 15 to 30 inches apart, according to habit and growth of the variety.

Carters' Early Heartwell.—(See Illustration.) The finest early Cabbage in cultivation. Very distinct, indispensable both for the gentleman's garden and for market purposes. The heads are extremely firm, weighing from 4 to 6 lbs. Sown in Spring, it will be fit to cut during Summer; sown in August, it may be expected to be ready during April and May.

In sealed packets, price 1s. per packet, 1s. 6d. per ounce.

"I may state I have cut some splendid Cabbage of your 'Heartwell Marrow,' commencing the first week in May, some 5½ lbs., 4 lbs., 3 lbs., &c. Cabbages not leaves."—W. T. W.

Carters' Mammoth Beetheart.—(See Illustration.) The best main-crop Garden Cabbage in cultivation; very large firm heads of exquisite flavour, few outside leaves, and does not readily run. The largest Summer Cabbage grown, and invaluable both for table and exhibition.

"I had the best bed of Spring Cabbages on a field of eight acres let out in sixty-six plots. The variety were Carters' Mammoth Beefheart."—F. S., St. Mary Cray.

In sealed packets, price 1s. per packet, 1s. 6d. per ounce.

Carters' White Prizetaker.—Close short leaves and white heart; a heavy producer, and comes in early.

In sealed packets, 1s. per packet.

Carters' Early.—A good Cabbage. It possesses a robust constitution, and will be found useful in cold situations.

Price per packet, 1s.

Carters' Model.—(See Illustration.) This is a very distinct and early variety. It grows very close to the ground, heads firm and compact. The quality is exceedingly good, flavour delicate and marrow-like. As a Summer Cabbage it will also be found invaluable. In sealed packets, 1s. per packet 1 6

Photographed from Nature and Copyrighted by J. C. & Co. CARTERS' MINIATURE DRUMHEAD.

# CARTERS' SELECTED CABBAGE.

AWARDED SILVER MEDAL, ROYAL HORTICULTURAL SOCIETY.

Carters' Miniature Drumhead (See Illustration).

—A small, early, globular-shaped Garden Cabbage of delicate flavour and good colour. Although called Drumhead from its shape, it is quite distinct from the Field Cabbage; valuable for small gardens, where only one sort is grown. The plants may be set very close together.

Price 1s. per packet, 1s. 6d. per ounce.

Carters' Little Pixie.—In size somewhat resembling a cricket ball; the hearts are compact and very firm; it is invaluable where the space devoted to vegetable-growing is restricted. Re-selected quality. Price 8d. per ounce.

Carters' Red Pickling.—A greatly improved and hard-heading form of this popular Cabbage, selected for high colour and tender leaf. Undoubtedly the best pickler in cultivation.

Price 1s. per packet, 1s. 6d. per ounce.

Photographed from Nature and Copyrighted by J. C. & Co. HARDY GREEN COLEWORT.

### COLEWORT.

This small form of the Cabbage family is very useful in the Autumn. The plants can be grown much closer than ordinary cabbages, an advantage in gardens of limited extent.

# CARROT.

The Cultivation of Carrot.—For early forcing sow in January in frames, in February on warm border. Make successional and main crop sowings during March and April in deep well-conditioned soil to which manure has not been recently applied, cover the seed very lightly in ½-inch drills, and as soon as the plants are strong enough to handle, thin out from 4 to 8 inches. Further sowings may be made up to the end of June.

# Carters' Long Forcing.

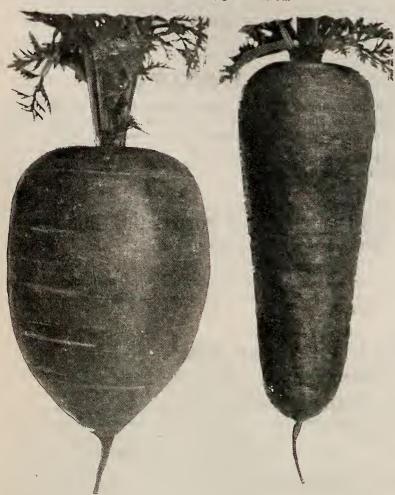

A handsome long Carrot, with the same depth of colour and firmness of texture in its earliest stages as other Carrots possess in their later growths.

The Garden says of Carters' Long Forcing Carrot: "When it becomes better known it will be in considerable demand, as it commands great earliness, fine quality, and a desirable shape. Most of the early Carrots are of the Searlet Horn type, but the above is more after the Intermediate class, and for that reason will be in favour on many gentlemen's tables. It grows as quickly as the earliest varieties, and is a decided aequisition to those gardeners who are expected to supply long tender roots about the size of a rat's tail for as long a season as possible."

Carters' Long Forcing Carrot.—"This forcing Carrot is one of the most distinct and valuable that we possess, and when better known it is sure to be extensively grown. It is the quickest variety that I know of, and makes but very little top, and the quality is excellent. As a Carrot coming into use early in the year, and for exhibition, it is an acquisition."—E. B., in Gardeners' Chronicle, July 16th, 1898.

"One of the best 1 have ever seen, being clean and straight. Where good early Carrots are required this is a great acquisition."—G. II. M.

In sealed packets, price 1s. 6d.

Carters' Red Elephant.

Photographed from Nature and Copyrighted by J. C. & Co

CARTERS' RED ELEPHANT CARROT.

At the time of going to press we have received records of Forty-nine Prizes having been awarded to our Customers in Open Competition during the past two seasons.

A veritable giant both in length and rotundity, so much so that we have only been able to find room for a photograph of the top portion of the root in this Catalogue. Specimens we have exhibited at our establishment measured two feet and a half in length (30 inches). It has been brought to this high standard of perfection by one of the best professional gardeners, and from whom we have acquired the whole stock. It is a remarkable variety, and one which will become prominent in all first-class gardens and on the exhibition table.

"Notwithstanding that I had to compete against professional gardeners all through the district, I have succeeded in gaining 20 prizes. I have never seen better specimens of the 'Red Elephant' Carrot; they were over 3 ins. diameter at top, tapered down straight, with a fine wip at bottom, altogether about 2 ft. 6 in. long."—B. I'., Abergavenny.

"My brother and I gained 12 first and as many second prizes with Carters' Red Elephant' Carrot last year."—J. H., Darlington.

In sealed packets, price 1s. 6d. per packet.

## CARROT.

WE HAVE RECORDS of 94 **PRIZES** awarded to these grand Carrots during the past two seasons in open competition. **CARTERS' CARTERS'** MUCH REDUCED IN SIZE. SUMMER SCARLET Photographed from Nature and Copyrighted by J. C. & Co. **FAVOURITE.** PERFECTION.

#### Awarded a Special Certificate of Merit at the Vegetable Conference of the Royal Horticultural Society.

As shown in the Photograph, we offer a distinct and greatly improved form of Garden Carrot. It is midway in length between the Long Surrey and the well-known Intermediate, with the bright vermilion-scarlet eolour of the Surrey. The flesh is solid, erisp, and fine flavoured. Invaluable alike for table, exhibition, and market purposes.

CARTERS' SCARLET PERFECTION CARROT.—As its name implies its colour is perfect, and this is not its only good quality, for its shape and flavour when cooked are first rate.—W. S., in "THE GARDEN."

"The Carrots which I produced from your Seed have taken no less than nine First Prizes; in fact, they have taken First wherever I have sent them. The variety was 'Searlet Perfection.'"—J. A. W.

In sealed packets, price 1s. 6d. per ounce.

### Awarded Royal Horticultural Society's Silver Medal.

A great acquisition, producing handsome, well-grown, bright eochineal-searlet Carrots, very early in the season. The photograph represents approximately its natural size, having been taken from a specimen grown in our experimental grounds. The quality is superb, and as an exhibition variety eoming into use early it will he found invaluable for showing in the summer months. This fine early Carrot is largely ground by the market described and assumed Sandy in Padfordships, the heart district in the grown by the market gardeners around Sandy in Bedfordshire, the best district in the

country for this vegetable.

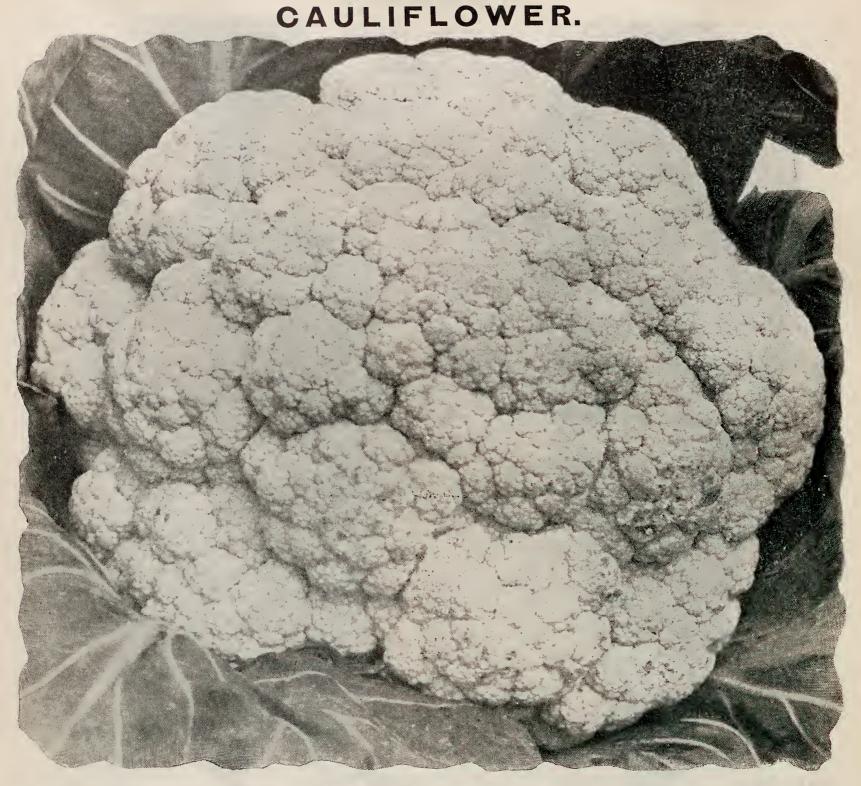

CARROT SUMMER FAVOURITE.—I had this superb variety on trial this season, and am very pleased with the quality and the way this root matures, as it is superior to the Short Horn, to which type it belongs, but is of a thicker build, without much top, and is a splendid summer variety in gardens where quality and quantity are needed. The colour of Summer Favourite is distinct from most others—bright cochineal-scarlet—with a very small core for the size of root, and few Carrots are more shapely. For exhibition purposes it will take a leading position on account or its size, shape and colour.—The Garden.

In scaled mackets price 1s. 6d. per ounce.

In sealed packets, price 1s. 6d. per ounce.

NATURAL SIZE.

Photographed from Nature and Copyrighted by J. C. & Co.

Photographed from Nature and Copyrighted by J. C. & Co.

# Carters' Extra Early Autumn Giant.

This magnificent Cauliflower-specimens of which, weighing upwards of 14 lbs. each, were exhibited by us at the National Chrysanthemum Society's Show recently-is more dwarf, considerably earlier, and in every respect better than the old Autumn Giant. It produces enormous snow-white heads, and at the present time is admitted to be the largest, the earliest of the giant forms, of such value during September and October, and the most reliable Cauliflower, either for market use or for the private Garder.

We have records of 46 PRIZES having been won by our Customers during the past two seasons in open competition.

"I gave your produce a rather good advertisement yesterday, being highly commended in several cases, apart from those mentioned. The collections of and received 27 prizes—19 firsts, 6 seconds, and 2 thirds. The collection of vegetables

vegetables were pronounced to be the finest ever staged at the show."—T. K. BROWHAM. | and the Crimson and White Celery were the best in the Show."—Miss W. BANBURY.

In sealed packets, price 2s. per packet.

### CAULIFLOWER.

The Cultivation of Cauliflower. - Sow in pans on a gentle heat in February and March, to be pricked out in April on a warm border. Sow in the open in April and May for succession, and again in August for Winter and Spring use under glass. (See Carters' Practical Gardener, price is., post free is. 3d.)

Photographed from Nature and Copyrighted by J. C. & Co. GREATLY REDUCED IN SIZE.

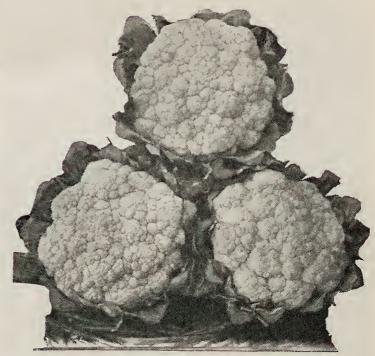

# Carters' Defiance Forcing.

A very useful variety for frame or pot culture. In perfection during the summer-a season when a scarcity exists in vegetables of this description.

A very distinct and valuable Cauliflower, much earlier than any other variety, producing beautiful white heads about the size of a cricket ball. Very dwarf and compact habit.

#### In sealed packets, 2s. per packet.

"MARKET GARDEN NOTES .- We planted three kinds side by side - these were Carters' Extra Early Defiance, Extra Early, and Early Snowball-and in all points of merit they stand as I have placed them here. Carters' variety came in first, and its heads were the most compact of the lot, as well as the largest."-The Garden.

Photographed from Nature and Copyrighted by J. C. & Co. GREATLY REDUCED IN SIZE.

# Carters' Mont Blanc.

Magnificent snow-white heads, well protected by the leaves; one of the best for soils of a heavy or retentive nature.

In sealed packets, 1s. 6d. per packet.

"CARTERS' MONT BLANC CAULIFLOWER. - This has the merit of being distinct The plants are strikingly compact in habit, and the heads are large. It is a summer sort, and those who grow half-a-dozen varieties of Cauliflower and do not include this may rest assured that they are without one good one at least. Some Cauliflowers only succeed in certain soils, but I have noticed that this one does well in all, and its good constitution and robust style of growth indicates it as a variety that will prove remunerative."-Journal of Horticulture.

"I grew some of the largest and handsomest Cauliflowers last season from your seed that I ever grew. I have grown them for a great many years, and have taken a large number of prizes."-W. S.

Carters' New Early Emperor. A very quick maturing Cauliflower for outdoor work. It produces immense heads of a beautiful white and compact texture very early in the Autumn, in advance of those now cultivated. It will be found to supersede existing varieties NOVELTY. in following closely the forcing and frame types.

In sealed packets, price 2s. 6d. per packet.

<sup>&</sup>quot;Out of 22 exhibits staged by me at our local Show I took 20 prizes, including 8 firsts, 6 seconds, and 6 thirds, and I must say the whole of the seeds supplied by you gave me the greatest satisfaction." - C. L.

<sup>&</sup>quot;The seeds you sent me last year were splendid. I took 14 prizes at our local Show out of 16 exhibits, which speaks for itself."—W. H. W.
"I have taken in three Shows, 13 firsts, 10 seconds, and 3 thirds, which speaks well for the excellency of Carters' Seeds."—W. M. W., Corris, R.S.O.

### CELERY.

The Cultivation of Celery.—Sow in February on a mild hot-bed for earliest crop, to be pricked out on bottom-heat when ready, and transferred to trenches in June. Sow in March for main, and in April for late crop. The trenches should be bottomed with rich soil, and the plants liberally watered; saline manure is beneficial.

Photographed from Nature and Copyrighted by J. C. & Co CARTERS' SOLID IVORY CELERY. In sealed packets, 1s. 6d. per packet.

Carters' Solid Ivory.—One of the most remarkable features of Carters' Solid Ivory Celery is its extreme dwarf compact habit, and beautiful white colour. It may be planted upon the surface of the ground instead of in trenches, and all that is necessary in the way of earthing up can be done in a very simple manner by the hand, or with an ordinary draw-hoe, a little care being taken to bring the stalks close together, and thus assist in its complete bleaching. If the heads are also tied with a little rough matting, the same as with some Cos Lettuces, it will assist not only in keeping the Celery perfect, but also to exclude superabundant moisture. As the name signifies, Carters' Solid Ivory Celery has been proved, after repeated trials, to be the most solid, crisp-eating, and delicious-flavoured variety in use—the peculiar filbert-nut taste being most marked.

We have records of no less than 34 PRIZES awarded this variety during the past two seasons in open competition.

In sealed packets, price 1s. 6d. per packet.

Carters' Incomparable Crimson.—A dwarf growing, rich-coloured Celery, very crisp eating, and of delicious flavour. In some important Celery trials at the Royal Horticultural Society's Gardens, a few years since Carters' Incomparable was pronounced to be the best Dwarf Red variety.

In sealed packets, price 1s. 6d. per packet.

The Standard-Bearer.—This is the finest type of the giant Red Celery that has come under our notice for many years. It is the result of a cross between a light red variety and Major Clarke's.

"At the Shrewsbury Show I was placed first in the open class for Celery, which was Carters' Standard-Bearer, beating 27 competitors."—H. T.

In sealed packets, price 1s. 6d. per packet.

# CRESS.

The Cultivation of Cress.—Sow Plain Cress once a week all the Summer in shallow boxes, filled up about three parts of the way with nice rich soil; when this is pressed down and watered, sow the seed an hour afterwards rather thickly over it, and merely press it into the soil. Cover with a double sheet of paper from 9 to 4 p.m. during the Summer, and sprinkle every evening. When the young seedlings reach an inch above the level of the top of the box they may be cut off with a sharp knife, and washed before being sent to table. American Cress should be sown the end of August to stand the Winter. Watercress may be successfully grown from seed, if sown in a shady border, and well watered. (See also Carters' Practical Gardener, price is., post free is. 3d.)

For full Particulars of MUSTARD and other SALAD PLANTS, see page 35.

CARTERS' MODEL ENDIVE In sealed packets, 1s. and 1s. 6d. per packet.

### ENDIVE.

The Cultivation of Endive.—Sow for early crops in middle of May, and for succession to beginning of August; transplant from the seed-bed into warm situations, and give protection to the late crops required for Spring use.

Carters' Model. (See Illustration.) - The most beautiful and perfect form of Curled Endive yet introduced; for salads it will be found particularly valuable. It is exceedingly ornamental, of a distinct colour, bleaches admirably, and is far superior in fineness of fimbriation to ordinary Curled Endives. In sealed packets, 1s. and 1s. 6d. per packet.

Carters' Oval Leaved.—The plain leaved Endives are preferred by some connoisseurs, and we recommend this fine sclection as of the highest type. Its leaves are delicate in texture, very tender, and palatable.

In sealed packets, price 1s. and 1s. 6d. per packet.

## KOHL RABI, or KNOL KHOL.

These highly-bred strains of Kohl Rabi represent a plant that is largely sed on some parts of the Continent as a vegetable. In this country, however, they have never seemed to take the public fancy, and yet they make a most delicious dish, and are of the greatest service in hot summers when turnips are hardly fit to eat. Throughout Austria and some other Eastern Countries, they are a standing dish, and their curious nutty flavour imparts a pleasant zest. The seed is sown in spring, and the edible portion—which is really a globular swelling in the stem just above the ground—is fit for use towards the end of summer.

We were awarded a Special First-Class Certificate at the Vegetable Conference of the Royal Horticultural Society for our select garden stocks of this plant, and these varieties were used as the representative types by a customer in his Gold Medal Collection of Vegetables, &c., at the Royal Horticultural Society's Meeting.

EARLIEST WHITE and PURPLE, each in sealed packets, price 1s. per packet.

"These Kohl Rabi are far better than Turnips, which are often stringy in the hot weather."-H. W.

## CARTERS' MODEL CUCUMBER.

INVALUABLE FOR TABLE OR EXHIBITION. In sealed packets, 2s. 6d. and 3s. 6d. per packet.

Photographed from Nature and Copyrighted by J. C. & Co.

# Carters' Model Cucumber, growing at our Forest Hill Nurseries, for Seed.

CARTERS' MODEL CUCUMBER is the handsomest Cucumber grown, embodying the fine form and general characteristics of Tender and True with the prolific habit and strong constitution of the Telegraph. Perfect in outline, with scarcely any neck, and of fine flavour, this variety has become popular, both for exhibition and table purposes.

Carters' Model Cucumber, price, in sealed packets, 2s. 6d. and 3s. 6d.

## FRAME CUCUMBER.

We conducted an important trial of Cucumbers quite recently and could not find anything superior in either shape or colour to the leading kinds we now offer.

The Cultivation of Frame Cucumber.—Sow in a pot or pan during March in heat for Summer use, keeping the seed-pan shaded from strong lights until the seedlings appear, then transplant to well-prepared hot-bed, or other position, when the plants are sufficiently established. Sow again in September for winter use. (See also Carters' Practical Gardener for full information on the culture of Cucumbers; price is., post free is. 3d.)

Carters' Royal Osborne Cucumber.—See Illustration and particulars on page 38.

THE NEW ALL THE YEAR ROUND CUCUMBER.

Carters' Earliest of All.—After conducting a careful trial of all the best known varieties of Cucumber, we have proved this to be by far the quickest finishing variety. It produced perfect fruit nine days in advance of all others. It is of good colour, handsome form, and fine quality on the table all the year round.

In sealed packets, 2s. 6d. per packet.

Carters' Cardiff Castle.—Awarded a Cultural Commendation by the Royal Horticultural Society. It has taken

First Prizes in all parts of the country, and is invaluable either for Summer or Winter work. The fruit is of a rich emerald colour,
perfect in form, growing to a length of about 18 inches. It is remarkably free-bearing, producing three to four fruits at a single joint.

It is wonderfully hardy, and not liable to disease. A Correspondent in The Garden describes it as the best Cucumber raised since

Telegraph.

In sealed packets, 2s. 6d. per packet.

Carters' Improved Telegraph.—(See Illustration.)—Unquestionably one of the most prolific and best Winter Cucumbers; indispensable for forcing.

"You cannot praise up your Telegraph Cucumber too highly. All that have seen it say they never saw better."-J. B.

In sealed packets, 1s. 6d. and 2s. 6d. per packet. Per packet. LOCKIE'S PERFECTION.—The result of a cross between Purley Park Hero and Verdant Green, and infinitely superior in quality to both. It is a remarkably productive variety, bearing fruits 15 inches in length, perfect models in shape, and of high quality. It has been awarded many First Class Certificates ... ... ... ... ... ... 1 0 1 6 TENDER AND TRUE-One of the best; symmetrical; scarcely any neck. It is perfect in form and of exquisite flavour. We have grown our seed from the original stock ... ... ... ROCHFORD'S MARKET.- Popular among market growers ... ... EPICUREAN.—Very free-setting, short-jointed, and prolific .. ••• BLUE GOWN .- Very uniform and fine fruit; black spine DUKE OF EDINBURGH .-- A large dark-fruited variety ... LORD KENYON'S FAVOURITE ... ... ... ... SION HOUSE.—An old favourite ... ... 1 6 PROGRESS.—Fine bold dark fruit ... .. ... ... ... CARTERS' CHAMPION .- An old favourite for winter use; very prolific ... SOOLY QUA, or CHINESE SNAKE.—A curious vegetable novelty ... ... ...

# OUTDOOR OR RIDGE CUCUMBER.

These Varieties are unsuited for Hot-house cultivation.

The Cultivation of Ridge Cucumber.—Sow under glass on gentle heat in April, and plant out early in Junc into a deep-manured bed or raised mound.

Per pkt.

CARTERS' BEST OF ALL HARDY RIDGE.—The largest, most prolific, and useful hardy outdoor

Cucumber. It grows to a length of 12 to 16 inches, very straight, and with few seeds ... ... ... ... ... ... ... ... ... 1 0

# ROYAL OSBORNE CUCUMBER.

A VALUABLE NEW CUCUMBER RAISED AT THE ROYAL GARDENS, OSBORNE.

CAN BE GROWN FOR TABLE ALL THE YEAR ROUND.

AWARDED FIRST PRIZE ROYAL CALEDONIAN HORTICULTURAL SOCIETY'S EXHIBITION, SEPTEMBER, 1899, BEATING SIXTEEN COMPETITORS.

Photographed from Nature and Copyrighted by J. C. & Co.

A VALUABLE CROSS BETWEEN THE ROCHFORD AND IMPROVED TELEGRAPH.

THIS HANDSOME CUCUMBER WAS RAISED BY MR. GEORGE NOBBS, HEAD GARDENER TO HER MAJESTY THE QUEEN, AT OSBORNE. It is a cross between the Rochford and an improved type of the well-known Telegraph. Embodying the very best points of both these popular varieties, we regard it as an important advance likely to be valued by the profession generally. It is a very quick and free grower, wonderfully prolific, and can be grown for table all the year round. The fruits are quite models in form, and carry a bright, dark, olive green coat, with a surface almost devoid of spines and flutings. It averages in length from 15 to 25 inches. In our opinion it is one of the best of the medium-sized table cucumbers raised in recent years, and is largely grown for the Royal Table. Our stock has again been grown for us by the raiser, but as it is a very shy seeder the supply is limited. Please read the important testimony below.

In sealed packets, price 2s. 6d. and 3s. 6d. each.

"I have been cutting some magnificent Cucumbers from the seed of Royal Osborne. This will in my opinion be one of the finest varieties for exhibition."

Mr. H. WALTERS, The Gardens, Eastwell Park.

"Carters' Royal Osborne Cucumber is one of the best I have ever grown."

Mr. W. OLIVER, Head Gardener to Lady Grant-Duff.

The Head Gardener at a Royal Establishment says:—"CUCUMBER ROYAL OSBORNE.—This variety, grown for the first time, is a handsome free-cropping sort, perfectly smooth and bright, and fresh in colour."—From The Garden, June 3, 1899.

"I like Carters' Royal Osborne Cucumber. It is a heavy cropper, and fine auality."

H. A. HITCHIN.

"CUCUMBER, ROYAL OSBORNE.—This new Cucumber, sent out this season, was raised in the Royal Gardens, Osborne, and is a magnificent variety. It is all that the raiser claims for it—large, handsome, and free fruiting. It is stated to be a cross between those excellent varieties the Rochford and Improved Telegraph. I have cut several fruit from twenty to twenty-four inches long, all perfect specimens, and of the finest flavour. The Royal Osborne will make one of the best Cucumbers for exhibition."

W. A. COOK, Compton Bassett, in the Gardeners' Magazine, June 3, 1899.

LEEK. The Cultivation of Leek .- Sow in February to April, and transplant into trenches of well-manured soil, say I foot in depth, and 20 inches between the plants. In warm weather liberal dressings of liquid manure will be of service, and the plants should be afterwards carefully earthed up to blanch the stems. For Exhibition, sow in January in boxes under glass, and transplant early into rich soil. Carters' Holborn Model. THE BEST BOTH FOR EXHIBITION AND TABLE. It is the largest variety we know of, the stems, as shown in the Illustration, are remarkably thick, of the clearest white colour, whilst the flavour is exceedingly delicate. Unquestionably the finest Leek in cultivation. "Carters' Holborn Model Leek is the finest grown about here. 44 It quite took the Staffordshire Leek growers down. I obtained 1st and 2nd prizes with it."-A. R. P. **PRIZES** "I took the First Prize with Carters' Leeks at the Whissendine Show, in and they were considered the best in the Show."-G. #### MUSHROOM SPAWN.

CARTERS' SPECIAL "MILLTRACK" BRAND.

AN OUTDOOR CROP. Photographed from Nature and Copyrighted by J. C. & Co.

## HOW TO GROW MUSHROOMS WITH LITTLE EXPENSE.

Preparation of Material.—This is the most essential point to be studied to ensure success. Procure fresh stable manure, which should consist of half droppings and half short litter; this must be thoroughly turned over every other day for about a fortnight. Manure obtained from unhealthy cattle, or from those that have been fed on green food or carrots, should not be used for this purpose.

For Making Outdoor Beds.—The material should be put into a heap, the measurement of which should be, when made up, 2 ft. 6 in. high, and 6 in. wide at the top, and to any length required, the whole to be firmly put together. After making the bed put stakes down the centre by which to gauge the heat, and cover all with long litter; after three or four days pull out the stakes, and when the temperature is at about 80° the bed is ready for spawning; break the bricks of spawn into pieces about the size of a hen's egg, and put into the bed about 8 inches apart; cover the whole with fresh fibrous loam, and beat it well, making the surface quite firm, lightly water and smooth the surface with the back of a spade, finally cover up with long litter and Russian mats to keep away light and excessive moisture.

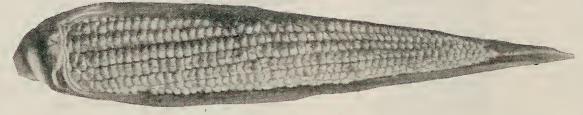

Mushrooms may also be grown in any shed or cellar where the temperature does not fall below 45°; the best site for a bed is a hard dry floor. A moderate size bed would measure 5 ft. 6 in. × 4 ft. 6 in. × 1 ft. When made up and well pressed down, in about six weeks Mushrooms should show, and the bed should then have a light watering with tepid water about every ten days, as success depends upon maintaining an even temperature.

Another and very easy mode of providing a supply of Mushrooms in the autumn and early winter months is to insert lumps of spawn, in August, in the beds that are devoted to Cucumbers and Melons. By that time the heat of the fermenting materials has declined to the proper temperature for the spawn to "run" freely; and just when the Cucumber, etc., are ready for removal, large quantities of Mushrooms are often seen breaking through the soil, and with protection in the form of hay coverings, the supply is continued for a long time. The spawn should be inserted rather deeply—four or five inches. It is not in every case that good crops follow this practice; but the trouble is so slight and the cost of spawn so trifling, whilst at the same time the results are often so satisfactory, that this simple plan is worthy of more general adoption.

#### CARTERS' IMPROVED SWEET CORN.

Photographed from Nature and Copyrighted by J. C. & Co.

The Sweet Corn is a favourite vegetable dish in Canada, and we are now able to offer an improved type, acclimatized and saved in this country. We had a very large demand for the Seed last Spring, and were gratified to see the Cobs on sale in Covent Garden Market during the summer.

Price 1s. per packet.

## COS LETTUCE.

The Cultivation of the Lettuce.—Sow in pans on a gentle heat in February, and prick out into a well-manured and warm border. Sow again during March in a protected situation out of doors for early use, and in succession to the end of August for the general and late crops. Young and tender plants may be grown in boxes or frames, and pulled and eaten when small; in this form they make a delicate salad. Water liberally in dry and warm weather.

# Photographed from Nature and Copyrighted by J. C. & Co. Carters' Giant White Cos.

This has long been admitted to be the largest, most delicious, and best Summer Cos Lettuce in cultivation; indispensable in every garden. No tying required; heads very solid and crisp eating; slow to seed.

In sealed packets, 1s. 6d. per packet, 2s. 6d. per oz.

"In summer Cos Carters' Giant White Mammoth is, as its name implies, a large and it may be said, an excellent Lettuce, and it is self-folding."—From an article on

#### Carters' New Endive - Leaved

Lettuce. This Lettuce is quite distinct. Its leaves are deeply serrated and laciniated, which gives it the appearance of Endive—indeed, a prominent gardener suggested that it might be used in early summer salads, and few could tell but that it was Endive. The leaves are very palatable and appetising. It also proves to be very drought resisting. See Illustration.

In sealed packets, price 1s. 6d. per packet

#### Carters' Longstander. \_A Distinct and

Valuable Variety.—From its peculiar habit of growth it is less liable to decay and damage than other cabbage varieties. The colour of the leaf is pale lemon-green; it is prettily fringed, and of most delicious flavour. We exhibited perfect specimens a few seasons back at the Royal Horticultural Society's monthly meeting in August, grown from seeds sown on April 5th.

In sealed packets, price 1s. 6d.; 2s. 6d. per ounce.

## Carters' Round-leaved.\_A hardy flat-

shaped variety that is certain to become popular. It can be sown at almost any season, and will produce an abundance of crisp and tender leaves.

In sealed packets, 1s. 6d.

#### Carters' Harbinger Forcing.

A valuable and distinct addition to the class of early salading Lettuces. For the Salad Bowl in a cut state there is none superior to Harbinger.

In sealed packets, price 1s. 6d.; 2s. 6d. per ounce.

"Lettuce Harbinger.—I have grown this variety for two seasons and am much pleased with it for early sowing. Those who have salads to supply in variety would do well to sow it several times during the summer on account of its crested leafage and sweet crisp hearts. Given plenty of room it attains a large size, and, though an early kind, does not run in a dry season so soon as some. I find it most valuable for sowing in cold frames early in February. The plants, if freely exposed in fine weather, are very good for spring supplies, the thinnings, if pricked out at the foot of a south wall, forming a good succession."—S. H. B., in *The Garden*.

#### A NEW MELON RAISED AT THE ROYAL GARDENS, WINDSOR.

Awarded the First Class Certificate of the Royal Horticultural Society. Pronounced by the Committee to be the very best flavoured white-fleshed Melon ever submitted. Also awarded a Gold Medal Royal Caledonian Horticultural Society, in association with other fruit exhibited by Her Majesty the Queen. Please read the important testimony given below.

PHOTOGRAPH OF THE CROP GROWING IN THE ROYAL GARDENS, WINDSOR.

Photographed at the Royal Gardens and Copyrighted by J. C. & Co.

# BRITISH QUEEN MELON.

It was our privilege to introduce last season an absolutely new variety of Melon, raised by Mr. Owen Thomas, Superintendent of the Royal Gardens, Windsor. This eminent eulturist has, by a fusion of the two well-known kinds, Hero of Loekinge (white flesh) and Royal Aseot (scarlet flesh), obtained this really grand ereamfleshed novelty. The result of the cross has seeured the exact points aimed at, and produced a beautiful type of exceptionally robust and healthy growth with leaves like leather. A free setter, a handsome globular fruit prettily laced, and of the best appearance on the table. The flesh has a decided ereamy tint and is most luseious, yet very deep and solid, and almost envelopes the sceds to the centre of the fruit, with the further advantage of ripening elose up to the rind.

In sealed packets, price 2s. 6d. and 3s. 6d. each.

A well-known authority writes as follows in "The Garden":—"Melon British Queen.—The exceedingly handsome flaxen-coloured and finely netted variety, having pure white flesh, received at the hands of the Fruit Committee the other day at the Drill Hall the unusual award of a First Class Certificate. White Flesh in Melons has, as a rule, given the poorest of flavour. This one gave flavour of so rich a description that the Committee regarded it as not only the very best flavoured white-fleshed Melon yet brought to the table, but one of the richest flavoured of any colour; hence the high award. No variety has shown more perfect form than has 'British Queen.' It is one of the Frogmore seedlings, and Mr. Thomas is to be congratulated on getting so delicious a variety."

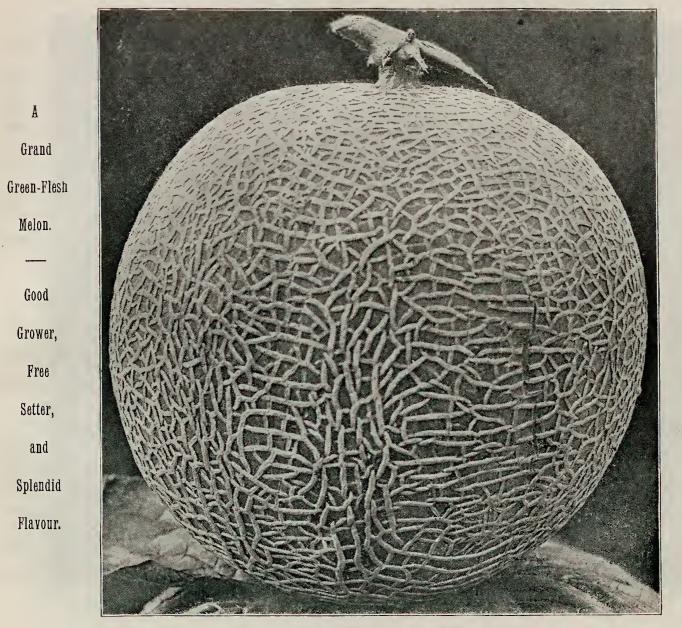

The Times, reporting the meeting of the Royal Horticultural Society, at which this grand Melon was awarded the First Class Certificate, says: "The Queen exhibited a new variety of Melon, grown by Her Majesty's Head Gardener, Mr. Owen Thomas, named the 'British Queen,' remarkable for its exquisite flavour and fine appearance."

#### AWARDED SILVER MEDAL, HANLEY, 1899.

- "I obtained a Silver Medal for your Melon 'British Queen' at the Hanley Show, on July 5th and 6th."—Mr. H. Walters, The Gardens, Eastwell Park.
  - "Carters' 'British Queen' is really a most beautiful Melon, and good flavour."-Mr. J. Whytock, Head Gardener to Earl Fitzwilliam.
- "Respecting the 'British Queen' Melon, I do not hesitate to say it is the best white flesh I have ever grown. A good fruit will weigh from three to four pounds; the shape is excellent, and is a beautiful golden colour."—T. S., St. Neots.

# GREEN-FLESH MELON. CARTERS' EARL'S FAVOURITE.

Awarded a First-class Certificate, Royal Horticultural Society.

more Juicy, Rich, and

A

Sweet Melon

could

scarcely

be

desired.

Photographed from Nature and Copyrighted by J. C. & Co.

#### Carters' Earl's Favourite Melon.

#### THE FINEST FLAVOURED GREEN-FLESH MELON IN CULTIVATION.

This remarkable green-flesh Melon was raised by Mr. H. W. Ward, late Head Gardener to the Earl of Radnor, from whom we acquired the whole

Carters' Earl's Favourite Melon is thus described by Mr. WARD :- "It is a strong grower, free setter, and may be said to be 'canker-resisting." It does quite as well in cool frames as in the houses.

Some finely-finished fruits were exhibited before the Fruit Committee of the Royal Horticultural Society at the Great Show held at Chiswick Gardens, and unanimously awarded the coveted distinction of a FIRST-CLASS CERTIFICATE, the highest honour that the Society can bestow.

Our Managing Partner, who was for many years a member of the Fruit Committee, R.H.S., and who has had 40 years' experience, pronounces the Earl's Favourite to be the finest green-flesh Melon he has ever tasted.

In sealed packets, price 2s. 6d. and 3s. 6d. each.

#### THE LEADING GARDENING JOURNALS GAVE THIS FINE MELON UNSTINTED PRAISE.

THE GARDENERS' CHRONICLE says:—"It is so seldom we meet with a first-class Melon that the Earl's Favourite deserves note." THE GARDENERS' MAGAZINE says:—"A more rich, juicy, and sweet Melon could scarcely be desired." THE GARDEN says:—"A valuable Melon . . . richly flavoured and above the average of new Melons."

"I have the very highest opinion of your Melon Earl's Favourite, having grown it for some years now, and all who see it admire it as a strong grower, free setter, and a beautifully netted large fruit. The flavour is of the very best."—Mr. J. WHYTOCK, Head Gardener to Earl Fitzwilliam.

"Melon—' Earl's Favourite'—Visitors to the great Fruit Show at the Crystal Palace will doubtless remember the splendid exhibit of fruits of this Melon. It was there I became enamoured with it, and procured seed of it last year. Some of the seed I gave to an eminent melon grower, who is also a raiser of no mean order. His testimony to Earl's Favourite is corroborative to mine, viz., 'the strongest grower, the freest setter, and, moreover, the best-flavoured Melon he has ever grown or tasted;' he is also of the opinion that it can be grown as large as one likes. I would advise all requiring a green-fleshed Melon to grow this variety, and they will not be disappointed, for it certainly cannot be improved upon in any way."—R.W., in the Gardeners' Magazine.

In sealed packets, price 2s. 6d. and 3s. 6d. each.

#### 46 THE VERY BEST VARIETY IS RLET-FLESH MELON, CARTERS ORANGE. BLENHEIM

The Cultivation of Melon.—Sow for first crop in January, and plant when ready into pits or on slabs filled with good maiden loam and well-rotted manure, adding a dressing of fine soil to the surface, and bringing the plants as near the light and glass as possible. It is essential that a regular temperature be secured rather than a high degree of heat. Give air freely when fruit is ripening, to develop flavour. (See also Carters' Practical Gardener, price 1s., post free 1s. 3d.)

**First** The Best Class Flavoured Certifi-Scarlet cate, Flesh Royal Melon. Horticultural Society. Raised by Mr. W. Crump, This Head Melon Gardener to has His Grace gained the Duke of more Marlborough, than at 100 First Blenheim. Prizes.

Photographed from Nature and Copyrighted by J. C. & Co.

#### Carters' Blenheim Orange Melon.

THE FINEST FLAVOURED SCARLET-FLESH MELON IN CULTIVATION.

We again offer the stock of New Seed, saved specially for us. This Melon is remarkably prolific, has a grand constitution, is a very fine setter, and may be described as a Perpetual Bearer, ripening in a short space of time. The fruit is superbly netted, and a special and distinctive feature

The Editor of The Garden was asked last spring for particulars of the best scarlet-fleshed Melon. The reply says:—"One gardener a few years since possessed a very fine stock of Blenheim Orange, so good in point of size, handsome form, and beautiful netting, that he was very rarely defeated in open competition, and his Melons were always a strong feature in a collection of ripe fruit. Fruits varying from 5 lbs. to 74 lbs., of the most symmetrical form, having great depth of flesh and most excellent flavour, won for themselves unstituted praise from all concerned. Blenheim Orange is what may now be considered an old Melon, but it is one that I have so high an opinion of that, were I confined to one sort, I should not hesitate to choose it in preference to all others—at any rate, from those sorts I have grown up to the present time." (This reply appeared February 19th, 1898.—J. C. & Co.)

"I have grown your Blenheim Orange Melon now for some years, and consider it one of the finest scarlet-fleshed Melons in existence, and merits all you claim for it. It is of splendid constitution, and if I were obliged to confine myself to one scarlet-fleshed variety, Blenheim Orange would be my selection."—J. J. C.

"I may say that out of several varieties of Melons grown here last season, we consider your 'Blossom Orange and 'Emerald Gem' the two best, being of good flavour, very fine in setting fruit, and short jointed."—W. F. W.

Carters' Holborn Favourite.—The raiser of this

splendid Melon is Mr. A. Pettigrew, of Cardiff Castle Gardens, who describes it as follows:—"Fruit of the largest size, roundish ovate; rind, lemon colour, heavily netted; flesh, greenish-white; flavour, sweet, melting, and juicy; habit of plant, strong and vigorous; a free setter and a great bearer. It is one of the handsomest and best-flavoured Melons in cultivation, and was greatly admired by all who have seen it growing here." We fully endorse the raiser's recom-

In sealed packets, 2s. 6d. per packet.

Carters' Green Gage.—A "perfect" green-flesh Melon; flavour delicious.

In sealed packets, 1s. 6d. and 2s. 6d. per packet.

# Carters' Amberwood Beauty.—A very handsome Melon, the result of a cross between Hero of Lockinge and Read's Scarlet Flesh. Mr. Garner, the raiser, says:—"It is a strong grower, free in setting its fruit, which swell to a good size without the aid of any manure; it is beautifully netted, and the best green-flesh Melon that can be grown."

In sealed packets, 2s. 6d. per packet.

#### Carters' Emerald Gem—Green Flesh.

The late Head Gardener at a Royal Establishment writes:—"It is the best green-flesh Melon I have ever grown, both for flavour and constitution. I have cut this season the third crop, weighing four to five pounds each. It wants no improving as a Melon, for, when well grown, you cannot beat it. It is a very black green till ripening, when it colours up like a pine or a ball of gold."

In sealed packets, 2s. 6d. per packet.

The following sorts can also be supplied :-

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900,

#### ONION.

The Cultivation of Onion.—The ground cannot well be too rich for this crop, nor the soil in too fine a condition. February and March are the chief seasons for sowing. The soil must be made firm before the operation is undertaken in either beds or drills.

12 inches apart, and the young onions thinned out to about 6 inches apart according to the variety. In very dry weather a good watering is very beneficial. Growers of Onions for exhibition generally transplant, and this is also a sure means of cheeking the onion grub so troublesome in some districts. Some of the larger growing varieties are generally sown in Autumn and transplanted in Spring; when under fair conditions enormous exhibition specimens are obtained.

Carters' Record Onion increases in favour each season, and is likely to become exceedingly popular. It can be sown either in the Autumn or Spring; but if large Bulbs are desired, Autumn sowing is recommended. It will be remembered that a specimen, illustrated in the "Gardening World," turned the scale at 41 lbs.; this was probably the heaviest Onion ever grown.

"Onion Record.—This is one of the most telling of the newer kinds, owing to its fine shape and bright skin. It was one of the varieties which figured so prominently at the large vegetable show of the National Chrysanthemum Society last November, and it was also shown in the leading eollections, making a strong dish in most cases. It is equally good grown in the ordinary way. I have excellent bulbs without special culture of any kind, and at the date I write, the second week in March, the bulbs are solid and good. I am not a lover of the large bulbs grown for show, but I value this for its good keeping and well doing in a poor soil."—G. W., in *The Garden*. "I have grown Carters' 'Record' Onion for three years, and during that time have shown it five times and have taken five First Prizes."—S. W.
''The 'Record' Onion grown from seed supplied by you were the admiration of all who saw them, many weighing 3½ lbs."—G.

"Carters' 'Record' Onions came out victorious out of 17 entries, 12 bulbs which were required in the class filling a large tray, and weighing nearly 28 lbs."

—M. H., Nenagh.

"Carters' 'Record' Onion was sown in February, and on the 11th of August they turned the scale at 1½ lbs., and were 16 and 17 inches in circumference. I am pleased to say I took First Prize at our local Show."—C. B.

"In the Spring I had a packet of Carters' Record' Onion and made a bed of three rows of it beside three rows of another Onion. The 'Record' has passed everything during all this hot dry weather—only rain twice in two months. It stands splendid; nothing to equal it in secres of Onion bcds on a ten-acre allotment field. It is the admiration of all."—R. K.

In sealed packets, price 2s. per packet.

## ONIONS FOR SPRING SOWING.

Carters' Holborn Onion is equally valuable for exhibition and for table purposes. Perfect in shape, it grows to a large size, and is distinct in colour of skin from other Globe varieties. It is a capital keeper, and the delicate flavour nearly approaches that of the imported Spanish Onions sold by Grocers and Fruitcrers. May also be sown in the Autumn. See Illustration opposite

In sealed packets, 1s. 6d. per packet.

"Carters' 'Holborn' Onion is a perfect model. I have grown dozens of them weighing 2 lbs. and upwards, and they are much admired."—H. S.

Carters' Tennis Ball.—This magnificent Onion is specially adapted for early sowing; the flavour is mild and delicate, and as an Exhibition variety in Summer it is invaluable. See Illustration opposite.

In sealed packets, 1s. 6d. per packet.

Carters' Pearl Pickler.—This is the genuine miniature Onion that is preserved in white vinegar, and found on the tables at the leading

In sealed packets, 1s. 6d. per packet.

Carters' Long Keeper.—Will remain sound the year round if properly kept.

In sealed packets, price 1s. 6d. per packet.

Ailsa Craig.—Carters' Re-selected Strain. See Illustration opposite. We offer a very fine strain of this popular Onion, which, on account of its distinct shape, is in great demand amongst exhibitors of vegetables. It is a good keeper, and to those who like an Onion raw, we recommend it on account of its acceptable pungent flavour. Suitable for autumn or spring sowing.

In sealed packets, price 2s. 6d. per packet.

Per oz. -s. d.

Carters' Giant White Tripoli.—Especially suitable for culinary purposes and exhibition, on account of its beautiful silvery-white skin and mild and agreeable flavour, a rather tender onion on heavy soils; ripens very early ... ... 1s. per packet 1 6

Carters' Silver Ball. See Illustration opposite. A pretty, medium-sized white Onion of fine texture and mild flavour. It makes a nice contrast on the exhibition table.

In sealed packets, price 1s. 6d. per packet.

Carters' White Spanish.—A Re-selected Stock. A perfect form of the Banbury type. It grows to a great size, is very even, and of good flavour ... ... ... ... ... WHITE SPANISH. Ordinary ... #### ONIONS FOR AUTUMN SOWING.

These varieties, if sown in Spring, will also produce a good crop, but the Onions will not be so large as if sown in the Autumn and transplanted.

Illustration, page 47.

In sealed packets, price 2s. each.

Carters' White Emperor.—Unquestionably the finest form of flat Onion in cultivation, with silvery-white skin and flesh of a most agreeable mild flavour. It reaches a larger size than any of the flat white varieties, sometimes measuring twenty inches in circumference.

In sealed packets, 1s. 6d. per packet.

"I am pleased to inform you of my success in obtaining a prize with your White Emperor Onion. They grew to an enormous size and weight, and considering the dry season and poorness of our soil, we were extremely pleased with them."—J. Y.

Carters' Golden Globe Tripoli.—A large variety, similar in size to the Giant Rocca; it stands our uncertain climate quite as well as the English types, and the flavour is excellent. The skin is of a transparent golden-straw colour, and it will be found invaluable in Exhibition collections. Suitable both for Autumn and Spring sowing.

In sealed packets, 1s. 6d. per packet.

Carters' Autumn Giant.—A very large white-skinned Onion, specially selected for exhibition purposes.

In sealed packets, price 1s. 6d. per packet.

Carters' Record. The Champion Exhibition Onion. See Giant Rocca. The original variety ... ... ... ... 10

"At the Royal Show, held at Leieester, I purchased from your stand a packet of your Giant Rocca Onion of Naples. I must say that I believe every seed germinated, and now I have the best bed of Onions in the neighbourhood."—J. B.

"I have pleasure in sending half-a-dozen onions with which I took First Prize at our local show. They were admired by everybody as the best seen anywhere this year."—F. B.

Giant Blood-Red Rocca of Naples.

—The hardiest and best; grows to a large size; mild flavour ...

The following varieties can also be supplied, per ounce :-Danvers' Yellow ... ... Lisbon ... ... White Portugal ... ... Globe Tripoli ... ... ... Trebons ... ... ... ... ... Red Mammoth Tripoli... Large Red Italian ... Silver-Skin ... ... 0 Giant Lemon Rocca ... Giant Madeira ... Early .White Naples.—Very early ... ... ... Large Red Genoa.—Of extraordinary quick growth ... ... ... #### PUMPKIN.

King of the Mammoths.—A giant form of Mammoth Pumpkin ... ... ... ... ... Price 1s. per packet

# CARTERS' SELECT ONIONS.

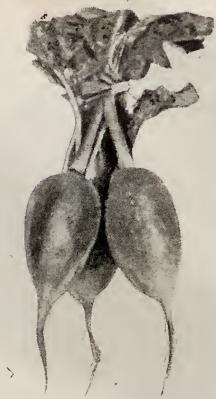

Photographed from Nature and Copyrighted by J. C. & Co. CARTERS' HOLBORN ONION.-For full particulars see opposite page. In sealed packets, price 1s. 6d. each.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' SELECTED AILSA CRAIG. In sealed packets, price 2s. 6d. each.

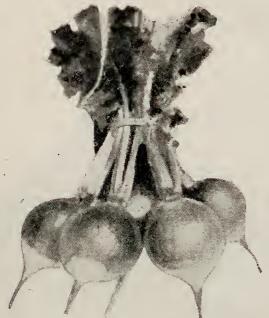

# RADISH.-THE BEST FRAME, FORCING, AND EARLY RADISHES.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Express Radish.—Quite distinct in form and colour, being very much brighter than Wood's Frame or Long Searlet. It is a cross between the former and Searlet Olive. In appearance it is altogether better, and the crispness and flavour put it a long way ahead of any other variety. It will prove to be a great acquisition for cartiest market work.

In sealed packets, price 3s. 6d. per pint, 8d. per ounce.

Photographed from Nature and Copyrighted by J. C. & Co

#### Carters' Round White **Tipped** Radish (EARLIEST).

CARTERS' SMALL-LEAVED RADISH.—"This fully bears out its name, and is the best Radish I have tried for pit or frame culture. After planting early Potatoes in pits at the end of January I always make a point of sowing Radishes midway between the rows and a small-leaved type of compact habit that is not very large in bulb, or runs a lot to foliage with the shade given by the overhanging Potatoe haulm is a decided acquisition. It is a very true stock, and deep red in colour."—E.B.C., in *The Garden*, April 29, 1899.

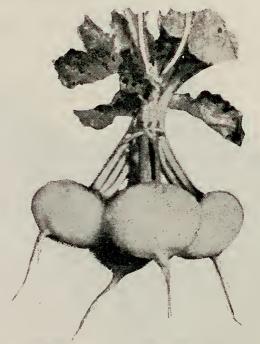

In sealed packets, price is each.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Delicatesse.—The latest type of the well-known French Breakfast Radísh introduced by our House many years ago. We gave it this name on account of the great favour in which it has always been held as an appetising salad upon the breakfast table in France. It is not only an attractive dish, but its crisp flesh and nutty flavour gives our new selection a distinct advantage. Suitable for forcing.

In sealed packets, price 3s. 6d. per pint, 8d per ounce.

Photographed from Nature and Copyrighted by J. C. & Co

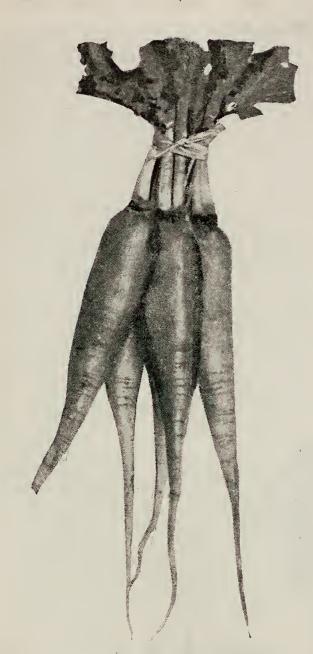

## Carters' Round White Radish (EARLIEST).

These are the quiekest growing forms of round Radishes, clean in growth, with short tops, and make very pretty dishes on the table when forced early in the season, but they can also be grown in successional crops all through the Spring and Summer. The flesh is crisp and sweet eating.

Each, price 3s. 6d. per pint, 8d. per ounce.

WHITE OLIVE SHAPED.—Fine		
MIXED OLIVE SHAPED		

#### WINTER VARIETIES.

TURNIP-SHAPED CHINA.—A scarlet variety of the China Rose Winter Radish. It may be sown at intervals from Spring until Autumn, and the roots obtained from late sowings can be kept in store for winter consumption. The root is round, of a fine scarlet colour, 2½ to 3 inches in diameter; flesh pure white, of an agreeable and mild flavour.

Price, in sealed packets, 1s. per packet-

The Cultivation of Radish.—Sow on a moderate hot-bed in January, February, and March; also every month during summer in well-prepared places in the open. A sowing in frame, or on a warm border in October, is desirable for winter use. Water early in the morning or in evening during hot weather.

# CARTERS' DUKE OF YORK TOMATO.

AWARDED THE FIRST-CLASS CERTIFICATE OF THE ROYAL HORTICULTURAL SOCIETY
AND FOUR SILVER MEDALS.

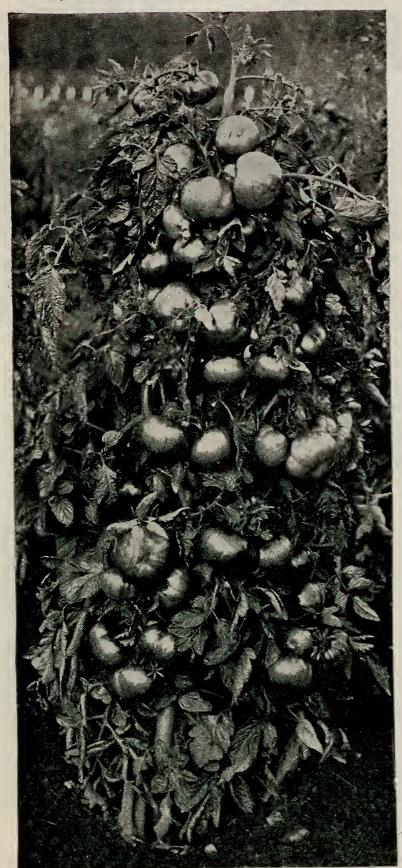

AVERAGE SIZE FRUIT.

In sealed packets, price 2s. 6d. and 3s. 6d. each. CARTERS', 237, 238. & 97, HIGH HOLBORN. LONDON.-1900.

## TOMATO.

Cultivation.—Sow seed in February and March, and transplant into pots to harden off, afterwards plant out against a south wall in good soil; or they may be planted in a warm border, and carefully staked to keep the plants and fruit from straggling on the earth. If cultivated in pots the treatment should be the same, with the addition that liberal waterings of manure and rain-water will be found necessary, especially during the hottest part of the summer. (See also Carters' Practical GARDENER, price Is.; post free, Is. 3d.)

Photographed from Nature and Copyrighted by J. C. & Co.

#### CARTERS' OUTDOOR TOMATO.

This variety readily fruits under the warmth of a south wall, or along the front of a greenhouse, in any situation where the full influence of the sun is felt.

In sealed packets, 2s. 6d. each.

trial in our Experimental Ground at Mortlake during the past summer of all the varieties of Tomatoes recommended in one direction and another, for culture, in the open air, and we found our own speciality a long way ahead of others in its suitability for this purpose It was not only the most robust in habit, but was the first to come into flower-the first to bear ripe fruit. The annexed photograph will give a good idea of its prolific character, together with the very fine appearance of the individual fruits.

Carters' Outdoor Tomato.—We made an important

"I planted 7,000 of Carters' Outdoor Tomato and found them sturdier, earlier, and more prolific than any others. Some plants bore over seventy marketable fruit."

H. F. JULIAN, Esq., Devon.

TOMATO, CARTERS' OUTDOOR .- "To those who are dependent on outdoorgrown Tomatoes for the bulk of their crop I can strongly recommend Carters' Outdoor, as being the earliest to ripen out of many now being tested. The season is advanced by at least a couple of weeks by its use."—J. C. T.,

OUTDOOR EARLY TOMATOES.—"On July 3rd I gathered a good dish of Tomatoes from plants put out on a south border, and trained up a stake just as we grow Dahlias. I have put out several well-known varietics, and all are doing well, but first and foremost are Carters' Outdoor, the earliest and best Tomato for growing outside I have ever seen."—W. A. C.

In sealed packets, price 2s. 6d. per packet.

Carters' Perfection.—Quite distinct from, and immeasurably superior to, any other variety named Perfection already in commerce. It is very handsome in form, somewhat resembling Dedham Favourite, but very distinct in colour, exceedingly prolitic, and of exquisite flavour.

In seal-d packets, price 2s. per packet.

Carters' Blenheim Orange.—We raised and introduced this extraordinary Tomato, a curious cross between the red and yellow. In colour the fruit may be described as like the setting sun—a happy combination of translucent scarlet and yellow. Gathered when quite ripe, they are luscious and juicy, and the nearest approach to the flavour of a plum. It contains but very few seeds, a point in its favour as a dessert fruit.

"I have grown Carters' Blenheim Orange Tomato for two years, and I consider it the most deliciously flavoured Tomato in cultivation. I have grown nearly every advertised variety. It is also very robust, and a fine setter."—J. E. T.

In sealed packets, price 2s. 6d. per packet.

Carters' Sandwich Island .- A most distinct variety, unique in form, colouring, and general character. As a Tomato for long journeys or rough handling it is unequalled, the skin being so remarkably firm that it may be packed with far greater ease and security than the general run of market Tomatoes.

In sealed packets, price 1s. 6d. per packet.

Carters' Dedham Favourite.—A well-known and deservedly popular variety.

In sealed packets, price 2s. per packet.

the market, being very early, of medium size, good shape and colour. It possesses remarkably free setting properties. First Prize Newbury, 1897.

In sealed packets, price 2s. per packet.

Carters' Greengage.—Introduced by us, and the first of the yellow section of any value. The rich golden-coloured, semi-transparent fruit so nearly represent Plums as to be frequently mistaken for the latter at the exhibitions. Awarded a First-Class Certificate by the Royal Horticultural Society.

In sealed packets, price 1s. 6d. per packet.

The following varieties of Tomatoes can also be supplied, price 6d. and 1s. per packet, according to sorts :-

Ham Green Favourite. Large Red. Chemin Rouge. Harefield Golden Gem. Trophy.

Challenge. Large Yellow. Vick's Criterion. Hathaway's Excelsior. Carters' Red Currant. Hackwood Park.

#### PARSNIP.

The Cultivation of Parsnip. - Sow the seed early in March as soon as the season will permit. The land should be well manured and deeply trenched; the drills about 15 inches apart, and the plants thinned out the same distance apart.

Carters' Maltese. (See Illustration above.) The hand-somest and best variety for exhibition or table .......... Per oz.-s. d.

I also lifted one the Per oz.—s. d. ELCOMB'S IMPROVED .- Fine flavour ...

PARSLEY.

The Cultivation of Parsley.—Sow the seeds thinly in beds any time from February until the end of May. In dry seasons it is an advantage to water the beds, as the seeds will sometimes lie a long while dormant.

Photographed from Nature and Copyrighted by J. C. & Co.

colour, this beautiful variety is pronounced on all sides to be not only the best for garnishing purposes, but also specially valuable as an ornamental-foliaged plant for table decoration and the flower border.

In sealed packets, 1s. per packet, 1s. 6d. per ounce. Carters'

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Perpetual.—A distinct and valuable variety that does not annually run to seed. It has stood with us upon the same land for four years before seeding. It is of the finest curled type.

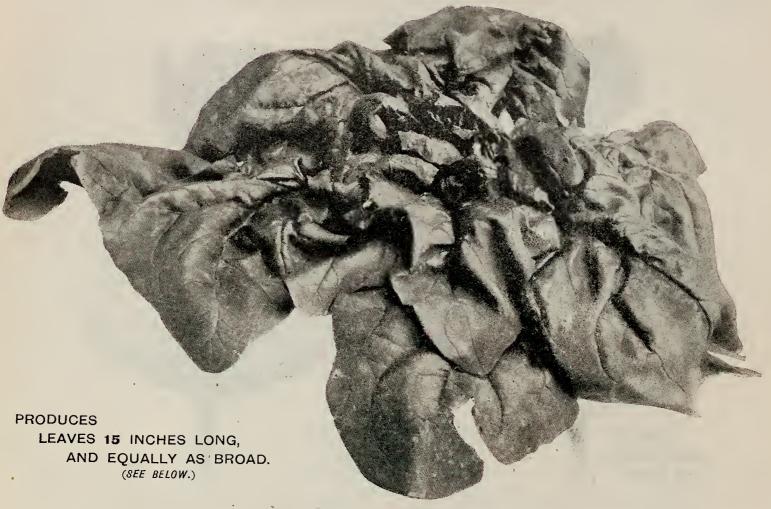

In sealed packets, 1s. per packet; 1s. 6d. per ounce.

#### SPINACH.

The Cultivation of Spinach.—Sow Round Spinach in succession from January to June, and Prickly or Winter Spinach the first week in August to stand the Winter Sow New Zealand Spinach in March in heat, and transplant about the end of May, setting the plants about 3 feet apart.

Photographed from Nature and Copyrighted by J. C. & Co.

The Carter Spinach.—This fine Spinach, originally discovered by one of our travellers on the Continent, was sent for trial to the Gardens of the Royal Horticultural Society, and was given an Award of Merit. Our photograph illustrates in a remarkable manner the solid substance of the leaves; and the whole plant, which is very fine in colour, is of far greater duration than ordinary Spinach.

#### IMPORTANT TESTIMONY,

"LARGE SPINACH.—Mr. E. Beckett sent to the recent meeting of the Fruit Committee leaves of a Spinach called 'The Carter' that measured 15 inches from base to point, and were 15 inches broad at the base."—The Garden.

"I am sending you a few leaves of your new Spinach, 'The Carter,' you kindly sent me. I have tried several varieties, but this is far and away the best. I sent some to the Royal Horticultural Society's Meeting, and was awarded a Cultural Commendation for it, a great point in its favour being it remained a long time before bolting to seed."—E. B.

"I had an ounce of your 'Carter' Spinach last year, and in future shall grow no other. From it I had 14 boilings, whilst from the ordinary 'Round' we usually get three."—I.

"THE CARTER SPINACH.—This variety stands out so prominent from others that I am pleased to refer to its good winter qualities and its superiority over older of the few which stood the test at Chiswick and received an award. I consider it quite distinct."—G. W., in The Garden.

"I was pleased to see Mr. Wythes' note on this fine Spinach, which deserves extended cultivation. I have proved it to be excellent both for winter and summer work. Victoria failed me as a winter variety, and never came away so strongly as 'The Carter.'"—J. C. T., in The Garden.

"I wish to bear testimony to the excellence of your new Spinach, 'The Carter.' It is a great advance on Summer Favourite and other good kinds, for, notwithstanding the very dry weather, I have been able to pick leaves nearly a foot long, and broad in proportion."—E. T.

"The best Spinach in cultivation, and quite distinct from all others."—A. P.

In sealed packets, price 2s, 6d. per pint; 6d. per ounce.

In sealed packets, price 2s. 6d. per pint; 6d. per ounce.

# SALSAFY AND SCORZONERA.

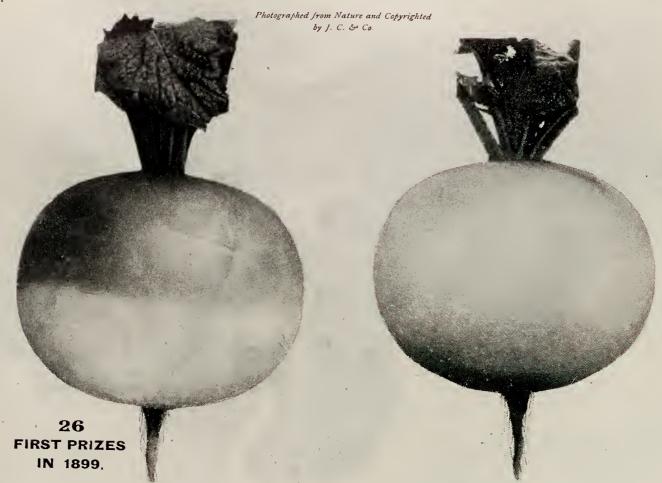

The Cultivation of Salsafy and Scorzonera. -Sow in drills, 15 inches apart, in April, on a deep rich soil, and thin out early to a distance of about 6 inches apart.

per oz. 1s. | SCORZONERA

#### TURNIPS FOR THE GARDEN.

The Cultivation of Turnip.—Sow Carters' Jersey Lily for early use the first week in March on a gentle hot-bed under glass, and later in a warm situation in the open border.

September. For main succession crops, sow every three weeks in the open ground until the beginning of July. For Winter use, sow early in August and again in

CARTERS' JERSEY LILY TURNIP.

Carters' Jersey Lily.—(See Illustration above.)—The most perfect in outline, and the best White Garden Turnip grown. In shape as round as an orange, of exquisite flavour, with single tap-root, and very distinct small top. The best White Turnip in the Royal Horticultural Society's trials, 1896.

In sealed packets, price 1s.

Carters' White Swan's Egg.—A very distinct and symmetrical Garden Turnip. It comes to the size of a lemon, is of rapid growth, the top remarkably fine, short, and very compact. The flesh is of fine texture, and the flavour particularly delicate and melting.

In sealed packets, 1s. per ounce.

"I am very pleased with Carters' White Swan's Egg Turnips. It is not only of first-class quality, but I pulled turnips over a fortnight before anyone near here, and what is far more to the purpose, nearly twice the size of any other sort I saw."—E. A. H.

Carters' Cardinal.—A flat early garden Turnip of fine quality, quite distinct in colour and shape from all other Turnips.

Price, in sealed packets, 1s.

"A very distinct variety, with a deep red skin; good quality; very early, and very nice appearance. One of the best I have ever grown on hot dry land."—G. W.

CARTERS' GOLDEN ROSE TURNIP.

Carters' Golden Rose. — (See Illustration.) — One of the hardiest and best Winter Turnips; flesh of a rich golden-yellow colour, with single tap-root; flavour most delicate and melting. Awarded a Special First Class Certificate at the Vegetable Conference of the Royal Horticultural Society.

In sealed packets, price 1s.

Carters' Purple Top Strapleaf.—A variety with plain strap-like leaves and flesh of fine texture, colour of top of root a rich reddish purple. A perfect model in form, and highly valuable for early use as well as for exhibition.

In sealed packets, 6d. per ounce; per pint, 2s. 6d.

Early Milan.—A very quick growing red top strapleaf variety, clean in growth, and very fine flavour. This is an exceptionally fine selected stock.

Price 8d. per ounce.

Carters' Crimson-Top Table Swede.—A choice stock of Swede Turnip of superb quality, and specially adapted for growing as a Winter table vegetable.

1s. 6d. per pint, 3d. per ounce.

# A NEW QUICK-GROWING TURNIP.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Early Forcing.—A new and distinct Turnip. It matures more rapidly and is fit for table quicker than any other variety we know of. Its shape, as shown in the photograph above, is a novel one, whilst the flesh is close, firm, and crisp. Unequalled for frame work. Mr. E. BECKETT, Head Gardener to the Right Hon. Lord Aldenham, who exhibited it before the Royal Horticultural Society last spring, writes: "I am more than pleased with your new Early Forcing Turnip. For pit and frame culture it will supply a long-felt want."

## VEGETABLE MARROW.

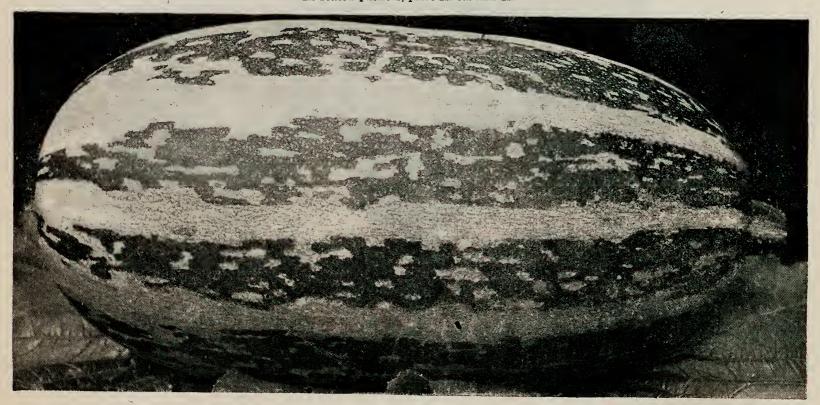

The Cultivation of Vegetable Marrow.—Sow in heat during April, and transplant into highly-manured bed when ready and all chances of frost are past; or sow under a hand-glass in May upon a richly-manured border.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' TRAILING WHITE,

Carters' Trailing White.—One of the quickest growing varieties we know of; the fruit will extend to a great length whilst retaining all the tenderness of small young Marrows.

In sealed packets, price 1s. 6d. and 1s.

Photographed from Nature and Copyrighted by J. C. & Co. CARTERS' LONG GREEN STRIPED.

Carters' Long Green Striped. A giant prolific variety, the very best for gardens that lie in a bleak and exposed position.

In sealed packets, price 1s. and 6d.

MUIR'S PROLIFIC.—A distinct variety, with small globular fruit, creamywhite in colour with thick flesh.

In sealed packets, price 1s.

PEN-Y-BYD (The best in the World).—A round fruiting Marrow—creamy-white in colour—very superior.

In sealed packets, price 1s.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900

## CARTERS' DISEASE-RESISTING SEED POTATOES.

Our Potatoes are carefully hand-sorted, and all misshapen and damaged tubers discarded.

Photographed from Nature and Copyrighted by J. C. & Co.

#### EARLY POTATOES.

Carters' First Crop. - See Illustration above. - A perfect type of forcing or frame Kidney Potatoe for a Gentleman's Garden. The haulm is compact, and the tubers come in remarkably quick. They are beautifully shaped, the flesh is of a pale canary colour; a nice cooker, and handsome on the table. Price, per peck of 14 lbs., 5s. Trial Box, 1s. 6d.

Carters' Lilywhite. - A white Kidney. Very like our First Crop in appearance, whilst the flesh is much whiter. Useful for garden culture on light and medium soils.

Price, per peck of 14 lbs., 5s. Trial Box, 1s. 6d.

Carters' Advancer. \_\_Pebble shaped, smooth skin, white flesh, medium haulm.—In the trials of the Royal Horticultural Society a few years since this variety was one of the very few that were selected as of fine appearance and good cropping qualities. It is a seedling raised in our trial grounds, and will be found a heavy producer on all good garden soils.

Price, per peck of 14 lbs., 4s. Trial Box, 1s. 3d.

Carters' Early Favourite. \_An oval-shaped, white fleshed, smooth skinned Potatoe, with a medium haulm. \_Yields heavily without waste. Very free from disease and a first-class cooker when grown on light and medium soils. A very useful Potatoe where space is limited, for it can be dug in an ordinary season during June. This variety is very popular with market growers.

Price, per peck of 14 lbs., 4s. Trial Box, 1s. 3d.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' SNOWBALL.—This fine eating Potatoe is considered to be the greatest advance in table potatoes for many years. It was raised by a Customer of ours, and under the name of Cockerill's Seedling received the highest honours at the Royal Horticultural Society's trials, when 67 sorts were tested. We gave it the name of "Snowball," a description that seems to well bear out its qualifications. The following is the Raiser's description:—"A cross between 'Schoolmaster' and 'The Canon,' almost round in shape, rough skin, white flesh, mid-season variety with a medium haulm, free from disease, and a very heavy cropper on all soils."

Price 5/- per peck of 14 lbs. Trial Box, 1/6. REPORTS FROM CUSTOMERS.

Reports upon the Potatoe Crops of 1899 are given in the Cardeners' Magazine; amongst them we cull the following regarding "Carters' Snowball":—
"I consider this one of the best.—Mr. A. PETTIGERY Cardiff Carle."

"I consider this one of the best.—Mr. A. Pettigrew, Cardiff Castle."
"Stood the dry weather better than any other.—Mr. J. Aplin, Hasfield Court."
"Handsome, good in quality, and an abundant cropper.

Mr. Coomber, The Hendre."
"First class. One of the best out of twenty.—Mr. H. C. Prinsep, Buxted Park."

A well-known potatoe grower says in the Gardeners' Magazine:—"Carters' Snowball is one of the best New Potatoes that has come under my notice for some years past."

A well-known authority on potatoes writes in *The Garden*, October 15th, 1898:—
"Of the round mid-season and late varieties the most productive was Snowball. The crop was such that those who saw it were much astonished. The produce was at the rate of 26 tons per acre."

#### CARTERS' MONARCH.

Carters' Monarch Potatoe is another of the very select few honoured with the highest credentials from the Royal Horticultural Society after critical trial both for cropping, shape, and cooking properties.

It was raised by Mr. W. J. Stokes, near Trowbridge, in a district famous for good potatoes, and is described by him as a cross between Sharpe's Victor and Schoolmaster, a parentage surely of sufficient merit to stamp it a first-class variety. In shape it varies somewhat, as we have found both round and oval-shaped tubers upon a single root.

It was exhibited at the great LIVERPOOL SHOW, and in a large competition easily secured the FIRST PRIZE as the best new second early round variety.

We offer a limited quantity. Price 5s. per peck of 14 lbs.; 1s. 6d. per trial box.

Special low Rates per Ton for Potatoes of all kinds for Field Planting.

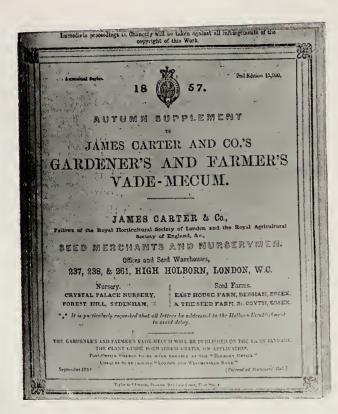

T is just about a century ago since our name became associated with the distribution of seeds. The earliest announcement of our House is to be found in the London Directory for 1804, situated at that period at the City end of Holborn, in close proximity to Gerard's celebrated garden, so often mentioned in old-time Horticultural works. At the commencement of the Queen's reign, James Carter had a very tiny shop at 238, High Holborn, where he earned a well-deserved reputation for scientific knowledge in all that pertained to seeds. About this time the leading industries of the country underwent a marvellous transformation, helped materially by developments which brought increased facilities of communication, and it was during this revolution in the conduct of business that the real foundation of our present Establishment was laid.

James Carter's literary ability stood him in great stead. His earliest catalogue took the form of a broadsheet, and a copy we possess is headed by an elaborate explanation of the Linnæan and Natural systems of botanical classification. We print a reduced facsimile of his catalogue cover for 1837. Mr. Carter guaranteed the quality of all he sold, a proceeding which, at that time, must have required much courage, for the means of cleaning, testing, and proving seeds, as we understand the methods now, were of a most primitive order. In the illustration of Mr. Carter's original shop at 238, High Holborn (overleaf), it will be observed that its oldfashioned window projected into the street, carrying only two shallow stories above it. In 1864 we found it necessary to rebuild the premises in High Holborn, to which was also added No. 237. It will be seen from our illustration that the new erection included a handsome shop with several floors above, and, although this building was arranged on a scale commensurate with the requirements of the time, we soon found it necessary to rent various blocks of warehouses near at hand. A steady increase in the business necessitated our purchasing in 1878 a large piece of ground close by, occupying about 5,000 square feet, and on this we put up the enormous structure of which an illustration is given. This huge building, six stories high, is devoted to the storing and despatching of seeds. Countless sacks of seeds are here stacked, and to anyone unacquainted with the trade their number would appear sufficient to supply the whole civilised world for a considerable period; yet the capacity of this warehouse did not suffice, for in 1887 the needs of the business compelled us to take over the enormous block of buildings at 97, High Holborn. It will be seen in the illustration what an imposing structure the Holborn entrance to this huge warehouse is. Its architectural features are discussed in all the best historical accounts of London. The system of our operations as conducted to-day will be gathered from the many photographs given of the various departments.

It is our privilege to hold Royal Warrants of Appointment as Seedsmen to Her Most Gracious Majesty the Queen and H.R.H. the Prince of Wales, together with other official Appointments to many Continental Courts. We are also regular suppliers of seeds to Her Majesty's Home and Colonial Governments.

# A HOUSE OF CALL IN LONDON.

N view of the number of calls with which we are favoured by Customers from all parts of the world, we have arranged to set aside a suite of rooms for their convenience, where they

RECEPTION ROOM NO. 1.

may either seek information about London or temporarily leave their belongings. These rooms have lavatories attached, and are supplied with the current gardening papers, railway time-tables, writing materials, etc.

We have for many years kept a register of Gardeners and Bailiffs seeking situations, and if any of our customers requiring these servants care to arrange meetings with them at our place, we shall

be pleased to do our best to make such an interview possible.

The rooms will be available to callers during the following hours:-

Monday to	FRI	DAY	•	•		10 to	4
Saturday						io to	I

An assistant will be in attendance, who will conduct our patrons (should they wish it) over our several premises, and he will be ready

to give any information about London to

those who may require it.

It is necessary we should receive an intimation two days previously of our Customers' intention to pay us a visit, to prevent difficulties that may arise from holidays and other circumstances beyond control.

We are also pleased to give information to Bailiffs or Gardeners of our Customers who may be visiting London.

RECEPTION ROOM NO. 2.

# PORT OFFICER BOMBAY.

# STOW COOL KEEP DRY

# A LETTER OF THANKS FROM H.M.'S INDIAN GOVERNMENT.

We had the honour to receive the commands of the Right Honourable Lord George Hamilton, P.C., M.P., Her Majesty's Secretary of State for India in Council, to supply

# TWO HUNDRED TONS OF VEGETABLE SEEDS

for growing in the districts of Northern India threatened with scarcity. The urgency of the order demanded delivery in Bombay by a certain date, and only nine days could be allowed for selecting, packing, and shipping. We have since received the following gratifying notice of His Lordship's appreciation of our services in the matter:—

[COPY.]

INDIA OFFICE, WHITEHALL, S.W.

Gentlemen,

17th November, 1896.

I am directed by the Secretary of State for India in Council to acknowledge the receipt of your letter of the 6th instant, forwarding invoices for the additional seeds shipped by you on account of the Government of India from London and Marseilles on the 6th instant.

Lord George Hamilton recognises with satisfaction the facilities and assistance you have received in organising these large and unaccustomed shipments from Her Britannic Majesty's Consul at Boulogne, the Customs Authorities at Folkestone, the Directors of the Peninsular and Oriental Company, and the Goods Managers of the South-Eastern and Great Eastern Railway Companies.

His Lordship also desires me to convey to you the expression of his appreciation of the promptitude and foresight shown by you in successfully carrying out so large a portion of the order of the Government of India, within the very limited time allowed for its execution.

Messrs. F. Carter & Co.,

I am Gentlemen, your obedient Servant,

High Holborn.

(Signed) A. GODLEY.

NOTICE.—Messrs. Carter despatch single packets of Seeds up to twelve ounces by letter post; packages up to eleven pounds by parcel post or carrier; larger orders up to two hundred tons or more by rail or steamer.

GENERAL VIEW, EASTBOURNE TENNIS COURTS.

CARTERS GRASS SEEDS ARE USED ON THESE COURTS.

# GRASS SEEDS.

# Lawns and Recreation Grounds.

Specially prepared for Suburban and Country Lawns, as supplied to H.M. the Queen at Windsor Castle and Buckingham Palace, H.R.H. the Prince of Wales at Sandringham, Royal Parks of London, Crystal Palace, &c., &c.

With or Without Clover.—Price 25s. per bushel of 25 lbs.; 3s. 3d. per gallon; 1s. 3d per lb.; 1s. per packet.

One lb. of seed will sow one rod of new ground (6 yards by 5), or 4 bushels will sow 1 acre of new ground; one fourth to one-half this quantity is sufficient for repairing a worn Lawn.

Our prescriptions are composed only of the greatest wear-resisting species of fine growth, and are specially prescribed to suit all soils.

# Tennis, Croquet, and Bowling Greens.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.

To form a new Tennis Lawn of the regulation size (78 feet by 36 feet), with a margin for running back, t bushel of seed is required.

For mending a worn ground, one-fourth to one-half this quantity of seed is desirable.

"Carters' Grass Seeds only have been used on All England Teanis Ground, Wimbledon, for the last eight years, and they have given every satisfaction."—(Signed) T. COLEMAN.

#### Cricket Grounds.

Price 25s, per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.

The seed may be sown on a new ground at the rate of 4 bushels per acre, as soon as we are in touch with spring—after the March winds have spent their force. Under the showers of April the young grass will grow with amazing rapidity, and with careful mowing and attention the ground should be fit for play in June or July. On a worn ground, where the grass is thin, the seeds may be sown during February or March, at the rate of 1 to 2 bushels per acre, and the pitch should be ready to play on as soon as the season opens.

#### USED AT LORD'S:

"Lord's Cricket Ground has been marvellously improved for many years by the use of Carters' fine Grass Seeds, as specially prepared, and I can strongly recommend its use to secretaries and others interested in the game. We use no other seeds but Carters'."—(Signed) T. A. HEARNE, Superintendent,

#### USED AT THE OVAL.

"Carters' Grass Seeds only have been used on the Surrey Cricket Ground, Kennington Oval, during the last seven years."

(Signed) C. W. ALCOCK, Secretary.

## Under Trees or in Shaded Places.

We are frequently asked for a prescription of Grass Seeds that will produce herbage likely to thrive in situations generally denuded of growth, such as under Trees or on Lawns that are in a confined place, and upon which the sun and air cannot exert their influences. It would be presumption on our part to lead our customers to believe that we can cover such spots with a close velvety turf such as exists in the more exposed portion of their Lawn. At the same time, there is no getting away from the fact that certain grasses will thrive in shaded situations, as witness the close under-growth in old copses, along green drives, and under established plantations, where is frequently to be found quite a verdant carpet; and it is these self-same species of grasses that we use in our prescriptions. The soil under over-shadowing trees is generally of the poorest description, the roots having taken all the nourishment out of it. Consequently, before sowing, it is necessary to loosen the surface and rake it smooth, sprinkle manure, then roll. Next scratch the surface lightly with a rake, sow the seed thickly, rake again in an opposite direction, then well roll down the whole. If dry weather prevails, a good soaking of water is essential, and more if the hot weather continues. Constant dripping from the branches is very detrimental to grass under the trees as it rots their fibrous roots, and the growth wilts away.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.; 1s. per packet.

#### Golf Links.

We have on our permanent staff a certificated botanist and expert in grasses who has already visited many of the leading golf links in the country. He is always able to give useful hints to those in charge of the greens, &c., as to the grasses that are likely to wear and thrive successfully, and the manures that will give the most beneficial results upon the soil of the locality. We charge his out-of-pocket expenses only, when sent to advise.

Carters Special Prescription of close-growing grasses for putting greens contains the finest-leaved grasses only, mixed in proportions to suit the particular soil upon which seeds are intended to be sown. It is an advantage in the preparation of the prescription if we can have a turf from the green for analysis. This enables us to send the same species that are natural to the locality. The putting green can then be renovated with grasses of the same texture and colour as already exist. It is very important that we should see either the green or a turf.

#### For Putting Greens.

Price 1s. 6d. per lb.; 4s. 0d. per gallon; 30s. per bushel of 25 lbs.

Tom Dunn, the Celebrated Professional Golf Player, says:—"I have used Carters' Grass Seeds for the last twenty years at Tooting Bec Golf Links, and on various other Golf Links, and can confidently recommend them. I have had sown at the Bournemouth Corporation Golf Links over 200 bushels, which have produced excellent results."

#### For Golf Courses.

Not quite so fine leaved as the putting green mixture.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.

From THE CHORLEY WOOD GOLF CLUB. - "Both the Grass Seeds and Manure gave most excellent results."

#### For Football Grounds.

Strong grasses to resist the wear and tear.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.

MR. R. LEESON, of the famous Aston Villa Club, writes:—"The Grass Seeds have come up very well, and just the right sort for a Football pitch."

CARTERS, 237, 238, & 97, HIGH HOLBORN, LONDON.-1899.

# MANURES FOR STIMULATING GRASS.

The following special prescriptions are based upon many years' experience, and are most useful for the purpose of imparting vigour, closeness, and colour.

# CARTERS LAWN MANURE. No. 1 Mixture.

FOR TOP DRESSING OR RAKING IN.

FOR GENERAL PURPOSES ON OLD AND NEW LAWNS.

As used on Carters' "Gold Medal" Lawn at the Paris Exhibition (beating thirteen other British and Foreign Competitors).

Directions for using Carters' Lawn Manure.—For putting down a New Lawn, it should be sown as soon as the ground is thoroughly prepared for the seed, and raked in, eare being taken to sow it as evenly as possible, as the appearance of the Lawn will be materially affected by this.

For Top Dressing, it should be sown immediately after cutting the grass, and, if possible, just before a shower of rain. If the weather is dry, water the Lawn after top dressing. This manure will be found very effective and lasting.

Price in Bags—14 lbs., 4/-; 1 ewt., 7/-; 1 ewt., 10/-; 1 ewt., 18/-; Tins, 1/-, 2/-, and 3/- each.

# CARTERS SPECIAL GRASS MANURE. No. 2 Mixture.

FOR TOP DRESSING ONLY.

FOR THICKENING CRICKET PITCHES, TEE PIECES, PUTTING GREENS, &c.,
AND CHECKING THE GROWTH OF WEEDS.

This Manure is recommended for top dressing only, and should be sown immediately after the grass has been moved, and, if possible, just before a shower of rain, but should the weather be very dry it is advisable to thoroughly water the ground after applying the Manure. Old and deep-rooted weeds should be cut out or destroyed, but all Seedling Weeds will rapidly deteriorate under the influence of this preparation. Apply at the rate of 2 ozs. to the square yard.

On poor soils we recommend an alternate dressing of our No. 1 and No. 2 Mixtures, or an Autumn or Early Spring dressing of the former; for putting down a New Lawn, we advise our No. 1 Mixture. This should be sown as soon as the ground is prepared and levelled for the seed, and raked in, eare being taken to sow it as evenly as possible, as the appearance of the Lawn will be materially affected by this.

Carters' Special Grass Manure discourages the growth of all weeds, stimulates and improves the growth of the grass, and produces a sward of a rich Emerald Green Colour.

The authorities at the Oval pronounce this Manure as the best dressing they have ever applied, and claim that the splendid condition of the ground during the past few seasons is due to its efficacy.

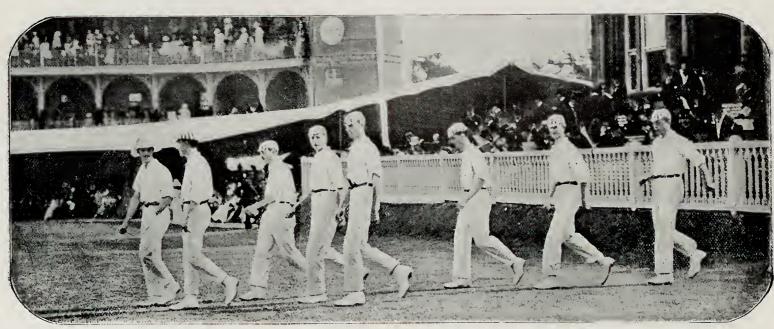

Price in Sealed Bags-14 lbs., 5/6; \(\frac{1}{4}\) ewt., 9/6; \(\frac{1}{2}\) ewt., 15/6; \(\text{r ewt., 25/-}\); Trial Boxes, 2/6.

# CARTERS FERTILISING FIBRE.

A combined covering and stimulating material for Newly Sown Grass and other Seeds. A perfect substitute for Earth, and being an absorbent more readily retains the necessary moisture for the use of the young Seedlings.

Price in Sealed Bags of 5 Bushels—per Bag, 7/6; per 5 Bags, 32/6; per 10 Bags, 60/. A 5 Bushel Bag will cover a space of about 20 square yards at a depth of  $\frac{1}{2}$  inch on a level surface. Trial Bags, 2/, Carriage Free.

Carters' Fertilising Fibre.—A customer in Essex writes:—"It may interest you to know that the Lawn Grass Seed you supplied, together with the Fibre, has resulted in a close, thick, luxuriant turf. If I had not seen this result, I would not have believed it to be a possibility."

# CARTERS' NOVELTIES AND SPECIALITIES FOR 1900.

Photographed from Nature and Copyrighted by J. C. & Co.

THE GREATEST NOVELTY OF THE YEAR.

THE BEST BLUE BEDDING PLANT EVER INTRODUCED.

#### NEW ANNUAL DELPHINIUM—CARTERS' "BLUE BUTTERFLY."

No. 1262. Price, in sealed packets, 1s. 6d. and 2s. 6d. each.

A sensational Novelty of rare merit, surpassing in usefulness and beauty every other form of Annual or Perennial Larkspur. It is Annual, a great advantage to many; it is beautifully compact, about one foot in height; its individual blossoms exceed in size all of the tall Perennial section; and, above all, it is the most beautiful ultramarine blue that can be conceived, combining the unique colours of Salvia patens and Gentiana acaulis, and consequently as a Blue Bedding Plant it is without a rival. The toliage is deep green, finely laciniated, and graceful. It is of easy cultivation, may be grown almost anywhere, and in our own grounds has bloomed for three months successively. If desired, it can be grown as a pot plant for general decorative purposes.

# CARTERS' NOVELTIES AND SPECIALITIES FOR 1900.

Photographed from Nature and Copyrighted by J. C. & Co.

# NEW ASTER, CARTERS' "METEOR." No. 224. In sealed packets, 1s. and 2s. 6d. each.

This magnificent Aster was introduced by us last year for the first time. It still varies somewhat in colour, but the majority of blooms are brilliantly striped with carmine, the lower petals entire deep maroon crimson. It is indeed a lovely flower, and has a great future in store. Habit compact; height,  $1\frac{1}{2}$  feet. The photograph gives the form, but cannot show its remarkable brilliance of colouring.

NEW ASTER, CARTERS' "CORONET."

No. 1263. In sealed packets, 1s. 6d. each.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1900.

# NEW ASTER, CARTERS' "CORONET."

No. 1263. Price, in sealed packets, 1s. 6d. each.

We have here an entirely new growth of Aster which will be a boon to many who desire a buttonhole flower and background combined, or for a single flower vase decoration. The blossom itself is very pure in colour, delicate silvery white, and the petals are full and gracefully curved, and backed up with coronet of deep green bracts which remove the necessity of a spray of Maidenhair Fern or other foliage as a background. General habit of growth good. Height, I foot.

#### NEW ASTER, CARTERS' "CRESTED" CRIMSON.

No. 1264. Price, in sealed packets, 1s. each.

This Aster appears to open a new era in the form cf centre growths. In habit and height (about  $1\frac{1}{2}$  feet) partakes of the well-known Perfection class. The flowers are large with long pointed petals, the centre ones for some considerable area divided and curled at the tips, with a tendency to white shading, so that the flower presents the appearance of carrying a crest. It is a most distinct variety from all others, and will beyond doubt be appreciated by the Aster lover.

# FOR COMPLETE LIST OF CHOICE ASTERS, see pages 70, 71, and 72

# CARTERS' NOVELTIES AND SPECIALITIES FOR 1900.

CHRYSANTHEMUM, "MORNING STAR." Beyond doubt the best of the golden self-coloured varieties of Annual Marguerites. A remarkably free bloomer, with large sulphur-gold blossoms; excellent as a single pot plant, in masses, or as a cut flower. Height, 1½ feet. Among the many excellent varieties of this class of plants it will take precedence as the finest of the yellows.

No. 1265. In sealed packets, price is. and 2s. 6d. each.

POPPY, NEW JAPANESE. This beautiful Poppy forms an entirely new feature in the highly-favoured tribe of to-day, being very dwarf (about 12 inches in height), intensely double, neat and compact in habit, and of varied and brilliant colours. Altogether a dainty novelty deserving the highest praise.

No. 1266. In sealed packets, price 1s. and 2s. 6d. each.

HEARTSEASE (PANSY) "GIANT CURLED." A new type of these great favourites, distinguished from all other kinds by an original form of flower, every petal being conspicuously undulated and curled, and the blossoms are of magnificent proportions. It is a lovely addition to our garden delights, and will probably lead to many changes in popular admiration and cross fertilization.

No. 1267. In sealed packets, price 1s. and 2s. 6d. each.

CANDYTUFT "ROSE CARDINAL." A brilliant advance in colour from the well-known carmine variety. It is a beautiful and bright shade of rosy scarlet; comes true and constant. Highly recommended.

No. 1268. In sealed packets, price is. each.

GODETIA "DUKE OF YORK." Brilliant new variety of dwarf, stout, and regular branching habit, similar to our popular Lady Satin Rose, but the flowers are of a bright scarlet-carmine colour of an entirely new shade from any other Godetia. Charming and effective.

No. 1269. In sealed packets, price 1s. and 2s. 6d. each.

MATRICARIA (CHRYSANTHEMUM) "SNOWBALL." A charming pure white companion to our C. Golden Button, which has so speedily become an immense favourite from its elegant beauty and neat habit. For pot culture or dwarf borders it is unequalled, and the two varieties form a lovely combination in the mixed border. Height, I foot.

No. 1270. In sealed packets, price 1s. and 2s. 6d. each.

NEW STOCK, "EMPRESS ELIZABETH." A splendid new variety of large-flowering winter Stock. Colour a bright carmine-rose; immense spikes of fine double blossoms with lateral shoots; admirably suited for cut blooms. Quite hardy, and will be found of essential service in general adornment.

No. 1271. In sealed packets, price 1s. 6d. each.

VERBENA MAMMOTH, SCARLET SHADES. The new Mammoth strain of Verbena (See No. 1200, page 112) has proved a great success, many of the individual blossoms reaching the size of a penny piece. The special varieties here offered are special selections of rich scarlet colours of various shades.

No. 1272. In sealed packets, price is. 6d. each.

TROPÆOLUM, IVY-LEAVED. A novelty of rare and distinct merit. The foliage is ivy-shaped and of dark metallic hue, giving a brilliant effect to the rich scarlet flowers. Excellent for hanging baskets, &c.

No. 1273. In sealed packets, price 2s. 6d. each.

LOBELIA ELEGANTISSIMA. A lovely dwarf erect-growing species from South Africa. Fine delicately-cut foliage with large flowers, brilliant blue with large white eye. Height, 9 inches. Splendid pot plant.

No. 710. In sealed packets, price 1s. 6d. and 2s. 6d. each.

CAMPANULA MIRABILIS. One of the grandest of the Bell Flowers, pyramidal in growth with broad base, flowering from the base upwards in great profusion; perennial; colour pale blue. Height, 2 feet. First Class.

No. 279. In sealed packets, price 1s. 6d. each.

GODETIA WHITNEYI, DWARF BLOOD RED. Quite a new colour in Godetias. Abundant bloomer; colour an intense blood red; of very dwarf habit. Height, 6 inches. Good basket or pot plant.

No. 1274. In sealed packets, price is. each.

# CARTERS' ÆSTHETIC or DECORATIVE FLOWERS

#### FOR CUT BLOOMS.

Gulture.—HARDY ANNUALS.—Sow in frames from March to April, and transplant when the plants are strong enough, but if earliness of bloom be not a desideratum, it is perhaps preferable to sow in the open borders, where they are intended to bloom, during April and May, in a top-dressed soil of loam sand, and leaf mould, taking care to sow thinly and weed carefully in the earlier stages of growth.

- HALF-HARDY ANNUALS.—Sow in gentle hot bed in March and April, and keep in warmth until the middle of May, or in favourable seasons they may be sown out of doors during the month of May. Sow thinly, and water freely if necessary.
- PERENNIALS.—Sow in Spring on gentle heat, and prick off the seedlings until end of June; or sow in the open air on prepared beds of light soil from March to May, transplanting as occasion requires. Sow also from July to September for early Summer blooming the following year in prepared beds, covering with dry leaves or straw during the Winter.
- ÆSTHETICS.—All flowers are beautiful to lovers of Nature; the term Æsthetic is here employed to indicate simplicity and elegance of form, with chasteness in colouring, and the undermentioned combine these qualities in an eminent degree. They are specially selected for their suitability for bouquets or vase decoration. As cut flowers are now indispensable to the perfect decoration of house interiors, it is essential to have a continuous supply, for which purpose we strongly recommend the utilisation of the kitchen garden and store beds, whence reserves can be drawn for the mixed borders, or cut from as occasion may require. A graceful effect is produced by the commingling of sprays of ornamental grasses with the cut flowers, for complete list of which see page 85.

Photographed from Nature and Copyrighted by J. C. & Co.

No. 94	GOLDEN	SUNSET	 •••	•••	 	 	Per packet	

Culture.—Sow in Spring and plant out as soon as the seedlings are strong enough, or sow in the place where they are intended to flower, and thin out as may be necessary. If the seed pods are picked off as soon as they show, the plants will continue in bloom much longer. Sow also in September.

#### ÆSTHETIC FLOWERS.

- No.

  Per packet.—s. d.

  88 BLUE MARGUERITE (Perennial).—A hardy flower, producing blossoms on long stalks; admirable for cutting. An excellent companion to the class of flowers known as Marguerites. 1½ feet ... ... ... ... ... ... /6 & 1 0
- 89 WHITE MARGUERITE (Perennial).—This species is of an excellent dwarf habit, producing blossom in abundance. 1½ feet ... ... ... ... 10

- No.

  91 BLOOD MARGUERITE (Annual). Fine, free-blooming plant, after the character of the favourite
  Single Dahlia, but slenderer in the petals and longer
  in the stalk; it is equally suitable as a cut flower
  for the mixed border. Can be recommended as a
  plant of great general utility. 1½ feet ... -/6 & 1 0
- 92 ORANGE MARGUERITE (Annual).—A composite flower of excellent habit as a pot plant; colour bright orange, an effective contrast to all the others; good flower for cutting or conservatory. I foot -/6 &
- 93 BLUE CORNFLOWER (Annual). This is an undeniable favourite as a cut flower; a profuse bloomer. There are other colours of this excellent annual. See page 84. 1½ feet ... ... -/6 &
- 94 GOLDEN SUNSET (Perennial, flowering the first season).—This is a flower of surpassing merit, far and away the best of the Coreopsis tribe, blossoms of large size and in the greatest profusion; colour rich golden yellow, deepening in hue towards the centre; excellent cut flower. 2 feet ... ... ...
- othe tribe of Saxifrages and of rare merit, creating quite a furore on the continent of Europe. It possesses the usual neat habit of its class, with more than the usual amount of blossom; colour bright crimson scarlet, the spray of bloom somewhat resembles that of a red Lily of the Valley.
- 96 ALPINE POPPY (Perennial). Neat flowers of dwarf habit, good equally for pots or bouquets; mixed colours, white to orange. 1 foot ... ... 1
- 97 CAUCASIAN BEAUTY (Perennial).—Suitable alike for the rockery or mixed border, and when well established is a free bloomer. It is a flower of peculiar form, colour delicate lavender blue; a cut flower of great merit. 1½ feet ... ... ... ...
- 98 PENNANT PINK (Perennial, flowering the first season).—An importation from Japan, in its true form producing long petals deeply laciniated; colours rich and beautifully varied; long and continuous bloomer. Excellent in groups, beds, or small clumps, and a first-class flower for cutting. I foot ... -/6 &
- 99 SILVER THISTLE (Perennial).—This plant as a unique ornament to the mixed border is unsurpassed; a fine single specimen for a hall vase; bright metallic lustre. 2½ feet ... ... ... ... ... ...

No. 100. COMPLETE COLLECTION OF ABOVE 12 (Nos. 88 to 99) ÆSTHETIC FLOWERS, 6s.

# Carters' General List of Standard Flower Seeds.

Flower Seeds having Popular Names will be found in the following pages incorporated with the Scientific Names in Alphabetical Order.

PLEASE NOTE THAT ALL OTHER SEEDS NOT MENTIONED IN THIS CATALOGUE CAN BE SUPPLIED.

In giving orders it is preferable to mention the numbers without the names; but as the numbers are changed every year, it is absolutely necessary to give the date of the Catalogue from which the numbers are taken. Ex Catalogue, 1900.

#### ANEMONE, CARTERS' ST. BRIGID.

We were the first house to introduce these beautiful flowers. A new era in flower-growing has been inaugurated by the system recommended by Mr. Burbidge, F.L.S., and we feel satisfied that if our Customers who are accustomed to plant Anemone Bulbs will also sow this Seed, it will produce a variety of charming forms hitherto unknown.

No. 167.—In sealed packets, price 1s. 6d. and 2s. 6d. per packet.

Photographed from Nature and Copyrighted by J. C. & Co. REDUCED TO ONE-HALF SIZE.

IMPORTANT FACT .- Some "sixty years since" the floral world was startled and delighted by the introduction into England by our late Mr. James Carter, for the first time, of the Sealed Packets of German Asters and Stocks. The original cultivator continued to grow for us alone until his decease a few years since, and our present supplies are grown expressly for us and rigidly

Our Annual Trials exceed 10,000 plants.

#### Aster, Michaelmas Daisies. These hardy perennials are rapidly coming to the front for the mixed borders; seedlings produce novel colours and increased bloom.

#### MATCHLESS IN FORM, SUBSTANCE, SIZE, AND COLOURS.

Culture.—Balsams may be sown from the beginning to the middle of April in pans or on a slight hot bed, in a light rich loam and vegetable compost, covering the seed about half an inch, keeping the soil moist, but not wet. When the plants have formed the second pair of leaves they may be transplanted, four round the edge of a 6-inch pot, and gradually hardened off for transplanting out of doors; or they may be planted in a cold pit, 4 inches apart, as near the glass as possible, giving more air as the season advances until June, when they may be turned into the open borders, the warmest situations being the most suitable. If for pot culture, they must be divided and transplanted into single pots, once or twice into larger pots, picking off the flowers in the earlier stages of growth to give greater vigour to the plant, and watering freely in dry weather.

These Balsams are as double as Roses and as handsome as Camellias, and are not to be surpassed by any others, wherever they may be.

"I am pleased to tell you that I have always taken first prize at Freshwater Show with your Balsams since 1884."—J. M.

Photographed from Nature and Copyrighted by J. C. & Co.

# BEGONIA, CARTERS' CHOICEST SINGLE AND DOUBLE.

No. 244. CROWN JEWELS, SINGLE. Best possible strain.
In sealed packets, 1s. 6d., 2s. 6d., 3s. 6d., and 5s.
No. 245. DOUBLE, CHOICEST. Unique and complete mixture of all the best kinds.

In sealed packets, 2s. 6d., 3s. 6d., and 5s.

Saved at our Nurseries from one of the finest groups in Europe, including only the newest and best forms, many of which are absolutely novel. This Seed cannot be obtained elsewhere.

Everything that human skill can do has been done in eultivating and fertilising this superb strain, so that the best results may be confidently expected.

No. 246. BEGONIA PERPETUAL (CARTERS'). Fibrous-rooted, dark-leaved species; for bedding; colour rosy-crimson. 1½ feet.

In sealed packets, 1s. 6d., 2s. 6d., 3s. 6d., and 5s.

<sup>&</sup>quot;From the Single Begonia seed supplied by Messrs. Carter we had 120 splendid plants from a 1s. 6d. packet, all of which bloomed profusely, and not a small or puny flower among them, the colours being beautifully varied."—E. A.

<sup>&</sup>quot;My beds of Single Begonias were the admiration of all who saw them."—H.

<sup>&</sup>quot;I enclose a bloom from the Begonia seed I had from Carters'. I have 150 beautiful plants."—J. W.

<sup>&</sup>quot;From the small packet of seed of Carters' 'Crown Jewels' Begonia I have 195 plants, and the greater portion beat those for size in the coloured plate. They measure from 4 to 5 inches across, and of the most beautiful colours, astonishing all who saw them."—J. S.

<sup>&</sup>quot;Carters' Crown Jewels' Begonias have been greatly admired by all who have seen them."—W. L. H.

<sup>&</sup>quot;For two years you sent me a 5s. packet of Single Begonia seed, which I sowed in a large pan under a handlight, placed in a warm end of an unheated greenhouse. The seed was sown in July. I raised 120 plants, and have had both last and this year a grand show, all shades and colours."—H. A. II.

No. 254. CALCEOLARIA, CARTERS' VICTORIA PRIZE COMPACT. Superb. GOLDEN PRINCESS. Exquisite golden yellow. ,, 255.

#### Price, in sealed packets, 2s. 6d., 3s. 6d., and 5s. per packet.

It is impossible by photography to give any adequate idea of the glory and beauty of these magnificent flowers; the variations and markings are endless, the flowers are of large size and perfect in form, and the habit is unexceptionable. Our exhibit at the Temple Show of the Royal Horticultural Society was the theme of general admiration, and No. 255, Golden Princess, was particularly admired for its grand size and pure rich colour. We know of no flower more grandly effective in the greenhouse, either singly or collectively. All the plants are carefully cross-fertilised in order to ensure quality in the seed and variety in form and colour.

#### CENTAUREA MARGARITA.

No. 346. Per packet, 1s. 6d. and 2s. 6d.

CARTERS', 237, 238, & 97, HIGH HOLBORN. LONDON.-1900.

# Centaurea Margarita or Giant White Sweet Sultan.

—As a cut flower the blossoms are much larger than those of any other, and the very essence of white purity. It is most deliciously scented, with long flower stalks to facilitate cutting, and when cut will last in water for a fortnight. In this respect alone it exceeds any other annual we can call to mind. We give this flower the highest possible recommendation.

No. 346. Margarita. Pure white ... 1/6 & 2 6

# Centaurea (Perennial). Beautiful

#### CHRYSANTHEMUM, CHOICE ANNUAL.

No. 358. Choicest and newest mixed varieties. In sealed packets, 1s. and 2s. 6d. each.

These are amongst the most beautiful and striking of hardy Annuals, and are deservedly universal favourites, specially so the separate colours, Nos. 363 to 367.

Culture.—Sow in spring in the open ground, or in prepared beds; in the latter case, the seedlings should be transplanted, when sufficiently strong, at a distance of about 12 inches apart.

Photographed from Nature and Copyrighted by J. C. & Co.

# CHRYSANTHEMUM, "GOLDEN BUTTON."

No. 359. Price, in sealed packets, 1s. and 2s. 6d. each.

This charming flower is singularly attractive from its elegant neatness of habit and the chaste beauty of its numerous small blossoms of pale gold colour; a perfect gem for dwarf borders or in pots. We anticipate a great future for this plant.

QARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900.

Per packet-	-s.	d.
Chrysanthemum Annual (Mar-		
guerite).—Of all the æsthetic annuals of modern times, these pretty flowers perhaps hold the premier		
position, from their simple innate beauty and delicacy of form; the		
variety of colour in Nos. 363 to 367 is remarkable, and fix the eye at		
once. All are beautiful, selection is simple—a matter of taste; good		
for window boxes or cutting. 1½ feet.

DOUBLE CINERARIA (CARTERS').

No. 382. In sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

CARTERS', 237. 238. & 97, HIQH HOLBORN. LONDON.-1900.

To speak in praise of our Brilliant Prize Cineraria is to "Paint the lily, or to gild burnished gold"—suffice it to say that they cannot be surpassed by any other strain whatever.

- "I have had the finest Cinerarias and the best colours this season from your seed that I have ever grown."—J. L., Bridport.
- "I am pleased to say the Cinerarias this year are quite equal to last year. They have been greatly admired by all who saw them; in fact, they are the best I have ever grown."—H. S., Market Harboro'.
- "We have some splendid plants from your Cineraria. I am having a photograph taken of some—would you like one?"—W. E., Stroud.
- "I have the finest collection of Cinerarias from your seed I have ever seen, they are magnificent."—Miss P., Essex.

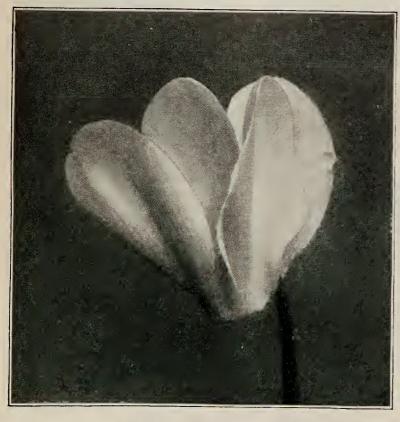

No. 381. Cineraria, fine mixed Single. An excellent strain for ordinary greenhouse purposes. Per packet, 1s. 6d.

# Double Cineraria, Carters' Select Strain.

These beautiful flowers present novel forms, and our exhibits at the Royal Horticultural Society and elsewhere were regarded with great interest and admiration. The blossoms are well adapted for cut blooms; deserve extended culture.

# Carter's Prize Cyclamen Grandiflorum.

Awarded the Highest Diploma and Prize Medal, Chicago Exhibition.

#### CYCLAMEN, WHITE SWAN.

No. 457. Per packet, 1s. 6d. and 2s. 6d.

"I was exceedingly pleased with the Flower seeds purchased from your establishment this season."—Mr. C. J. CAMDEN, Redhill.

"I have pleasure in informing you that your Flower seeds have always given me every satisfaction, and always came prompt to order."—Mr. A. CARRIVELL, The Gardens, Burnside.

REDUCED IN SIZE.

# NEW CRESTED CYCLAMEN, "PIONEER."

No. 459. Price, in sealed packets, 2s. 6d. and 5s. each.

Flowers of good substance, pure white, with a distinct crest or feather on each petal. This is evidently the precursor of a new race of Cyclamen, and may possibly result in the formation of coloured crests upon a white ground, or vice versa. We recommend this variery as a novelty of sterling merit.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.-1900.

Price, in sealed	packets,	1s. 6d.	and 2	s. 6d.	each
------------------	----------	---------	-------	--------	------

- No. 449. Charming Bride. A superb white variety, with large handsome petals, pure in colour and firm in texture; eompact habit; robust growth.
- ,, 450. Crimson Queen. Beyond doubt the richest colour yet attained in Cyclamen; a bold well-formed flower; colour deep maroon-red.
- ., 451. Dixon Hartland. The best specimen yet produced of the Giant Cyclamen Persicum; colour pure white, with dark claret base.
- ., 452. Duke of Connaught. Handsome distinct flower of a deep cherry colour; blossoms of grand substance and form, and altogether superb.
- ., 453. Princess Ida. Delicate fairy-like blossoms, charming; colour suffused blush, with dark rose base.
- ., 454. Rosy Morn. One of the finest in form, producing splendid trusses of bloom; clear satin-like petals; colour bright rose, with dark claret base.
- ., 455. Sunray. Interesting variety, changing colour during growth from dark to light rose, flamed scarlet.
- ,, 456. The Sultan. The richest coloured Cyclamen ever seen; intense erimson; invaluable.
- ,, 457. White Swan. The most profuse bloomer of all the white Cyclamen; grand flower, pure colour.
- ,, 458. THE COLLECTION OF ABOVE 9 VARIETIES FOR 10s.
- ,, 448. CARTERS' SUPERB MIXTURE, 1s. 6d., 2s. 6d., and 5s.
- ,, 460. Cyclamen Persicum, mixed, older varieties, 1s. 6d. and 2s. 6d.

# Daisy (Bellis Perennis).—These charming Spring flowers have a pre-emptive right to every garden, for edging, bedding, or small clumps.

No. 461. CHOICEST MIXED, in sealed packets, 1s. 6d. and 2s. 6d. CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1900.

Cyanus Minor (Cornflower) Nothing		
can be said in excess on behalf of these interesting and useful flowers,		
offering as they do a good example in hardiness of growth and profusion		
of blossom, and we cannot greatly err in saying that there is scarcely a	7	
cottage in England without some kind of Cornflower. The blue variety has become historical by being the favourite flower of the Emperor		
William I. of Germany. These stand in the front rank as	,	
cut flowers.		
No. 441. Emperor Blue (Blue Cornbottle). The most favoured		
colour of all. 2 feet/6 &	1	0

# Dahlia (Georgina variabilis).

Carters' grand cross-fertilised strains.

The Double Dahlia (Georgiana variabilis fl. pl.) was for half a century a leading florists' flower, and, indeed, no large garden is now complete without it. The perfect symmetry of form and variety of colour which have been attained will always preserve them from being neglected for any length of time. However, fashion changes, the old order gives way to the new, and the Single Varieties a few years since evoked a species of mania which has not yet subsided, and it must be admitted the graceful shape and brilliant colours of the Single kinds are deserving of the warmest admiration. Now, yet another kind heads the race, the so-called Cactus Dahlia, of which our illustration gives the type; these merit cultivation from their singularity of form, and have not yet reached their zenith. Our strain has been specially hybridised and fertilised with various species, and should produce new kinds.

Culture. — Sow in Spring in good soil in well-drained pans or pots, prick off singly in pots as the seedlings progress, harden off gradually, and plant out when night frosts are no longer to be feared. The Dahlia delights in a rich, deep, friable soil.

#### DIANTHUS (FLOWER OF THE GODS).

No. 476. Choicest mixed. In sealed packets, 1s. 6d. and 2s. 6d.

Culture.—May be treated either as annuals or biennials. Sow in Spring on heat, prick off into prepared beds, and plant out in May. Sow also in April and May in the open ground, thinning out to a distance of eight or ten inches.

Photographed from Nature and Copyrighted by J. C. & Co.

## THE SEA HOLLY (ERYNGIUM MARITIMUM).

No. 501. In sealed packets, 1s. 6d. each.

A very pretty silvery-white perennial plant with prickly foliage, much resembling our Garden Hollies; it bears a pale blue flower, and is found growing on the coast of Belgium and various parts of our own English shores. It may be grown from seed, which should be sown in seed pans in Winter and planted out in the Spring in a soil composed of a mixture (if possible) of sea sand, lime rubbish, and any light soil. It requires considerable moisture, but, at the same time, absolute drainage is necessary. One of the most valuable plants for cut-flower decoration, lasting a long while. Height in cultivation, 1 to  $1\frac{1}{2}$  feet.

#### DIGITALIS (FOXGLOVE.)—See page 88.

Dianthus chinensis (Indian Pink.)		
—We are inclined to assert that there is no tribe of hardy flowers more generally known and admired than the "Pink" tribe. We consider the Heddewigi section to be the finest addition to our annual flora for the last fifty years, and the varieties detailed below are the improved results from the original importation. The choice between Single and Double kinds we must leave to individual taste, both are grandly

### GAILLARDIA, CHOICE DOUBLE.

This is one of the most superb perennials in cultivation, effective either in clumps or singly in the border, or as a cut flower; the colours are varied, with crimson, violet, cerise, and gold, with brilliant tinted throats.

No. 553. Choice Double, sealed packets, 1s. and 2s. 6d. CARTERS', 237, 238, & 97. HIGH HOLBORN, LONDON.—1900.

Photographed from Nature and Copyrighted by J. C. & Co.

### GAILLARDIA, CHOICE SINGLE.

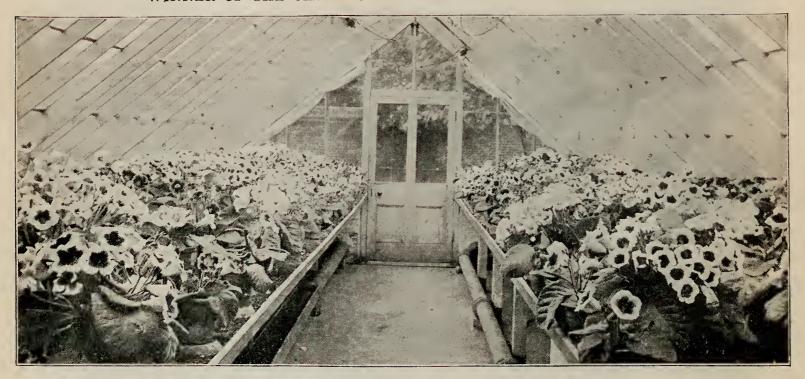

The flowers are unique in their brilliant splendour, and are best treated as half-hardy perennials, flowering the first season. If sown in the autumn, protect by a covering of straw or dry leaves in the store bed, transplanting in the spring where they are to bloom. Grand flowers of brilliant shades of gold and crimson.

No. 554. Carters' Choice Hybrids, sealed packets, 1s. and 2s. 6d.

## CARTERS' "INVINCIBLE" PRIZE GLOXINIA.

SEE ILLUSTRATION ON WRAPPER.

WINNER OF THE CHAMPION PRIZES THROUGHOUT THE WORLD.

Gilia.—Hardiest and earliest Californian annual.

Photographed from Nature and Copyrighted by J. C. & Co. GODETIA, CHOICE MIXED.

No. 589. In sealed packets, 1s. and 2s. 6d.

## Godetia.—Have sometimes been known as annual Œnotheras.

Were the most prominent Californian annuals of the last generation. The care and culture since bestowed upon them have produced marvellous varieties, far exceeding in size of blossom and brilliance of colouring the older kinds. The appended selection contains the most approved sorts of the present day. Perhaps there is no class of flower producing more abundant blossom. The habit of the species is excellent, and the glossy silky texture of the petals is worthy of inspection. The crystal beauty of Godetia Lady Satin Rose and White Pearl is remarkable. The Godetia makes an excellent cut flower, a spike of half-opened buds continue to develop for a long time if fresh supplies of water be given daily.

		Per packet	−s.	a.

### ORNAMENTAL GRASSES FOR DECORATIONS (SEEDS).

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' 237, 238, & 97, HIGH HOLBORN, LONDON.—1900.

Most of the varieties of Ornamental Grasses were included in our great Annual Collection of Flowers, etc., grown from seed, and exhibited by us in the Gardens of the Royal Botanic Society. They make charming Pot Plants to mingle with the brighter colours of Flowering Plants in the Conservatory.

In making up Winter Bouquets the Dried Grasses are greatly improved by an admixture of EVERLASTING FLOWERS. See page 86 (Seeds) and page 126 (Dried Specimens).

## Carters' Prize Show and Fancy Hollyhock.

Photograph taken at our Trial Grounds, Mortlake.

#### THE CULTIVATION OF THE HOLLYHOCK AS AN ANNUAL.

Now that the Hollyhock has taken a prominent position at most of our leading Flower Shows, we think a few hints on its cultivation will be useful to amateurs, especially as there appears to be a misapprehension as to the time it takes to produce bloom; many persons thinking that the operation takes two years, whereas flowers can be obtained in five months.

GENERAL DIRECTIONS.—Any one possessing an ordinary garden frame can raise the plants from seeds by preparing a slight hot-bed for bottom-heat in February or March. The seed should then be sown on the bed on good locative soil.

When in rough leaf, the young plants should be pricked out 3 or 4 inches apart in a cool frame, and be transferred to their permanent places, in ground very highly manured, early in

If the weather be cold after planting out, pots should be placed over them at night, to be removed on the following morning, and repeated for three or four weeks if the nights are cold.

If these simple directions be attended to, the result will be found to well repay the trouble, fine spikes in the following August and September will be ensured, and the disease to which Hollyhocks have been considered so susceptible will be

833	Cloth of Gold. Distinct in its handsome yellow foliage, scarlet flower; bright and effective as a bedder	0	6					

Nasturtion (Tropæolum Majus). This is an instance of the supremacy of the Vox populi. A true Nasturtion, Ex. Water Cress, an officinal plant, belongs to the N. O. Cruciferæ, and the name Indian Cress, given the Tropaolum Majus, probably accounts for the transfusion of names, as the leaves of both are edible and salutary. Be that as it may, the present nomenclature of Nasturtion is indelible, and it would be mere folly to attempt to subvert the universal habit of the gardening world. Those who recollect the ordinary garden Nasturtion of "sixty years since," can best appreciate the immense advance which has been made in the colour, habit and beauty of these most invaluable adjuncts to every garden; and we are gratified to think that the greater number of new varieties now in cultivation are the result of our own persistent care and attention at our Seed Farms in Essex. A singularly pleasing effect is produced by sowing some Godetia, say No. 589, page 92, with the Nasturtions.

## Carters' "Emperor and Empress" Prize Petunia.

SUPERB COLOURS.

DELICIOUS SCENT.

GRAND SIZE.

ABUNDANT BLOSSOM.

GENERAL REMARKS.—Perhaps there is no flower in which the beneficial results of careful cultivation and cross fertilisation are more evident than in the beautiful fragrant Petunia; the small flower of the P. phanicea has become transformed into the grand blossoms and brilliant colours of our EMPRESS and EMPEROR strain. We have tested every other so-called first-class variety, and, with few exceptions, have found none to equal them, and in no case any superior.

Please see special article on Petunias in "Gardeners' Chronicle."

Photographed from Nature and Copyrighted by J. C. & Co.

#### ILLUSTRATED AND DESCRIBED IN THE "GARDENERS' CHRONICLE" AS ONE OF THE MOST ADVANCED TYPES. No. 880 PETUNIA, CARTERS' "EMPRESS."—A most magnificent strain; brilliant colours, grand size. In sealed packets, 2s. 6d. & 5s.

#### PHLOX DRUMMONDI GRANDIFLORA.

No. 902. In sealed packets, 1s., 1s. 6d., and 2s. 6d. per packet.

THE PHLOX N.O. Polemoniace.—Most species of this beautiful flower are percnnial, and their brilliant beauty and tall stately appearance in the herbaceous border is perhaps one of the most striking features of the late summer. We offer a superb mixture of these, No. 917, but the Annual Species is the one we wish now prominently to notice. Nothing can better prove its great beauty than the great number of times it has figured in the botanical periodicals, and it is indeed one of the most beautiful annuals we have. It was first sent into this country from Texas in 1835 by Mr. Drummond, and has since achieved an immense popularity. Much attention has been paid to its development, and splendid new colours have been produced in the Grandiflora varieties, Nos. 903 to 907, whose brilliant charm cannot be too highly praised. The Nana Compacta varieties, Nos. 909 to 913, are equally fine in flower and of very dwarf habit. Height about 6 inches, and particularly suited to pot culture and miniature bedding.

## CARTERS' "SHIRLEY" POPPY (Silk or Ghost Poppy). No. 924. In sealed packets, price 1s. and 1s. 6d. each.

This lovely garden Poppy has probably received its various names from its delicate texture and almost shadowy forms. The shades of colour are endless, and we again offer a strain of unusual beauty, as the stock has been rigidly selected by its original nominator, the Rev. W. Wilks, Secretary to the Royal Horticultural Society.

#### GIANT PÆONY-FLOWERED POPPY.

No. 68 Eight superb selected colours, separate, 3s. 6d. No. 926. Splendid mixture, all colours, 1s. and 2s. 6d.

This strain of superb Double Poppies has been selected with the greatest care, and none but the richest colours and best forms retained. They produce an imposing effect either singly or in groups.

POPPY, "THE CARDINAL."

No. 929. In Sealed Packets, 1s. and 1s. 6d. each.

Grand flower, magnificently double, riband-like, with a delicate fringe; brilliantly effective; colour a glowing scarlet with white reflex.

Photographed from Nature and Copyrighted by J. C. & Co.

### ICELAND (PERENNIAL) POPPIES.

No. 942. Mixed Colours. In Sealed Packets, 1s. and 2s. 6d.

These charming little Perennial Poppies, now in the zenith of their fame, fully deserve the general praise awarded to them. They are equally adapted for small beds or groups in the garden, or for rockwork, and as pot plants in the greenhouse or conservatory are very useful. They also make good cut flowers, a quality rather rare in this tribe of plants.

Poppy, Annual Varieties—continued.		
No. 937. French (Pap iver Rheas fl. pl.). Known also as the		
Ranunculus Poppy. Close globular flowers, compact in habit, and bright in colours. 1½ feet	0	6

#### SALPIGLOSSIS, LARGE FLOWERED.

No. 1022 SALPIGLOSSIS, CHOICE MIXED, per packet, 6d. and 1s.
No. 71 12 VARIETIES, SEPARATE, small packets, 2s. 6d.

The greatest care and attention has been bestowed on the culture and improvement of these lovely flowers, and the strain here offered is of the finest quality; colours vary from delicate cream to intense violet blue, almost black, delicately veined and striped, the whole flower presents a beautiful velvety appearance.

Photographed from Nature and Copyrighted by J. C. & Co.

#### DOUBLE SCABIOUS, "THE POMPADOUR."

No. 1039 SCABIOUS POMPADOUR, in sealed packets, 1s. each.

No. 1040 CHOICE MIXED DOUBLE, packets, 1s. each.

No. 72 10 VARIETIES, SEPARATE, small packets, 2s. 6d.

A great improvement upon the old garden favourite Scabious. The individual florets are increased in size and variety and intensity of colours. An excellent border plant, and first class as a cut flower for decorative purposes.

## ANNUAL AND PERENNIAL STOCK.

Culture.—Sow early in March in pans near the glass, or in a frame filled with vegetable loam with one-sixth river sand, to within four inches of the lights, so that the young plants may be near the glass and not drawn up weakly; level the soil nicely, and slightly sprinkle with water, then scatter the seeds evenly about four to the square inch; another slight sprinkling, and then cover the seeds with about \( \frac{1}{2}\)-inch of finely-sifted compost. Keep the lights closed and shaded from the sun for a few days, gradually giving the plants air until the end of April, when they can be transplanted into pots or groups in the open border; a mixture of good old lime rubbish is beneficial to the soil in which Stocks are planted out. Interinediate, East Lothian, Brompton, Imperial, and Queen Stock may be treated precisely as given above, with the exception of the time of sowing, which should be from July to September. Stocks may be transplanted several times in the earlier stages of their growth if dwarf, compact habit is required.

Shotographea from Nature and Copyrighted by J. C. & Co.

WHITE WINTER STOCK, CARTERS'
"AVALANCHE."

No. 1082. In sealed packets, 1s. and 2s. 6d. each.

THE FINEST WHITE STOCK IN CULTIVATION.

"STOCK CARTERS' AVALANCHE.—When on a visit to Mr. Pettigrew, The Castle Gardens, Cardiff, I met with much to admire, and in particular was greatly impressed with the beauty of four circular beds, measuring 10 feet across, wholly planted with Avalanche Stock. I have never seen anything of the kind to equal that display of white Stocks, and quickly arrived at the conclusion that it was one of the good things I had missed hitherto. The seed was sown in gentle heat early in February, and the plants duly prepared in boxes for moving into beds some time in May. When I saw them, about the third week in July, they were a mass of bloom. Large numbers had been cut, boxes were filled with spikes while I was there, and yet no serious gap appeared anywhere. Mr. Pettigrew speaks highly of it for pot culture. If the seed is sown early in the autumn the plants will flower in an ordinary greenhouse during March and April."—W. IGGULDEN, in fournal of Morticulture.

#### STREPTOCARPUS, NEW HYBRIDS.

No. 1100. In sealed packets, 1s. 6d. and 2s. 6d. per packet.

Culture.—Sow from January to March in well-drained pots, let the soil be moderately damp, and press it gently to make it firm and smooth. Sow the seed thinly and evenly, and it need not be covered, or if covered, only very slightly with a little fine silver sand. See that the soil is not allowed to become dry, and be careful to shade from the sun, as when germinating a few minutes' sun may destroy the young seedlings. Prick off when ready.

#### SWEET WILLIAM, CARTERS' "HOLBORN GLORY."

No. 1165. In sealed packets, price 1s. 6d. and 2s. 6d. per packet.

The illustration is no exaggeration, as we have measured many individual flowers in the crop on our Seed Farms, each of which more than covered a penny-piece. It is unapproached by any in cultivation for show, exhibition, or staging purposes, and no collection of biennials, perennials, border or herbaceous plants should be without it.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON -1900.

DARD FLUWER SEEDS.—continued.		
Schizonotalon Per packet	<b>⊸</b> s.	ď.
Schizopetalon.—Hardy annual. A delightful little annual of singular form, being, when fully open, like a small square of delicately cut lace. It is early blooming, sweet-scented, and adapted for pots and edgings.		
	0	6
Schizanthus (Fringe Flower).—Hardy annual. Interesting and beautiful flowers, and invite the closest inspection, and equal in singular marking some of the Oncidium Orchids. In pots in the conservatory few plants are more attractive, and a lovely group of them might have been seen during the early months of the year in The Royal Gardens, Kew, greenhouse. All the varieties are more or less marked with crimson, lilac, purple, and yellow, and the petals are cut in a picturesque manner. In the Summer they grow freely out of doors.		
No. 1044. Pinnatus. The original species from Chili. 2 feet, 1045. Papilionaceus. Fine free bloomer; bright coloured, 1046. Pyramidalis Tom Thumb. Dwarf, bushy variety. 1 foot, 1047. Tigridioides. The choicest Kew species. 2 feet, 1048. Retusus. A greenhouse variety; salmon-rose. 1½ feet	0	6 6
Sedum. (See Stonecrop, page 110.) Succulents.		
Sempervivum (House Leek).—Succulent.		
No. 1050. Mixed. Old-fashioned favourites; hardy 1/0 &	2	6
Sensitive Plant (Mimosa pudica).  —Perennial. This graceful foliaged greenhouse perennial is one of the curiosities of the vegetable kingdom. Its peculiar sensitiveness to the human touch has originated the idea of a nerve motion somewhat akin to that of animal, and has even suggested a missing link between animal and vegetable life. Be that as it may, the plant is worthy of culture on its own merit; graceful pinnate foliage.  No. 1051. Sensitive Plant. Half-hardy perennial. 1½ feet	0	6
Snapdragon.—(See Antirrhinum, page 68).		
Solanum (Nightshade).—Ornamental fruit.  This marvellous tribe of nutritive and poisonous fruits, including Tomato, Egg Plant, Capsicum, Potatoe, &c., &c., is worthy of the closest study, all the species possessing a magic interest of their own. We here, however, submit a few select species best adapted for ornamental purposes.		,
No. 1058. Hybridum compactum. To meet the demand for berricd plants for table and conservatory decoration great care has been taken in cross-fertilising the different species, and this mixture combines the best features. Perennial. 1 foot	1	0
,, 1059. Capsicastrum. A fine bright scarlet-berried species;	1	0
good habit and free bearcr. Perennial. 1½ fect ,, 1060. Robustum. A stately, grandly-foliaged species for specimens on lawns or general sub-tropical garden; the leaves	0	6
are glossy and prettily spiny. 4 feet	0	6
Spergula (Spurrey). — Perennial. This mossy looking rock plant is a native of Corsica, and much resembles Arenaria Caspitosa. An attempt was made to utilise it in the place of grass for lawns, but it was found to require too much care, and was expensive; but as making a broad carpet, moss-like margin to large flowers, it is inimitable, if care be taken in the planting and subsequent treatment.  No. 1062. Pilifera. Foliage bright green; white small star blossoms	2	6

Sphenogyne.—Hardy annual An old favourite South

American annual. When sown in masses or large clumps the effect

is brilliant; it is also good as a pot plant, and may be used as a cut

No. 1063. Speciosa. Golden yellow; profuse bloomer. 9 inches ... 0 3

#### SUNFLOWER ANNUAL, "STELLA."

No. 1101. "STELLA," bright yellow, dark disc, per packet, 1/0

As cut blooms for general decoration, these small blossomed Sunflowers are in great demand; the larger kinds produce a grand effect in mixed borders, see Nos. 1102 and 1111. "Stella" maintains its position as the best "Miniature" Sunflower.

#### SUNFLOWER, PERENNIAL.

No. 1112. CHOICE PERENNIAL, in sealed packets, 1/0 and 2/6

The Perennial Sunflower is stiffer in growth, smaller in foliage, and more delicate in stalk than the annual species, and as it comes up year after year, its value as a decorative plant in the garden increases. It is also useful as a cut-flower.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON,-1900.

Station (See Layrander Tribe) Per parke	ls	. d.
Statice (Sea Lavender Tribe).—Hardy		
perennial. These hardy plants are in great request for rockeries, rough places in the garden, and for general use as decorative cut flowers,		
their graceful inflorescence adding greatly to the charm of winter bouquets.		
No. 1064. Candelabrum (Suwarrow). A species of singular and		
delicate beauty; long close-flowered spikes of blossom, soft shade of rose; excellent pot plant. I foot	1	0
" 1065. Latifolia. The favourite free-flowering broad panicled		•
species for bouquet work; lavender blue. 1½ feet ,, 1066. Fortunei. Strong growing species, with large heads of	1	0
violet-blue blossom; good winter flower. 1½ feet	0	6
,, 1067. Incana. Dwarf compact habit; pretty miniature graceful sprays; steel blue. 9 inches	0	6
Strentocarnus		
StreptocarpusBulbous perennial. A novel race of free blooming greenhouse pot plants, now in universal demand; bright,		
cheerful, lasting. It is closely allied to the Gesneria, and experiments		
are being tried to import to the Streptocarpus some of brilliant colour of the Gesneriads. The mixture we offer is a carefully fertilised strain,		
. and cannot fail to give satisfaction. (See Illustration, page 111.)		
No. 1100. Choice Hybrids. Superb mixture, all colours 1/6 &	2	6
Stonecrop (Sedum).—Hardy perennials. We may		
safely say that no rockery is without one or more varieties of the		
Sedum, whose name is legion. We offer, as under, seed best adapted to the general convenience.		
No. 1097. Blue (Sedum Cœruleum). An annual species which		
may be sown lightly anywhere; trailer , 1098. Yellow (Sedum Acre. The species familiar to every	0	6
cottage wall; useful for garden edging	1	0

## Large-flowered Sweet Peas-Carters' Select Stock.

Photographed from Nature and Copyrighted by J. C. & Co.

#### LARGE-FLOWERED SWEET PEAS.

No. 1114. CARTERS' Superb Mixture, from 150 varieties. In sealed packets, 1s. and 2s. 6d. each.

GENERAL REMARKS.-Lathyrus Odoratus, or Sweet Pea, first reached the British Isles from its sunny home in the Mediterranean about two centuries since, but the modest bluish purple Vetch-like flower scarcely shadowed forth a promise of the foremost position it now occupies in the floral world. Were it now to be suddenly removed from our gardens many an "aching void" would be experienced; but we are glad to believe that it will continue to be a favourite flower, and delight generations yet unborn. It is remarkable for its delicious fragrance, elegant and graceful form, and general adaptability for decorative purposes-vases, tables, posies, &c.; it is, in fact, an indispensable flower. It is worthy of remark that the number of new varieties of all shades has reached portentous dimensions, so that it may be convenient to our customers to be informed which we consider to be the most distinct and desirable colours. See OUR SELECTION, No. 1127.

For general convenience we append a selected list of Twelve proved distinct varieties, in our opinion the best selection for growing some distinct sorts separately. Our own saving:-

HALF-HARDY PERENNIAL

#### VERBENA, NEW MAMMOTH.

No. 1200. In sealed packets, 1s. and 2s. 6d. each.

Culture.—Sow in spring in pots or pans on heat, prick off the seedlings when they have formed the second leaf, grow them on in heat till end of May, when they may be planted out. Sow also in summer, and keep under glass during winter in store pots, and pot off singly in February.

Photographed from Nature and Copyrighted by J. C. & Co.

#### VIOLA, CHOICEST AND NEWEST MIXED.

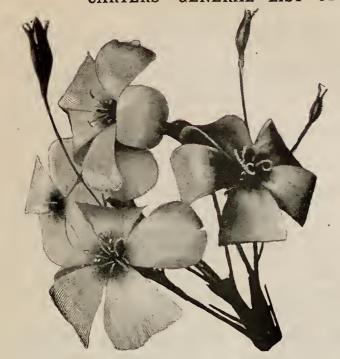

No. 1215. In sealed packets, 1s. and 2s. 6d. each.

The charming flowers are now held in high estimation for bedding purposes, and the pleasing combinations they form with dwarf Geraniums, &c., are remarkable for effect. They may almost be considered as perpetual bloomers; bright and lively colours.

Sweet William (Dianthus Barbatus).—Perennial. This useful hardy perennial, though of German origin, has become naturalised, and is almost looked upon as an exclusively English plant, and is grown throughout the length and breadth of the land. Beyond a friable and slaty soil it requires but little attention, except in the production of the highest class varieties, such as 1165 Holborn Glory, and 1166 Carters' Auricula-eyed — these are simply magnificent, and highly valued. I to 2 feet. No. 1165. Holborn Glory. See Illustration, page 109 1/6 & 2 6 " 1166. Auricula-eyed (Carters'). A strain from the Hunt varieties, improved to highest excellence ... ... " 1167. #### ZINNIA INDICA, CHOICE DOUBLE.

No. 76.	Double Zinnia, 6 distinct varieties, separate	•••			d. 6
,, 77.	Zinnia Pumila, fl. pl., 6 varieties, separate			_	_
,, 1245.	Double Zinnia, Choice Mixture, per packet	/	6 &	_	_

ZINNIA INDICA has been erroneously supposed a double variety of Z. elegans produced by culture, but we have never known a cultivator who has attained that result. We had the first seed from India many years ago, but reserved its distribution for some time in order to verify its character. The double Zinnia is a flower of marvellous beauty and utility, equal in form to the finest Aster, and superior to it in variety of colour. A bed of double Zinnias is worth remembering. Also grown in greenhouse or conservatory in pots, or in small groups or single specimens in mixed border; as a border flower it is in the front rank.

Photographed from Nature and Copyrighted by J. C. & Co.

### CARTERS' SPECIAL MANURES FOR STIMULATING GRASS.

Grass that is kept constantly under the influence of the Mower requires stimulating at intervals or it will weaken and become thin. The following special prescriptions are based upon many years' experience, and are most useful for the purpose of imparting vigour, closeness, and colour.

#### CARTERS' LAWN MANURE, No. 1.

For general purposes on New or Old Lawns.

1s., 2s., and 3s. per box; 14 lbs., 4s.; 28 lbs., 7s.; 56 lbs., 10s.; 112 lbs., 18s. DIRECTIONS FOR USING CARTERS' LAWN MANURE.-For putting down a DIRECTIONS FOR USING CARTERS' LAWN MANURE.—For putting down a new lawn, it should be sown as soon as the ground is thoroughly prepared for the seed, and raked in, care being taken to distribute it as evenly as possible, as the appearance of the Lawn will be materially affected by this. For top dressing, it should be sown immediately after cutting the grass, and, if possible, just before a shower of rain. If the weather is dry, water the Lawn after top dressing. This manure will be found very effective and lasting. It should not be exposed to a hot sun when stored, or in a damp place.

Sow 4 cwt. per agree in a damp place. Sow 4 cwt. per aere.

A 14-lb. bag will dress 1,000 sq. ft.

A 2s. box. will dress 200 sq. ft. A 1s. box will dress 70 sq. ft.

A 3s. box will dress 500 sq. ft.

#### CARTERS' SPECIAL GRASS MANURE, No. 2.

For thickening Cricket Pitches, Tee Pieces, &c., and checking the growth of weeds.

CARTERS' SPECIAL GRASS MANURE discourages the growth of all weeds, stimulates and improves the growth of the grass, and produces a sward of a rich emerald green colour. Apply at the rate of 2 oz. to the square yard. A 2s. 6d. Box will dress 60 square yards; a 56-lb. bag will dress a tennis court or a cricket

Used with great success at "Lord's" and the "Oval" during the past season.

In sealed bags, 14 lbs., 5s. 6d.; 28 lbs., 9s. 6d.; 56 lbs., 15s. 6d.;

112 lbs., 25s. Trial boxes, 2s. 6d. Sow 4 ewt. per acre.

Carters' Fertilizing Fibre.—A perfect substitute for earth and manure; a combined covering and stimulating material of cleanly application. Being of an absorbent nature, it readily retains the moisture necessary for the benefit of the seedling grass. A customer in Essex writes:—"It may interest you to know that the Lawn Grass Seed you supplied, together with the Fibre, has resulted in a close, thick, luxuriant turf. If I had not seen this result I would not have believed it to be a possibility." Price, in sealed bags containing 5 bushels, 7s. 6d.; per 5 bags, 32s. 6d.; per 10 bags, 60s. A bag is sufficient to cover 20 square yards of ground.

For Grass Seeds, see Pictorial Supplement between vages 82 and 63. For other Garden Manures, see page 123.

NOTES FOR THE COLONIES AND ABROAD. (From the "Egyptian Gazette."—This Book will be found of the greatest use for the various parts of the Empire over the World. From the "Buluwayo Chronicle."—Comprehensive and instructive; the description of soils and elimate is admirable. From the "Antigua Standard."—Specially useful to Horticulturists in every part of the World. From the "Anglo-Indian."—The information given is very varied and thoroughly practical.

AT ALL SEASONS, GIANT FLOWERED CROWNS.

At considerable outlay, we have made arrangements for the storage of Lily of the Valley Crowns in a cool chamber and under a special process, by which a continuous supply may be assured of this favourite and charming flower.

Potted immediately upon arrival they should be placed in a cool frame for a few days. and, when in a sense acclimatized, transferred to a temperature of about 60 degrees, they will bloom satisfactorily in about three weeks from the time they are placed in heat.

Per 100, 10s. 6d.; per bundle of 25, 3s.

Photographed from Nature. LILIUM AURATUM

## Beautiful and Hardy Japanese Lilies.

SHIPPED DIRECT to JAMES CARTER & CO. from the JAPANESE BULB FARMS.

#### LILIUM AURATUM,

"The Golden-Rayed Lily of Japan."

Extended List on application.

## New Gladiolus "Snow-White."

A new Autumn-flowering White Gladiolus of exceptional merit from America. The spikes are large and full from top to bottom, flowers well formed, recurved, and beautifully crisped, the upper part pure white, lower petals with a faint line of purple. If the spikes are cut when opening, and allowed to develop in water in the dark, it is positively snow-white.

Fine Bulbs, 9s. per dozen, each 1s.

## Carters' Butterfly Gladiolus.

(See Illustration.)

A really grand acquisition to this charming Autumn-flowering bulbous plant. Much larger in spike and individual flowers, and more vigorous and free-blooming than any other Gladiolus. We introduce this with every confidence as a novelty of undoubted merit. A choice mixture.

Fine Bulbs, per 100, 25s.; per dozen, 3s. 6d.

For general assortment of Gladioli, see page 121.

A useful Article on the cultivation of the Gladioli will be found in Carters' Practical Gardener, post free 1s. 3d. (or 1s. enclosed with other Goods).

## Carters' "Empress" Poppy Anemones.

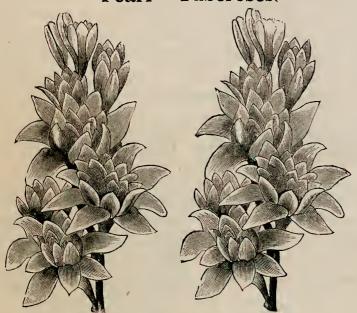

The flowers are of immense size (measuring four inches in diameter) and great substance, invaluable for cutting and decorative purposes generally; and the very moderate price at which they are offered admits of their being extensively used for the decoration of the snrubbery border, where a constant and brilliant display can be produced. The following opinions will be read with interest:-

"EMPRESS' ANEMONES.—We have received from Messrs. James Carter & Co. a bouquet of what they term their 'Giant Empress' Anemone. They are truly gigantic forms and brilliant varieties of Anemone coronaria, and are strikingly beautiful. Several of the flowers are four inches in diameter, borne on stalks nearly a foot long, and almost as thick as our penholder. The colours are varied and rich, ranging from white through the different shades of lavender to deep purple, and from pale red to glowing scarlet and velvety crimson. They are the finest Single Anemones we have ever seen, and such flowers as these before us would be an acquisition even to the garden of an Empress."—Journal of Horticulture.

Price, per 1,000, 75s.; per 100, 8s. 6d.; per doz., 1s. 3d.

### Double Sweet-Scented "Pearl" Tuberoses.

We have secured our stock of Roots from some large cultivators of the above exquisitely fragrant and favourite Flowering Plant for bouquets, button-holes, etc. The ROOTS are again UNUSUALLY FINE; indeed, the Sweet-scented Double Tuberose has seldom been offered on similarly favourable terms. The Tuberose will be found invaluable for bouquets, ladies' dresses, or as a coat flower. The perfume is exquisite, and the general appearance of the pure white double flower is most charming.

Extra large Flowering Bulbs, per 100, 15s.; per doz.. 2s. 6d.

#### Carters' "Cockade" Ranunculus.

A splendid variety of colours and shades; immense double flowers, fitting in all respects to be cultivated by the side of the "Empress" Anemone, and equally superior with that variety to any other class of Ranunculus. The flowers are as double as the most perfect Rose, of immense size, and combine every possible shade of colour peculiar to this interesting and easily-cultivated flower. It is impossible to overestimate their value to all lovers of the Ranunculus family.

E. MASON, Esq., Birmingham, writes:—"Carters' 'Cockade' Ranunculus have been simply splendid, and the admiration of all my friends."

Price of Roots per 1,000, 45s.; per 100, 5s. 6d.; per doz., 1s.

CARTERS' BULBS in the LONDON ROYAL PARKS every Spring since 1894—See them next April.

## Carters' Hardy Bulbs for Winter and Spring Planting.

#### TIGRIDIA GRANDIFLORA ALBA.

(WHITE TIGER FLOWER) .- "A lovely plant in its own deliciously fugitive way, reminding one of those pearl-toothed Eastern beauties, who laugh at you one moment and then closely veil their faces the next, as if blushingly repentant of so bold a sin., 'Creamy white, marked with chestnut-red, on a yellowish ground;' yes, that sounds pretty enough, and having obtained a few of its bulbs, I am on the tiptoe of expectancy, seeing that its congeners are so strikingly lovely in the summer sun." -From The Garden.

Price 1s. 6d. per dozen.

## SEED FOODS-WHOLESOME AND PURE.

Sold by the principal Grocers, Stores, and Corn Merchants, or a Sample, with name and address of nearest Dealer, will be sent on application.

An experience extending over fifty years in the selection, improvement, and distribution of all that is choice in the Seeds of Vegetable products, has induced us to turn our attention, after the closest analytical investigation, to the remarkable feeding values that are attached to many of the Seeds we handle, when treated by special processes adapting them for human consumption. We furnish brief particulars of our Seed Foods, which are guaranteed to be the outcome of only choice and perfect harvestings, assisted to a high state of perfection by our own Patent Seed-cleaning Machinery. These Foods are highly nutritious and easy of digestion, and in their respective classes they will be found invigorating to the growing child, sustaining to the hard worker, nourishing to the invalid, and an agreeable addition generally to all meals.

#### CARTERS' BREAKFAST OATS

Are thoroughly cleaned before being rolled, and in the special patent process of manufacture each flake is twice partially cooked; this fixes the sweet flavour, and renders them easy of digestion, constituting a most desirable food for growing children and invalids.

We have submitted our Breakfast Oats to an eminent County Analyst, who reports as follows:-

"I have examined Carters' Golden Wing Oats, and find that they constitute a Well-balanced Food; I lb. of these Oats may be taken as equivalent in food value to 1 lb. of Ordinary Butchers' Meat and 14 lb. of Potatoes combined."

Full directions will be found on each packet, and whether they are prepared for Porridge for breakfast, Milk Puddings for lunch, Scones for tea, or as Biscuits for dinner, each preparation will be found excellent.

Sold in 2-lb. sealed packets only. Price 5 d. (post free 10 d.)

#### CARTERS' WAFER PEAS

Make excellent Soup in a few minutes, without any troulbe of soaking, &c., as they are twice partially cooked. They are also unequalled for Pease Pudding.

Sold in sealed packets only.

Price 6d. (post free 10d.)

#### CARTERS' GOLDEN BUTTER BEANS.

Thoroughly wholesome and nutritious, possessing a distinct delicate and melting flavour not found in the ordinary Haricot Beans. A delicious winter Vegetable for dinner and supper.

> Sold in sealed packets only. Price  $\mathbf{5}\frac{1}{2}\mathbf{d}$ . (post free  $\mathbf{9}\frac{1}{2}\mathbf{d}$ .)

#### CARTERS' GREEN PEAS.

Furnish the table with the only dish obtainable during the winter months approaching in flavour the fresh garden peas. Sold in Sealed packets only. Price 4d. (post free 8½d.)

#### CARTERS' FRENCH BEANS.

HARICOT VERT-A Parisian delicacy, specially recommended for addition to soups, hashes, &c. Sold in sealed packets only. Price  $6\frac{1}{2}$ d. (post free 11d.)

#### SPECIALITIES FOR

#### CARTERS' BIRD SEEDS.

A mixture of sweet, bright, machine-cleaned Seeds, specially selected for Canaries and smaller cage birds; nutritive and wholesome.

Sold in sealed packets only. Price 1d., 2d., 4d., 6d. each. Postage extra unless ordered with other goods.

#### CARTERS' PARROT FOOD.

A mixture of Seeds selected and cleaned with equal care for Parrots, Cockatoos, and the larger seed-eating birds.

Sold in sealed packets only. Price 12d., 3d., 6d. each.

Postage extra unless ordered with other goods.

CARTERS' SPECIALITIES FOR BIRDS are sold by the principal Grocers, Corn Merchants, and Stores. Name and address of nearest Dealer will be sent on application.

CARTERS', 237, 238, & 97 HIGH HOLBORN, LONDON,-1900.

### TERMS OF BUSINESS.

# Conditions of Guarantee of Quality.

We guarantee our Seeds according to the quality purchased to be of the highest average Standard of vitality of the season, and it is open to the purchaser to confirm this by submitting the samples to professional analysis at his own expense. We cannot, however, be in any way responsible for the produce of Seeds sold under this guarantee, or for errors of description; and it must therefore be clearly understood that our responsibility ceases upon the final acceptance of the Goods.

#### Orders.

ALL ORDERS SHOULD BE WRITTEN SEPARATELY FROM GENERAL LETTERS OR LETTERS OF ENQUIRY.

Please write your Name and Address in full, also nearest Railway Station or Shipping Port to which the Goods are to be forwarded.

All letters are opened under the direction of one of our principals, and the orders are given out for execution under personal supervision. Plant orders are sometimes delayed by severe or hot weather, and they at all times take longer to execute than Bulb or Seed orders, in consequence of the time required in lifting and packing, especially in the autumn after the long accumulation of orders.

### New Customers.

We beg respectfully to state that on opening an account it is necessary for us to receive Cash with the order, or a reference to a Banker or some one known to our House.

## Free Carriage of Goods.

We deliver SEEDS, POTATOES, PLANTS, and BULBS, CARRIAGE PAID, to ANY RAILWAY STATION in ENGLAND and WALES, or to ANY PORT in IRELAND or SCOTLAND where practicable, also FREE by PARCELS POST to Purchaser's door where possible.

(Except in cases where the cost of Carriage on the parcel, through being unusually bulky in proportion to value, absorbs the profit on the transaction, when we reserve to ourselves the right to send unpaid.)

We occasionally hear of charges being made by the Railway Companies, notwithstanding that our address label bears the imprint in **RED** letters "Carriage Paid." In cases where a Charge for the Railway Carriage is made, notwithstanding that the Package is labelled "Carriage Paid," Purchasers should on no account pay the demand, but refer the Carriers to us. Charges for delivery from Stations (if any) must be borne by the consignee.

Glass and other Goods liable to breakage are sent out securely packed, but beyond that we cannot be responsible for damage in transit. Notice of damage should be at once made to, and compensation claimed from, the Carriers.

### Cash Discount.

We allow 5 per cent. discount off the total amount of invoice on all goods paid for with order, or within fourteen days from the date of invoice (but at no later period), UNLESS OTHER TERMS ARE SPECIFIED OR ARRANGED.

### Term of Credit.

OUR FULLEST TERM OF CREDIT IS THREE MONTHS FROM DATE OF INVOICE, AND WITH-OUT DISCOUNT, and our books are made up quarterly—i.e., March 1st, June 1st, September 1st, and December 1st. Five per cent. interest will be charged upon overdue accounts.

### Remittances.

Postal Orders, Post Office Orders, or Cheques on any Bank are acceptable, and should be drawn in favour of JAMES CARTER & CO., and crossed "London and Westminster Bank."

# Empty Packages, Hampers, Boxes, Sacks, Bags, etc.

Are charged at cost price, and full price will be allowed on them when returned immediately, carriage paid and in good condition. These should be in every case marked "Empties from ——;" a letter by post informing us of their despatch is also necessary. Booking charges must be prepaid, and a receipt should be taken, so that the value may be recovered if they are lost or mis-sent. Coin, other valuables, or important communications should on no account be enclosed with returned empties. On receipt of a post-card we will send labels.

## Attention to Customers.

It is our earnest desire that all the requirements and directions of Customers be scrupulously attended to by our assistants, AND WE PRACTISE THE UTMOST PERSONAL SUPERVISION TO SEE THAT THEY ARE CARRIED OUT. We would, therefore, respectfully request that we be informed if at any time there is cause for dissatisfaction, that we may have it rectified at the earliest possible moment.

## Change of Address.

Please notify to us any change of Permanent Address, in order that we may be able to forward our Catalogues with regularity. The favour of your kind recommendation of our House to those of your friends requiring Seeds for the Garden or Farm, or Plants and Flower Roots for the Garden or Conservatory, is respectfully solicited. We shall be pleased, at all times, to forward our Catalogues to any address we may be favoured with.

### Gardeners & Stewards

We have at all times a number of experienced men on our Register, and shall be glad to hear from any customer requiring persons in either of these capacities.

### Seeds for Cottagers, etc.

SEEDS FOR DISTRIBUTION TO COTTAGERS, FOR ALLOTMENTS, SOLDIERS' GARDENS, LOCAL HORTICULTURAL SOCIETIES, HOTEL-KEEPERS, etc., supplied at special terms.
